New AWS-Solutions-Associate Dumps Ppt | Reliable AWS-Solutions-Associate Exam Braindumps

You can now get Amazon AWS-Solutions-Associate exam certification our PrepPDF have the full version of Amazon AWS-Solutions-Associate exam. You do not need to look around for the latest Amazon AWS-Solutions-Associate training materials, because you have to find the best Amazon AWS-Solutions-Associate Training Materials. Rest assured that our questions and answers, you will be completely ready for the Amazon AWS-Solutions-Associate certification exam.

Understanding functional and technical aspects of AWS Solutions Associate Cost Control

The following will be discussed in **AMAZON AWS SOLUTIONS ASSOCIATE exam dumps**:

- Identify cost-effective storage solutions

Selecting the most cost-effective data storage possibilities based on specifications, and implementing automated processes to guarantee that data over time is stored on storage tiers that reduce costs

- Identify cost-effective compute and database services

Selecting the most cost-effective Amazon EC2 billing options for each aspect of the workload, determining the most cost-effective database options based on specifications, selecting suitable scaling strategies from a cost viewpoint, selecting and size compute resources that are optimally suited for the workload, determining possibilities to decrease total cost of ownership (TCO) by managed services and serverless associates

- Design cost-optimized network associates

Identifying when the content transfer can be used to decrease costs, determining strategies to decrease data transfer costs within Amazon Web Services, determining the most cost-effective connectivity choices between AWS and on-premises environments

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q206-Q211):

NEW QUESTION # 206

A company has a legacy application that processes data in two parts. The second part of the process takes longer than the first, so the company has decided to rewrite the application as two microservices running on Amazon ECS that can scale independently. How should a solutions architect integrate the microservices?

- **A. Implement code in microservice 1 to send data to an Amazon SQS queue. Implement code in microservice 2 to process messages from the queue.**
- B. Implement code in microservice 1 to send data to an Amazon S3 bucket. Use S3 event notifications to invoke microservice 2.
- C. Implement code in microservice 1 to send data to Amazon Kinesis Data Firehose. Implement code in microservice 2 to read from Kinesis Data Firehose.
- D. Implement code in microservice 1 to publish data to an Amazon SNS topic. Implement code in microservice 2 to subscribe to this topic.

Answer: A

NEW QUESTION # 207

A company wants to implement a backup strategy for Amazon EC2 data and multiple Amazon S3 buckets. Because of regulatory requirements, the company must retain backup files for a specific time period. The company must not alter the files for the duration of the retention period. Which solution will meet these requirements?

- **A. Use AWS Backup to create a backup vault that has a vault lock in compliance mode. Create the required backup plan.**
- B. Use Amazon Data Lifecycle Manager to create the required automated snapshot policy.
- C. Use Amazon S3 File Gateway to create the backup. Configure the appropriate S3 Lifecycle management.
- D. Use AWS Backup to create a backup vault that has a vault lock in governance mode. Create the required backup plan.

Answer: A

Explanation:

AWS Backup is a fully managed service that allows you to centralize and automate data protection of AWS services across compute, storage, and database. AWS Backup Vault Lock is an optional feature of a backup vault that can help you enhance the security and control over your backup vaults. When a lock is active in Compliance mode and the grace time is over, the vault configuration cannot be altered or deleted by a customer, account/data owner, or AWS. This ensures that your backups are available for you until they reach the expiration of their retention periods and meet the regulatory requirements. References: <https://docs.aws.amazon.com/aws-backup/latest/devguide/vault-lock.html>

NEW QUESTION # 208

A solutions architect is designing a new API using Amazon API Gateway that will receive requests from users. The volume of requests is highly variable, several hours can pass without receiving a single request. The data processing will take place asynchronously but should be completed within a few seconds after a request is made. Which compute service should the solutions architect have the API invoke to deliver the requirements at the lowest cost?

- A. A containerized service hosted in Amazon ECS with Amazon EC2
- B. An AWS Glue job
- C. An AWS Lambda function
- **D. A containerized service hosted in Amazon Elastic Kubernetes Service (Amazon EKS)**

Answer: D

NEW QUESTION # 209

True or False: When you add a rule to a DB security group, you do not need to specify port number or protocol.

- A. TRUE
- B. FALSE
- C. Depends on the RDMS used

Answer: A

NEW QUESTION # 210

True or False: When you perform a restore operation to a point in time or from a DB Snapshot, a new DB Instance is created with a new endpoint.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 211
