

AIGP Practice Questions & AIGP Valid Test Materials

Q **AIGP Practice Test COMPLETE QUESTIONS AND ANSWERS 2024-202**
100% RATED CORRECT, 100% SURE PASS!1
Study online at https://quizlet.com/_gazrui

1. Which of the following are common elements in definitions of AI?
A. Technology
B. Autonomy
C. Human Development
D. Data Input

A. Technology
B. Autonomy
C. Human Development
D. Data Input

2. True or False? AI and machine learning mean the same thing and can be used interchangeably?

FALSE

3. An AI system studies a large set of unlabeled data and tries to detect hidden patterns within it. What type of machine learning is being used in this example?
A. Forecasting
B. Supervised
C. Unsupervised
D. Reinforcement

C. Unsupervised

4. Which of the following models would be most appropriate for analysis of relationships between two variables?
A. Linear/statistical model
B. Computer vision
C. Reinforcement learning
D. Robotics

A. Linear/statistical model

5. When designing an AI system, which considerations impact the choice of the underlying hardware?
A. Types of data used in training.
B. Complexity of the AI algorithm
C. Quality of the data labels
D. Whether the data is biased

A. Types of data used in training.
B. Complexity of the AI algorithm

6. You have been asked to review the AI project for IAPP. The AI project has been delivering faulty predictions and corrupt data pipelines. What are possible sources of these issues? Select all that apply.
A. Inability to scale
B. Data Drift

B. Data Drift
C. Bias
D. Low data quality

3 / 14

P.S. Free 2026 IAPP AIGP dumps are available on Google Drive shared by Lead2Passed: <https://drive.google.com/open?id=1dNN8cue3kh6oo6-EpMKgPRFvBad5a8em>

These formats save you from going through sleepless preparation nights and hectic AIGP test practice. Lead2Passed AIGP practice exams come in these two versions: desktop software and web-based test. A team of experts has approved this AIGP practice test after a thorough analysis of the interface and content. The IAPP AIGP Mock Test has a built-in tracker which keeps a record of your progress in each take for you to easily analyze and improve your IAPP AIGP preparation.

AIGP certification can demonstrate your mastery of certain areas of knowledge, which is internationally recognized and accepted by the general public as a certification. AIGP certification is so high that it is not easy to obtain it. It requires you to invest time and energy. If you are not sure whether you can strictly request yourself, our AIGP test materials can help you. With high pass rate of our AIGP exam questions as more than 98%, you will find that the AIGP exam is easy to pass.

AIGP Valid Test Materials & AIGP Latest Braindumps Free

We have always taken care to provide the best IAPP AIGP exam dumps to our customers. That's why we offer many other benefits with our product. We provide a demo version of the real product to our customers to clear their doubts about the truthfulness and accuracy of IAPP Certified Artificial Intelligence Governance Professional (AIGP) preparation material. You can try the product before you buy it.

IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
Topic 2	<ul style="list-style-type: none"> Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Topic 3	<ul style="list-style-type: none"> Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.
Topic 4	<ul style="list-style-type: none"> Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q164-Q169):

NEW QUESTION # 164

You are a privacy program manager at a large e-commerce company that uses an AI tool to deliver personalized product recommendations based on visitors' personal information that has been collected from the company website, the chatbot and public data the company has scraped from social media.

A user submits a data access request under an applicable US state privacy law, specifically seeking a copy of their personal data, including information used to create their profile for product recommendations.

What is the most challenging aspect of managing this request?

- A. The data subject is not entitled to receive a copy of their data because some of it was scraped from public sources.
- B. Some of the visitor's data is synthetic data that the company does not have to provide to the data subject.
- C. Some of the data subject's data is unstructured data and you cannot untangle it from the other data, including information about other individuals.
- D. The data subject's data is structured data that can be searched, compiled and reviewed only by an automated tool.

Answer: C

Explanation:

Unstructured data that cannot be easily separated from information about other individuals makes fulfilling the data access request complex while ensuring privacy for others.

NEW QUESTION # 165

All of the following are potential benefits of using private over public LLMs EXCEPT:

- A. Application for specific use cases within the enterprise.
- B. Reduction in time taken for data validation and verification.
- C. Confirmation of security and confidentiality.
- **D. Reduction in possibility of hallucinated information.**

Answer: D

Explanation:

Using a private LLM does not inherently reduce the possibility of hallucinations; hallucination is a core limitation of LLM architectures regardless of whether they are public or private.

NEW QUESTION # 166

An AI system's function, the industry and the location in which it operates are important factors in considering which of the following?

- A. Explainability of results.
- B. Diversity of data sources.
- C. Organizational accountability.
- **D. Internal governance needs.**

Answer: D

Explanation:

An AI system's function, industry, and deployment location define its risk profile, which directly influences the internal governance structures an organization must put in place.

From the AI Governance in Practice Report 2025:

"There are many challenges and potential solutions for AI governance, each with unique proximity and significance based on an organization's role, footprint, broader risk-governance profile and maturity." (p. 4)

"AI governance starts with defining the corporate strategy for AI... and formulating policy standards and operational procedures to reflect industry, use case, and location." (p. 11)

* A- Organizational accountability is broader and not directly scoped by industry or function.

* C- Diversity of data sources is tied to data strategy.

* D- Explainability is more influenced by model type, not use context.

NEW QUESTION # 167

Which of the following is an obligation of an importer of high-risk AI systems under the EU AI Act?

- A. Affix the CE marking.
- B. Conduct a data protection impact assessment.
- **C. Verify the Declaration of Conformity.**
- D. Provide technical documentation.

Answer: C

Explanation:

Importers of high-risk AI systems into the EU have specific responsibilities under the EU AI Act. They are not the parties responsible for affixing the CE marking or providing technical documentation-but they must verify that these have been done by the provider.

From the AI Governance in Practice Report 2025:

"Importers must verify that the appropriate conformity assessment has been carried out, the technical documentation is available, and the CE marking has been affixed." (p. 34-35) Thus:

* A. Provide technical documentation- done by the provider.

* B. Affix the CE marking-provider's responsibility.

* C. Verify the Declaration of Conformity-importer obligation.

* D. Conduct a DPIA- relevant under data protection laws, not required under the EU AI Act for importers.

NEW QUESTION # 168

Which model is best for efficiency and agility, and tailored for lower-resource settings?

- A. Supervised learning model.
- **B. Small language model.**
- C. Multimodal model.
- D. Generative language model.

Answer: B

Explanation:

Small language models (SLMs) are lightweight, require less compute, and are better suited to low-resource or edge environments, making them ideal for agility and efficiency.

From general AI best practices:

"SLMs can be deployed in environments with limited computing power, ensuring lower cost and faster integration in constrained contexts." (aligned with industry-wide AI deployment strategies)

NEW QUESTION # 169

.....

It is very convenient for all people to use the AIGP study materials from our company. Our study materials will help a lot of people to solve many problems if they buy our products. The online version of AIGP study materials from our company is not limited to any equipment, which means you can apply our study materials to all electronic equipment, including the telephone, computer and so on. So the online version of the AIGP Study Materials from our company will be very useful for you to prepare for your exam. We believe that our study materials will be a good choice for you.
