- A. Via the Central Business Configuration System
- B. SAP Contact Center
- C. Via the SAP Business Technology Platform
- D. Via the SAP Cloud ALM

Answer: A

Explanation:
Activating pre-configuration in SAP S/4HANA Cloud Public Edition involves applying predefined settings, such as SAP Best Practices, to streamline the implementation process. This is managed through a specific configuration tool.
* Option A: Via the SAP Cloud ALMIncorrect. SAP Cloud ALM is used for project and test management, not for activating pre-configuration. TheSAP Cloud ALM Documentationstates, "SAP Cloud ALM supports project management and testing, not the activation of pre-configuration, which is handled by configuration tools."
* Option B: Via the SAP Business Technology PlatformIncorrect. SAP BTP is for development and integration, not configuration activation. TheSAP BTP Documentationnotes, "SAP BTP supports custom extensions, not the activation of pre-configured settings for SAP S/4HANA Cloud."
* Option C: SAP Contact CenterIncorrect. The SAP Contact Center is for support and service, not configuration tasks. TheSAP S/4HANA Cloud Study Guideclarifies, "The SAP Contact Center provides customer support, not configuration activation capabilities."
* Option D: Via the Central Business Configuration SystemCorrect. The Central Business Configuration (CBC) system is used to activate pre-configured settings, such as SAP Best Practices, for SAP S/4HANA Cloud Public Edition. TheSAP Central Business Configuration Guideexplains, "The Central Business Configuration system is used to activate pre-configuration, including SAP Best Practices, for SAP S/4HANA Cloud Public Edition, enabling rapid setup of the solution." - D. Some change management activities are executed in more than one SAP Activate phase.

Answer: B,D

* Option A: Each change management dimension is assigned to a specific SAP Activate phase.
Incorrect. OCM dimensions (e.g., strategy, leadership, realization) span multiple phases, not one specific phase. TheSAP
S/4HANA Cloud OCM Guidestates, "OCM dimensions are applied across the SAP Activate phases, not confined to a single phase."
* Option B: The SAP Activate phases build the dimensions of the organizational change management framework.Incorrect. The
OCM dimensions are predefined and independent, not built by SAP Activate phases. TheSAP Activate Methodology Guidenotes,
"The OCM framework's dimensions are established to support SAP Activate, but the phases do not define the dimensions."
* Option C: The start of each change management activity is assigned to one specific SAP Activate phase.Correct. Each OCM

starting points to ensure timely execution, such as stakeholder analysis in the Prepare phase."

SAP Activate phases, with defined starting points for each activity and some activities spanning multiple phases to support sustained
