

100% Pass 2026 Newest Oracle 1z0-1075-25 Related Exams

Oracle 1Z0-1075-25 Oracle Manufacturing Cloud 2025 Implementation Professional QUESTION & ANSWERS

Visit Now: <https://www.dumpsertify.com>

What's more, part of that PassLeaderVCE 1z0-1075-25 dumps now are free: https://drive.google.com/open?id=1XUsABOZZy-tJK0InZuVj_zxvIvYMJTFT

We offer you free demo to you to have a try before buying 1z0-1075-25 study guide, therefore you can have a better understanding of what you are going to buy. Free demo can be find in our website, if you are quite satisfied with the free demo, just add the 1z0-1075-25 study guide to shopping cart, after you buy it, our system will send the downloading link and password to you within ten minutes, and you can start your learning right now. Moreover, we offer you free update for one year after you buy the 1z0-1075-25 Exam Dumps, therefore you can get the latest version timely.

Our 1z0-1075-25 test question with other product of different thing is we have the most core expert team to update our 1z0-1075-25 study materials, learning platform to changes with the change of the exam outline. If not timely updating 1z0-1075-25 training materials will let users reduce the learning efficiency of even lags behind that of other competitors, the consequence is that users and we don't want to see the phenomenon of the worst, so in order to prevent the occurrence of this kind of risk, the 1z0-1075-25 Practice Test materials give supervision and update the progress every day, it emphasized the key selling point of the product.

>> 1z0-1075-25 Related Exams <<

Pass Guaranteed Quiz Oracle - Reliable 1z0-1075-25 Related Exams

Passing an exam isn't an easy thing for some candidates, if you choose the 1z0-1075-25 training materials of us, we will make the exam easier for you. 1z0-1075-25 training materials include knowledge points, you can remember them through practicing. 1z0-

1075-25 questions and answers will list the right answer for you, what you need to do is to practice them. In addition, there are experienced specialists checking the 1z0-1075-25 Exam Dumps, they will ensure the timely update for the latest version.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q30-Q35):

NEW QUESTION # 30

In which three ways does Supply Chain Orchestration enrich supply requests with project details to support outside processing for a project-specific work order?

- A. Expenditure Item Date Is set to the requested need-by date and Expenditure Organization is set to the manufacturing plant.
- B. Supply Chain Orchestration initiates the creation of a purchase order without the work order.
- C. Expenditure Item Date is set to the receipt date and Expenditure Organization is set to the manufacturing plant.
- D. Supply Chain Orchestration initiates the creation of a requisition with the project details.
- E. Expenditure Type is set to the expenditure type associated to the outside processing item.

Answer: A,D,E

Explanation:

Supply Chain Orchestration (SCO) plays a vital role in managing project-specific work orders, particularly for outside processing. Here's how it enriches supply requests with project details:

* Statement B : Expenditure Item Date is set to the requested need-by date and Expenditure Organization is set to the manufacturing plant - In project-specific work orders, Supply Chain Orchestration assigns the need-by date as the Expenditure Item Date. The Expenditure Organization is typically set to the manufacturing plant handling the work order.

Oracle Fusion Project-Driven Supply Chain documents this behavior, showing how expenditure details are linked to the project for costing purposes.

Statement D : Supply Chain Orchestration initiates the creation of a requisition with the project details - SCO automatically creates a requisition with all relevant project details, such as project number, task, and expenditure information. This ensures that the procurement process is aligned with the project's financial and material requirements.

Reference : Oracle SCM Cloud Supply Chain Orchestration User Guide details the automated creation of requisitions with project data for external processing.

Statement E : Expenditure Type is set to the expenditure type associated with the outside processing item - In Oracle Cloud, expenditure types must align with the specific processing items. SCO ensures that the correct expenditure type is applied to the work order and subsequent requisitions.

Reference : Project Financial Management guides in Oracle SCM Cloud explain how expenditure types are associated with items, ensuring accurate costing.

Incorrect Statements:

Statement A : SCO does not initiate the creation of a purchase order without the work order. A work order is essential for processing the outside work, and its absence would disrupt the orchestration process.

Statement C : The Expenditure Item Date is not set to the receipt date but rather to the requested need-by date for proper alignment with project scheduling.

NEW QUESTION # 31

You create a work order, in which some of the operations have components with the Push supply type. While reporting material consumption on the Report Material Transaction page, you want the Push components to default whenever the operator selects Show Components.

Which setup task must you perform in the Manage Plant Parameters section to achieve this?

- A. Set Default Transaction Mode to ALL
- B. Set Default Transaction Mode to Entered and Default Transaction Quantity to Work Definition.
- C. Set Default Transaction Mode to Entered.
- D. Set Default Transaction Mode to Work Definition.

Answer: D

Explanation:

To ensure that Push components are automatically defaulted when reporting material consumption on the Report Material Transaction page, you must configure the system to use the Work Definition as the default source for transactions.

* Setting Default Transaction Mode to Work Definition ensures that the system automatically pulls the component list and quantities as defined in the work order or work definition when operators perform material transactions. This setting streamlines the material

consumption process for Push supply type components.

Oracle Manufacturing Cloud 's " Plant Parameters " configuration guide explains how to set the Default Transaction Mode to manage material transactions efficiently, particularly when dealing with Push components.

NEW QUESTION # 32

Your client has asked you to implement the functionality to ensure that the system checks for Qualified Operators when reporting labor usage.

Which statement is NOT true?

- A. Quick Complete is allowed for operations that contain resources with associated job profiles.
- B. You will need to report a qualified operator to manually report resource transactions, if the resource has a job profile associated with It.
- C. Validation of operator qualification is also enforced when reporting operation is completed through the dispatch list.
- D. Qualified labor must be reported at the resource train stop.

Answer: A

Explanation:

When implementing the functionality for checking Qualified Operators during labor usage reporting in Oracle Manufacturing Cloud, it is important to enforce validation for operator qualifications. The following explains why statement C is not true :

* Quick Complete is not allowed for operations that have resources with associated job profiles. This is because operations with specific job profile requirements must go through a more detailed validation process to ensure that the assigned operator has the necessary qualifications before the operation can be completed. Quick Complete bypasses detailed validations, making it unsuitable for operations with strict qualification checks.

Correct statements:

* Statement A : Operator qualification is enforced when reporting operation completion through the dispatch list to ensure compliance.

* Statement B : A qualified operator is required to manually report resource transactions when the resource has an associated job profile.

* Statement D : Labor for qualified operators must be reported at the resource train stop to ensure the resource ' s qualifications are properly validated before continuing with the operation.

Oracle Cloud documentation on labor reporting and operator qualification explains how qualifications are enforced in different stages of the manufacturing process, including manual reporting and dispatch list validation.

NEW QUESTION # 33

Which three statements are true about managing Units of Measure?

- A. A unit of measure conversion is a mathematical relationship between two different units of measure.
- B. A unit of measure standard conversion specifies the conversion factor by which the unit of measure is equivalent to the unit of measure class.
- C. If you want to transact items in units of measure that belong to classes other than their primary UOM class, you must define conversions between the base units of measure in different UOM classes.
- D. You must define the unit of measure class with a base unit of measure.
- E. Conversions between classes are unique for each item; the conversion rate varies for intraclass units of measure.

Answer: A,C,D

Explanation:

In Oracle Manufacturing Cloud, managing Units of Measure (UOM) is critical to ensuring that transactions, measurements, and conversions are handled accurately. Below is a detailed explanation of the correct statements:

* Statement A : You must define the unit of measure class with a base unit of measure - This is a fundamental setup in Oracle Manufacturing Cloud. Every UOM class must have a base unit of measure defined because it serves as the reference for all conversions within the class. The base UOM acts as a standard, and all other UOMs within the class are defined relative to it. Oracle Fusion SCM: " Units of Measure Setup " documentation explains the importance of defining a base unit for every UOM class for system consistency and accurate conversions.

Statement B : If you want to transact items in units of measure that belong to classes other than their primary UOM class, you must define conversions between the base units of measure in different UOM classes - This is true. If an item's UOM belongs to one class, but you need to transact in another UOM from a different class, a conversion must be defined between the base UOMs of the two classes. This ensures seamless inter- class transactions and measurement consistency.

Reference : Oracle Cloud SCM Common Setup Guide for " Units of Measure Conversion " states that cross- class UOM transactions require conversion definitions for operational accuracy.

Statement E : A unit of measure conversion is a mathematical relationship between two different units of measure - UOM conversions in Oracle Cloud are defined mathematically, typically by specifying a conversion factor. This relationship is used by the system to automatically convert quantities between different units of measure, whether for inter-class or intra-class conversions.

Reference : Oracle Fusion Cloud SCM Documentation on " UOM Conversions " explains that a mathematical formula or factor is needed to establish the relationship between two UOMs, enabling transactions across different UOMs.

Incorrect Statements:

Statement C : A unit of measure standard conversion specifies the conversion factor by which the unit of measure is equivalent to the unit of measure class - This statement is incorrect because a standard conversion relates two UOMs directly, not between a UOM and the class itself. Conversions operate between specific UOMs, not between a UOM and its class.

Statement D : Conversions between classes are unique for each item; the conversion rate varies for intraclass units of measure - This is not accurate because conversions between UOM classes are not unique for each item. Once a UOM conversion is established between classes, it applies globally unless there are specific item-level conversions.

This ensures a consistent approach to defining, transacting, and converting units of measure across different manufacturing and inventory processes within Oracle Manufacturing Cloud.

NEW QUESTION # 34

Your customer needs to add additional information to their work order traveler. Which statement is NOT true about the Extensible Work Order Traveler?

- A. It is a critical document that travels with the physical material during production.
- B. Operators can invoke it by using the Generate Extensible Work Order Traveler Report task.
- C. The production operator can invoke It from the Manage Work Orders, Review Dispatch ust. and Manage Supplier Operations pages.
- D. You use Page Composer to display only the required actions.
- E. You can generate the Extensible Work Order Traveler report only from the Review Dispatch List and Manage Supplier Operations pages.

Answer: E

Explanation:

The Extensible Work Order Traveler is a customizable report that contains detailed information about a work order and travels with the physical material during production. The statement that is not true is:

* Statement A is incorrect because the Extensible Work Order Traveler report can be generated from multiple locations within Oracle Manufacturing Cloud, including the Manage Work Orders, Review Dispatch List , and Manage Supplier Operations pages. It is not limited to only the Review Dispatch List and Manage Supplier Operations pages.

Correct statements:

* Statement B : The Extensible Work Order Traveler is a critical document used to communicate work order details during the production process.

* Statement C : Production operators can invoke the traveler from several key pages like Manage Work Orders and Review Dispatch List.

* Statement D : Operators can use the task " Generate Extensible Work Order Traveler Report " to invoke the report.

* Statement E : You can use Page Composer to customize the Extensible Work Order Traveler and display only the required actions, allowing flexibility in what information is presented.

Oracle Cloud documentation on the Extensible Work Order Traveler explains how the report can be invoked from various areas within the application and how it can be customized using Page Composer.

NEW QUESTION # 35

.....

To get success in exams and especially in a professional certification test like the Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25 test is very important to build a bright career. People from all over the world can get the best-paying jobs after passing the Oracle 1z0-1075-25 Exam. So PassLeaderVCE will help you to study well for the Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25 certification exam. And price is benefit and reliable.

1z0-1075-25 Test Book: <https://www.passleadervce.com/Oracle-Cloud/reliable-1z0-1075-25-exam-learning-guide.html>

It brings great convenience for most IT workers because it allows candidates to practice 1z0-1075-25 exam prep anytime and

anywhere as long as you download the 1z0-1075-25 dumps pdf, Oracle 1z0-1075-25 Related Exams On the other hand, you can also be provided request for access extension and product update on your discretion, Oracle 1z0-1075-25 Related Exams Learn with Online Training To learn the concepts covered in the exam, it is suggested to have online training.

Which of the following is not impacted by a default login 1z0-1075-25 Reliable Braindumps Free authentication method list, It also calculates the costs and payback for using the technology, It brings great convenience for most IT workers because it allows candidates to Practice 1z0-1075-25 Exam prep anytime and anywhere as long as you download the 1z0-1075-25 dumps pdf.

PassLeaderVCE Oracle 1z0-1075-25 Different Formats

On the other hand, you can also be provided request for access extension and 1z0-1075-25 product update on your discretion, Learn with Online Training To learn the concepts covered in the exam, it is suggested to have online training.

If you want to master 1z0-1075-25 dumps and feel casual while testing, you can purchase the soft version which can provide you same exam scene and help you get rid of stress and anxiety.

PassLeaderVCE is the best provider with nearly 100% pass rate in 1z0-1075-25 (Oracle Manufacturing Cloud 2025 Implementation Professional) exam dumps and will be your best choice.
