SAP E_S4CPE_2405 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of project managers and emphasizes the importance of adopting a cloud-first approach when implementing SAP solutions. It also includes building the right implementation team and running fit-to-standard workshops to align system configuration with best practices and standard business processes.

Thema 2	<ul style="list-style-type: none"> • Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.
Thema 3	<ul style="list-style-type: none"> • System Landscapes and Identity Access Management: This section of the exam measures skills of system administrators and focuses on designing and managing SAP system landscapes while ensuring secure and efficient identity access management. It includes concepts related to system environments, user authentication, and authorization controls.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition E_S4CPE_2405 Prüfungsfragen mit Lösungen (Q39-Q44):

39. Frage

Which of the following are required for a new implementation of SAP S/4HANA Cloud Private Edition? Note: There are 2 correct answers to this question.

- A. Access to the Software Update Manager tool
- B. Nomination of a lead conversion expert for content activation
- C. Nomination of a lead configuration expert for content activation
- D. Detailed Digital Discovery Assessment with SAP Best Practices

Antwort: C,D

40. Frage

Through which tools can you launch the Cloud Integration Automation service? Note: There are 2 correct answers to this question.

- A. SAP Business Accelerator Hub
- B. SAP Cloud ALM
- C. SAP for Me
- D. SAP Solution Manager

Antwort: B,C

Begründung:

The Cloud Integration Automation service facilitates the integration of SAP cloud solutions. It can be launched through the following tools:

Option A: SAP for Me

This option is correct. SAP for Me is a customer portal that provides access to various SAP services, including the Cloud Integration Automation service.

Option B: SAP Solution Manager

This option is incorrect. SAP Solution Manager is primarily used for application lifecycle management and does not directly launch the Cloud Integration Automation service.

Option C: SAP Business Accelerator Hub

This option is incorrect. SAP Business Accelerator Hub is a repository for APIs and does not provide access to the Cloud Integration Automation service.

Option D: SAP Cloud ALM

This option is correct. SAP Cloud ALM is an application lifecycle management tool for cloud solutions and provides access to the Cloud Integration Automation service.

In summary, the Cloud Integration Automation service can be launched through SAP for Me and **

41. Frage

Which activity in situation handling is exclusively available for the extended framework?

- A. SAP Fiori application extensions

- B. Collect situation data to prepare the automated r
- C. Navigate from notification to the app where the situation occurred to get more info and resolve
- **D. Develop custom situation handling templates**
- E. Adapt predelivered situation handling templates to business requirements

Antwort: D

Begründung:

Situation handling in SAP S/4HANA Cloud Private Edition provides a framework to proactively inform users about specific business situations requiring attention. Within this framework, certain activities are exclusive to the extended framework:

Option A: Adapt predelivered situation handling templates to business requirements This option is incorrect. Adapting predelivered templates is available in both the standard and extended frameworks.

Option B: Navigate from notification to the app where the situation occurred to get more info and resolve This option is incorrect. This navigation capability is a standard feature in situation handling.

Option C: Develop custom situation handling templates

This option is correct. The extended framework allows for the development of custom situation templates tailored to specific business needs, a feature not available in the standard framework.

Option D: Collect situation data to prepare the automated response

This option is incorrect. Data collection for automated responses is part of the standard framework.

In summary, the ability to develop custom situation handling templates is an activity exclusively available in the extended framework of situation handling in SAP S/4HANA Cloud Private Edition.

42. Frage

Where do you create test cases in SAP Cloud ALM to document formal tests?

- A. Manage Your Test Processes app
- **B. Test Plan app**
- C. Test Execution app
- D. Test Preparation app

Antwort: B

Begründung:

In SAP Cloud ALM, formal test cases are created and managed using the Test Plan app. This application allows users to define, organize, and document test cases systematically.

Option A: Test Plan app

This option is correct. The Test Plan app facilitates the creation and management of test plans, including the documentation of formal test cases.

Option B: Manage Your Test Processes app

This option is incorrect. There is no app by this name in SAP Cloud ALM.

Option C: Test Execution app

This option is incorrect. The Test Execution app is used to execute test cases and record results but is not primarily intended for creating test cases.

Option D: Test Preparation app

This option is incorrect. The Test Preparation app assists in preparing test cases for execution but does not focus on their creation and documentation.

In summary, the Test Plan app in SAP Cloud ALM is the appropriate tool for creating and documenting formal test cases.

43. Frage

After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. SAP Business Accelerator Hub
- B. Integration and API List
- **C. SAP Integration Solution Advisory Methodology**
- D. SAP Cloud ALM Requirements app

Antwort: C
