## 350-701 Valid Test Syllabus | 350-701 Exam Assessment

We are aware that the IT industry is a new industry. It is one of the chain to drive economic development. So its status can not be ignored. IT certification is one of the means of competition in the IT industry. Passed the certification exam you will get to a good rise. But pass the exam is not easy. It is recommended that using training tool to prepare for the exam. If you want to choose this certification training resources, EduDump's Cisco 350-701 Exam Training materials will be the best choice. The success rate is 100%, and can ensure you pass the exam.

The Cisco 350-701 exam covers a wide range of topics such as network security, cloud security, content security, endpoint protection and detection, secure network access, visibility and enforcement, and secure network architecture. It is a comprehensive exam that ensures candidates have a thorough understanding of various security technologies, tools, and techniques.

Cisco 350-701 Certification Exam is designed for professionals who intend to implement and operate Cisco security core technologies. 350-701 exam validates the knowledge and skills required to secure networks, devices, applications, and endpoints.

The Cisco 350-701 exam is one of the most in-demand certification exams in the IT industry today.

## Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q629-Q634):

### NEW QUESTION # 629

Which attack type attempts to shut down a machine or network so that users are not able to access it?

- A. smurf
- B. bluesnarfing
- C. MAC spoofing
- D. IP spoofing

**Answer: A**

Explanation:

Explanation:

Denial-of-service (DDoS) aims at shutting down a network or service, causing it to be inaccessible to its intended users.

The Smurf attack is a DDoS attack in which large numbers of Internet Control Message Protocol (ICMP) packets with the intended victim's spoofed source IP are broadcast to a computer network using an IP broadcast address.

### NEW QUESTION # 630

What is the benefit of installing Cisco AMP for Endpoints on a network?

- A. It provides operating system patches on the endpoints for security.
- B. It enables behavioral analysis to be used for the endpoints.
- C. It provides flow-based visibility for the endpoints network connections.
- D. It protects endpoint systems through application control and real-time scanning

**Answer: D**

Explanation:

Cisco AMP for Endpoints is a cloud-based endpoint security solution that provides advanced malware protection, threat detection and response, and endpoint isolation. It protects endpoint systems through application control and real-time scanning, which are two of its multifaceted prevention techniques.

Application control allows administrators to define and enforce policies on which applications can run on the endpoints, while real-time scanning continuously monitors files and processes for malicious activity. These features help stop threats from compromising the endpoints and reduce the attack surface.
