SAP C_CPI_2506 Practice Test For Better Exam Preparation 2026

Improvement in C_CPI_2506 science and technology creates unassailable power in the future construction and progress of society. As we can see, the rapid progression of the whole world is pushing people forward and the competitiveness among people who are fighting on the first line is growing intensely. Numerous advantages of C_CPI_2506 training materials are well-recognized, such as 99% pass rate in the exam, free trial before purchasing, secure privacy protection and so forth. From the customers' point of view, our C_CPI_2506 Test Question put all candidates' demands as the top priority. We treasure every customer' reliance and feedback to the optimal C_CPI_2506 practice test.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 2	<ul style="list-style-type: none">Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.

Topic 3	<ul style="list-style-type: none"> • SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 4	<ul style="list-style-type: none"> • SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

SAP Certified Associate - Integration Developer Sample Questions (Q47-Q52):

NEW QUESTION # 47

You want to set up Exchange Properties in an integration flow. Besides a Content Modifier, what can you use?

- A. Python scripting
- B. Batch scripting
- **C. Groovy SDK scripting**
- D. XML scripting

Answer: C

Explanation:

The Groovy SDK scripting can be used to set up Exchange Properties in an integration flow. The Groovy SDK scripting allows you to access and manipulate message headers, properties, and payloads using Groovy scripts. You can use the setProperty method to set an Exchange Property with a name and a value. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 48

How do you configure a SOAP adapter for asynchronous processing?

- A. Message Exchange Pattern: One-Way. Process Settings: WS Standard
- **B. Message Exchange Pattern: One-Way. Process Settings: Robust**
- C. Message Exchange Pattern: Request-Reply. Process Settings: Robust
- D. Message Exchange Pattern: Request-Reply. Process Settings: WS Standard

Answer: B

Explanation:

For asynchronous processing in a SOAP adapter (SAP Cloud Integration):

Use Message Exchange Pattern = One-Way # Indicates no response is expected.

Choose Process Settings = Robust # Ensures message reliability and error handling in async flows.

Other combinations:

Request-Reply # Used for synchronous scenarios, not async.

WS Standard # Not the correct configuration for async reliability in CPI SOAP adapter.

Thus, correct async configuration is: One-Way + Robust.

NEW QUESTION # 49

For which of the following scenarios can you use scripting in an integration flow?

- A. Configure an OData adapter.
- **B. Add information to the message log.**
- C. Create XSLT mapping artifacts.

Answer: B

Explanation:

In SAP Cloud Integration (part of Integration Suite), scripting (Groovy, JavaScript) is supported in integration flows to handle custom logic that cannot be achieved by standard adapters or mappings. Example use cases:

Enriching messages with dynamic values.

Adding custom log entries into the Message Processing Log.

Custom validation, conversions, or calculations.

Other options:

A). Create XSLT mapping artifacts # Achieved via XSLT, not scripting.

C). Configure an OData adapter # Done via adapter configuration, not scripting.

Thus, scripting is used for runtime logic enhancements like adding information to the message log.

NEW QUESTION # 50

You use an APIKey for authentication in an HTTPS API call. In which part of the Content Modifier is the APIKey included?

- A. Attachment
- **B. Message header**
- C. Exchange property
- D. Message body

Answer: B

Explanation:

When using API Key authentication for HTTP(S) calls in SAP Integration Suite:

The API Key is typically included in the HTTP header (e.g., APIKey: <value> or x-api-key: <value>).

Message headers are configured in the Content Modifier for outbound requests.

Other options:

Attachment # Used for file handling, not authentication.

Message body # Contains payload, not credentials.

Exchange property # Used internally within the flow, not sent externally.

Thus, the API Key must be placed in the Message header.

NEW QUESTION # 51

You want to send messages over an SOAP adapter to an integration flow. Which method do you use to send the messages?

- A. UPDATE
- B. GET
- **C. POST**
- D. PATCH

Answer: C

Explanation:

To send messages over a SOAP adapter to an integration flow, you must use the POST method. The POST method is used to create or update a resource on the server using the SOAP message body as the input. The SOAP adapter supports both SOAP 1.1 and SOAP 1.2 protocols and can handle both one-way and request-reply message exchange patterns. The SOAP adapter can be configured as a sender or a receiver channel in an integration flow. Reference: SOAP (SOAP 1.x) Adapter | SAP Help Portal, SOAP Sender Adapter: Example Integration Flow | SAP Help Portal

NEW QUESTION # 52

.....

You may feel astonished and doubtful about this figure; but we do make our C_CPI_2506 exam dumps well received by most customers. Better still, the 98-99% pass rate has helped most of the candidates get the certification successfully, which is far beyond that of others in this field. In recent years, supported by our professional expert team, our C_CPI_2506 Test Braindumps have grown up and have made huge progress. We pay emphasis on variety of situations and adopt corresponding methods to deal with. More successful cases of passing the C_CPI_2506 exam can be found and can prove our powerful strength.
