## 最新的OGBA-101考試題庫 & 安全的OGBA-101認證題庫：TOGAF Business Architecture Foundation Exam

The Open Group OGBA-101 認證考試是一個檢驗IT專業知識的認證考試。Fast2test是個能幫你快速通過The Open

Group OGBA-101 認證考試的網站，很多參加The Open Group OGBA-101 認證考試的人花費大量的時間和精力，或者花錢報補習班，都是為了通過The Open Group OGBA-101 認證考試。Fast2test可以讓你不需要花費那麼多時間，金錢和精力，Fast2test會為你提供針對性訓練來準備The Open Group OGBA-101認證考試，僅需大約20個小時你就能通過考試。

## 最新的 TOGAF Business Architecture Foundation OGBA-101 免費考試真題 (Q37-Q42):

### 問題 #37

Which ADM phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements?

- A. Phase B
- B. Phase C
- **C. Phase A**
- D. Preliminary Phase

答案：C

#### 解題說明：

In the TOGAF ADM (Architecture Development Method), Phase A, also known as the Architecture Vision phase, is critical for defining the problem to be solved and identifying the stakeholders, their concerns, and requirements. Here's a detailed explanation:  
Phase A: Architecture Vision:

Objective: The primary objective of Phase A is to establish a high-level vision of the architecture project. This includes defining the scope, identifying stakeholders, and understanding their concerns and requirements.

Stakeholder Identification: During this phase, all relevant stakeholders are identified. This includes business leaders, IT leaders, end-users, and other parties who have a vested interest in the architecture project.

Concerns and Requirements: Once stakeholders are identified, their concerns and requirements are gathered. This involves understanding their needs, expectations, and the issues they face that the architecture project aims to address.

#### Key Activities:

Problem Definition: Phase A focuses on clearly defining the problem or opportunity that the architecture project seeks to address. This sets the stage for developing the architecture vision and ensuring that the project aligns with business goals.

Developing the Architecture Vision: A key output of Phase A is the architecture vision, which provides a high-level overview of the desired future state. This vision is aligned with the business strategy and objectives.

Requirements Management: Phase A also involves establishing a requirements management process to ensure that stakeholder needs are captured, analyzed, and addressed throughout the architecture development process.

#### TOGAF Reference:

Phase A Deliverables: Key deliverables of Phase A include the Architecture Vision document, stakeholder map, and high-level requirements.

ADM Guidelines and Techniques: TOGAF provides guidelines and techniques for effectively conducting Phase A, including methods for stakeholder analysis, requirements gathering, and developing the architecture vision.

In summary, Phase A of the TOGAF ADM focuses on defining the problem to be solved, identifying stakeholders, understanding their concerns and requirements, and developing a high-level architecture vision that aligns with business objectives.

### 問題 #38

Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?

- A. To coordinate with the other management frameworks in use
- **B. To classify architecture and solution assets**
- C. To identify and understand business requirements
- D. To describe how an architecture addresses stakeholder concerns

答案：B

#### 解題說明：

The Enterprise Continuum is a tool within the TOGAF framework that provides methods for classifying architecture and solution assets. The continuum is a view of the Architecture Repository that provides methods for classifying, storing, and managing the various architecture assets. These assets include architectures, architectural patterns, architecture descriptions, and other related artifacts. The Enterprise Continuum enables architects to organize the repository in a way that is consistent and understandable, facilitating the reuse of these assets across various architecture development initiatives.

### 問題 #39

Which of the following best describes the purpose of Business Scenarios?

- A. To guide decision making throughout the enterprise
- **B. To identify and understand requirements**
- C. To catch errors in a project architecture early
- D. To identify risk when implementing an architecture project

答案: B

### 問題 #40

In which part of a business scenario are business capabilities and value streams modelled?

- A. When identifying the human actors
- B. When identifying the business and technology environment
- **C. When identifying and documenting desired outcomes**
- D. When identifying, documenting and ranking the problem

答案: C

解題說明:

In the context of TOGAF's business scenarios, business capabilities and value streams are typically modeled during the phase of identifying and documenting the desired outcomes. This is because desired outcomes are directly related to what the business intends to achieve, and therefore, it makes sense to model the capabilities (what the business can do) and the value streams (the series of steps the business undertakes to create value) at this stage. This helps in understanding the required changes or enhancements to business capabilities and processes to achieve those outcomes.

### 問題 #41

Refer to the table below:

Which ADM Phase(s) does this describe?

- A. Phase B
- **B. Phase B, C and D**
- C. Phase E
- D. Preliminary Phase

答案: B

解題說明:

The table describes the steps involved in Phase B (Business Architecture), Phase C (Information Systems Architectures), and Phase D (Technology Architecture) of the TOGAF ADM5. These phases are responsible for developing the target architectures for each domain and identifying the gaps between the baseline and target architectures. The table shows the outputs and outcomes of each phase, as well as the essential knowledge required for each phase.

### 問題 #42
