# HOT Valid HPE7-J02 Mock Test - High-quality HP Advanced HPE Storage Integrator Solutions Written Exam - Reliable HPE7-J02 Dumps Files

The Internet is increasingly becoming a platform for us to work and learn, while many products are unreasonable in web design, and too much information is not properly classified. It's disorganized. Our HPE7-J02 study materials draw lessons from the experience of failure, will all kinds of qualification examination has carried on the classification of clear layout, at the same time the user when they entered the HPE7-J02 Study Materials page in the test module classification of clear, convenient to use a very short time to find what they want to study, which began the next exercise.

We can guarantee that you are able not only to enjoy the pleasure of study but also obtain your HP HPE7-J02 certification successfully, which can be seen as killing two birds with one stone. And you will be surprised to find our superiorities of our HP HPE7-J02 Exam questions than the other vendors.

>> Valid HPE7-J02 Mock Test <<

Pass Guaranteed Quiz HPE7-J02 - Accurate Valid Advanced HPE Storage Integrator Solutions Written Exam Mock Test

Our materials can make you master the best HPE7-J02 questions torrent in the shortest time and save your much time and energy to complete other thing. What most important is that our HPE7-J02 study materials can be download, installed and used safe. We can guarantee to you that there no virus in our product. Not only that, we also provide the best service and the best HPE7-J02 Exam Torrent to you and we can guarantee that the quality of our HPE7-J02 learning dump is good. So please take it easy after the purchase and we won't let your money be wasted.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	• Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.
Topic 2	• Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.

Topic 3	• HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 4	• Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.
Topic 5	• Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.
Topic 6	• Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.
Topic 7	• Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.
Topic 8	• Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50
A customer is replacing their HPE 3PAR 8200 Peer Persistence setup with Alletra 6000. In a recent audit, they were warned that the Quorum Witness VM was missing security updates.
How would you respond regarding the new setup?

- A. Quorum witness appliance security patch updates follow the array release train updates.
- B. Quorum witness is installed as a service on a supported Linux server, which can be updated as needed.
- C. Quorum witness appliance can be set to automatically download and apply available updates.
- D. Quorum witness is deployed as a SaaS option, and security updates are applied automatically.

Answer: D

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
With Alletra and Primera Peer Persistence, the Quorum Witness is no longer a self-hosted VM. It is delivered as a cloud-based SaaS service managed by HPE. This eliminates customer responsibility for patching and ensures HPE automatically applies updates and security fixes. This resolves the audit concern.
Distractors:
A: Applies to older 3PAR environments, not Alletra/Primera.
C/D: Quorum Witness is no longer an appliance - it is SaaS managed, so these don't apply.
Key Concept: Alletra Quorum Witness is SaaS-managed, removing patching responsibility.
Reference: HPE Alletra Peer Persistence and Cloud Quorum Witness Guide.

NEW QUESTION # 51
Which statement is correct when deploying an HPE Zerto DR solution where an Extended Journal Copy is required with a one-year retention period?

- A. Extended Journal Copies always come from the target site to avoid impact on the production site.
- B. HPE Zerto supports a maximum of 30-day retention and cannot exceed this period.
- C. An additional license is required to enable the Extended Journal Copy feature.
- D. HPE Zerto integrates with HPE StoreOnce to enable long-term retention for Extended Journal Copies.

Answer: D

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
Zerto Extended Journal allows retention up to one year by integrating with secondary storage like HPE StoreOnce. Short-term journals (seconds to days) reside on primary replication storage, while long-term copies (weeks/months/years) are offloaded to StoreOnce for cost-efficient retention.
Distractors:
A: No separate license is required - it is a standard Zerto feature when integrated.
C: Extended Journals can be sourced from production or target, depending on setup; not "always" target.
D: Incorrect - Zerto supports >30 days retention with Extended Journal.
Key Concept: Zerto + HPE StoreOnce for long-term DR retention.
Reference: HPE Zerto with StoreOnce White Paper.

NEW QUESTION # 52
You are sizing an HPE Alletra 5030. Unless otherwise indicated by the HPE sizer or the customer's requirements, HPE best practices state that you should default to which minimum FDR calculation?

- A. Above 12% for low-read latency
- B. 23% of the largest drive size
- C. Below 12% for low-read latency
- D. 23% of the smallest drive size

Answer: B

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
In Alletra 5000/6000 sizing, the Failure Domain Reserve (FDR) is used to account for rebuild overhead in case of drive failure. HPE best practices define that, unless otherwise directed by the sizing tool or customer requirements, the minimum FDR value should be set to 23% of the largest drive size. This ensures enough reserve capacity for fault tolerance and sustained performance during rebuilds.
Distractors:
B/C: Low-read latency is influenced by cache and workload profile, not by arbitrary FDR percentages.
D: Using the smallest drive is incorrect - rebuild impact must be sized against the largest drive.
Key Concept: FDR sizing based on 23% of largest drive = HPE best practice.
Reference: HPE Alletra 5000/6000 Sizing and Configuration Guide.

NEW QUESTION # 53
You need to evaluate a customer virtual server environment to size an HPE Block storage solution according to the metrics seen on the system over a period of time. The environment consists of Lenovo servers and Pure Storage as the storage vendor for a Microsoft Hyper-V cluster managed by Microsoft SCVMM.
Which HPE tools can you utilize to gather the usage metrics of this setup?

- A. Use the HPE InfoSight Primary Storage sizing tool to calculate the competitive performance metrics.
- B. Export the Microsoft System Center Virtual Machine Manager database for NinjaProtected analysis.
- C. Import the HPE CloudPhysics.vhdx collector to the Hyper-V cluster to gather the analytics.
- D. Install the SAFcollector agents into the environment and use SAFanalyze to import the agent output.

Answer: C

Explanation:
Detailed Explanation:

Rationale for Correct Answer:

HPE CloudPhysics provides comprehensive environment assessment and competitive sizing for virtualized environments (VMware, Hyper-V, etc.). The CloudPhysics collector (available as a .vhdx for Hyper-V) is deployed into the cluster to gather metrics on CPU, memory, storage IOPS/latency, and utilization trends.

These analytics feed into the sizing of HPE storage solutions.

Distractors:

B: InfoSight sizing tools work with HPE systems, not competitive 3rd-party storage like Pure.

C: SAF is a manual assessment requiring email submission and is not the correct modern method for this case.

D: NinjaProtected applies to backup analysis, not production Hyper-V cluster sizing.

Key Concept: CloudPhysics.vhdx collector for Hyper-V sizing with 3rd-party infrastructure.

Reference: HPE CloudPhysics Assessment Guide.

NEW QUESTION # 54

Exhibit shows HPE StoreOnce Catalyst Store Security Settings:

Server Controlled Data Immutability enabled (7 days).

Maximum ISV Controlled Data Immutability Retention (90 days).

Which statement is correct?

- A. Maximum ISV Controlled Data Immutability Retention allows the ISV backup application to manage item-level immutability.
- B. The Maximum ISV Controlled Data Immutability Retention parameter must be set to 0 for optimal Veeam v12 support.
- C. Server-Controlled and ISV-Controlled Data Immutability values do not need to match when both are configured.
- D. Server-Controlled Data Immutability is required to achieve the highest immutability with Veeam v12 backups.

Answer: A

NEW QUESTION # 55

......

A good learning platform should not only have abundant learning resources, but the most intrinsic things are very important, and the most intuitive things to users are also indispensable. The HPE7-J02 test material is professional editorial team, each test product layout and content of proofreading are conducted by experienced professionals, so by the editor of fine typesetting and strict check, the latest HPE7-J02 Exam Torrent is presented to each user's page is refreshing, and ensures the accuracy of all kinds of HPE7-J02 learning materials is extremely high.
