CLF-C02 Test Cram Review | CLF-C02 Exam Dumps Pdf

Many people think that passing some difficult Amazon certification exams needs to be proficient in much of CLF-C02 expertise and only these Amazon personnels who grasp the comprehensive knowledge would be able to enroll in the exam. In fact, there are many ways to help you make up for your lack of knowledge, and pass the CLF-C02 Certification exams in the same. Perhaps you would spend less time and effort than the people who grasp fairly comprehensive expertise. The saying goes, all roads lead to Rome.

It is universally acknowledged that Amazon certification can help present you as a good master of some knowledge in certain areas, and it also serves as an embodiment in showcasing one's personal skills. However, it is easier to say so than to actually get the Amazon certification. We have to understand that not everyone is good at self-learning and self-discipline, and thus many people need outside help to cultivate good study habits, especially those who have trouble in following a timetable. To handle this, our CLF-C02 test training will provide you with a well-rounded service so that you will not lag behind and finish your daily task step by step. At the same time, our CLF-C02 study torrent will also save your time and energy in well-targeted learning as we are going to make everything done in order that you can stay focused in learning our CLF-C02 study materials without worries behind. We are so honored and pleased to be able to read our detailed introduction and we will try our best to enable you a better understanding of our CLF-C02 test training better.

First-grade CLF-C02 Test Cram Review to Obtain Amazon Certification

If you are also planning to take the CLF-C02 practice test and don't know where to get real CLF-C02 exam questions, then you are at the right place. BraindumpsIT is offering the actual CLF-C02 Questions that can help you get ready for the examination in a short time. These CLF-C02 Practice Tests are collected by our team of experts. It has ensured that our questions are genuine and updated. We guarantee that you will be satisfied with the quality of our AWS Certified Cloud Practitioner (CLF-C02) practice questions.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q830-Q835):

NEW QUESTION # 830
An ecommerce company wants to provide relevant product recommendations to its customers. The recommendations will include products that are frequently purchased with other products that the customer already purchased. The recommendations also will include products of a specific color and products from the customer's favorite brand.
Which AWS service or feature should the company use to meet these requirements with the LEAST development effort?

- A. Amazon Forecast
- B. Amazon Personalize
- C. Amazon SageMaker Studio
- D. Amazon Comprehend

Answer: B

Explanation:
Amazon Personalize is a service that provides real-time personalized recommendations based on the user's behavior, preferences,

and context. It can also incorporate metadata such as product color and brand to generate more relevant recommendations. Amazon Comprehend is a natural language processing (NLP) service that can analyze text for entities, sentiments, topics, and more. Amazon Forecast is a service that provides accurate time-series forecasting based on machine learning. Amazon SageMaker Studio is a web-based integrated development environment (IDE) for machine learning.

NEW QUESTION # 831

Which AWS service or feature allows a user to establish a dedicated network connection between a company's on-premises data center and the AWS Cloud?

- A. VPC peering
- B. Amazon Route 53
- C. AWS Direct Connect
- D. AWS VPN

Answer: C

Explanation:
AWS Direct Connect is an AWS service that allows users to establish a dedicated network connection between their on-premises data center and the AWS Cloud. This connection bypasses the public internet and provides more predictable network performance, reduced bandwidth costs, and increased security. Users can choose from different port speeds and connection types, and use AWS Direct Connect to access AWS services in any AWS Region globally. Users can also use AWS Direct Connect in conjunction with AWS VPN to create a hybrid network architecture that combines the benefits of both private and public connectivity. References: AWS Direct Connect, [AWS Cloud Practitioner Essentials: Module 3 - Compute in the Cloud]

NEW QUESTION # 832

Which controls are the responsibility of both AWS and AWS customers, according to the AWS shared responsibility model? (Select TWO.)

- A. Patch management
- B. Choice of the AWS Region where data is stored
- C. Account structures
- D. Configuration management
- E. Physical and environmental controls

Answer: A,D

Explanation:
Patch management and configuration management are controls that are the responsibility of both AWS and AWS customers, according to the AWS shared responsibility model. Patch management is the process of applying updates to software and applications to fix vulnerabilities, bugs, or performance issues. Configuration management is the process of defining and maintaining the settings and parameters of systems and applications to ensure their consistency and reliability. AWS is responsible for patching and configuring the software and services that it manages, such as the AWS global infrastructure, the hypervisor, and the AWS managed services. The customer is responsible for patching and configuring the software and services that they manage, such as the guest operating system, the applications, and the AWS customer-managed services.
Physical and environmental controls are the responsibility of AWS, according to the AWS shared responsibility model. Physical and environmental controls are the measures that protect the physical security and availability of the AWS global infrastructure, such as power, cooling, fire suppression, and access control.
AWS is responsible for maintaining these controls and ensuring the resilience and reliability of the AWS Cloud. Account structures are the responsibility of the customer, according to the AWS shared responsibility model. Account structures are the ways that customers organize and manage their AWS accounts and resources, such as using AWS Organizations, IAM users and roles, resource tagging, and billing preferences.
The customer is responsible for creating and configuring these structures and ensuring the security and governance of their AWS environment. Choice of the AWS Region where data is stored is the responsibility of the customer, according to the AWS shared responsibility model. AWS Regions are geographic areas that consist of multiple isolated Availability Zones. Customers can choose which AWS Region to store their data and run their applications, depending on their latency, compliance, and cost requirements.
The customer is responsible for selecting the appropriate AWS Region and ensuring the data sovereignty and regulatory compliance of their data.

NEW QUESTION # 833

A company needs to securely store important credentials that an application uses to connect users to a database.

Which AWS service can meet this requirement with the MINIMAL amount of operational overhead?

- A. Amazon GuardDuty
- B. AWS Config
- **C. AWS Secrets Manager**
- D. AWS Key Management Service (AWS KMS)

Answer: C

Explanation:
Explanation
AWS Secrets Manager is a service that helps you protect secrets needed to access your applications, services, and IT resources. You can use AWS Secrets Manager to store, rotate, and retrieve database credentials, API keys, and other secrets throughout their lifecycle. AWS Secrets Manager eliminates the need to hardcode sensitive information in plain text, and reduces the risk of unauthorized access or leakage. AWS Secrets Manager also integrates with other AWS services, such as AWS Lambda, Amazon RDS, and AWS CloudFormation, to simplify the management of secrets across your environment5

NEW QUESTION # 834

A user wants to identify any security group that is allowing unrestricted incoming SSH traffic.
Which AWS service can be used to accomplish this goal?

- **A. AWS Trusted Advisor**
- B. Amazon Macie
- C. Amazon Cognito
- D. AWS Shield

Answer: A

Explanation:
The correct answer to the question is D because AWS Trusted Advisor is an AWS service that can be used to accomplish the goal of identifying any security group that is allowing unrestricted incoming SSH traffic.
AWS Trusted Advisor is a service that provides customers with recommendations that help them follow AWS best practices. Trusted Advisor evaluates the customer's AWS environment and identifies ways to optimize their AWS infrastructure, improve security and performance, reduce costs, and monitor service quotas. One of the checks that Trusted Advisor performs is the Security Groups - Specific Ports Unrestricted check, which flags security groups that allow unrestricted access to specific ports, such as port 22 for SSH. Customers can use this check to review and modify their security group rules to restrict SSH access to only authorized sources. Reference: Security Groups - Specific Ports Unrestricted

NEW QUESTION # 835

......
