

# NCP-NS Test Braindumps | Latest NCP-NS Test Labs

Candidates can reach out to the DumpsFree support staff anytime. The DumpsFree help desk is the place to go if you have any questions or problems. Time management is crucial to passing the Nutanix NCP-NS exam. Candidates may prepare for the Nutanix NCP-NS Exam with the help of DumpsFree desktop-based NCP-NS practice exam software, web-based NCP-NS practice tests and Nutanix NCP-NS pdf questions.

## Nutanix NCP-NS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Configure Flow Network Security: Covers analyzing application traffic flows, creating and configuring isolation, application, and identity based security policies, and managing policy lifecycle modes in Flow Network Security.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Configure Flow Virtual Networking: Covers creating and managing VPCs, overlay networks, external connectivity options, BGP peering, load balancing, and policy based routing within Nutanix Flow Virtual Networking.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Troubleshoot Flow Virtual Networking: Covers diagnosing and resolving connectivity failures, BGP issues, gateway health problems, and interpreting alerts and logs related to virtual networking components.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Deploy and Upgrade a Flow Environment: Covers preparing clusters for Flow Network Security and Virtual Networking, managing upgrade paths and dependencies, configuring virtual switches and MTU, and administering user roles and RBAC permissions.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Troubleshoot Flow Network Security: Covers identifying policy-related traffic issues, analyzing security hit logs and audit logs, and troubleshooting identity based policy failures tied to Active Directory group mapping.</li></ul>

## Latest NCP-NS Test Labs | NCP-NS Testing Center

When dealing with any kind of exams, the most important thing is to find a scientific way to review effectively. Our NCP-NS practice materials compiled by the most professional experts. Till now, we have over tens of thousands of customers around the world supporting our NCP-NS exam torrent. If you are unfamiliar with our NCP-NS Study Materials, please download the free demos for your reference. To some unlearned exam candidates, you can master necessities by our NCP-NS practice materials quickly So our materials are elemental materials you cannot miss.

## Nutanix Certified Professional Network & Security v6.10 Sample Questions

## (Q24-Q29):

### NEW QUESTION # 24

An administrator needs to allow communication between several VPCs without requiring to configure routes in the physical network or using a dynamic routing protocol like BGP.

How should the administrator satisfy this requirement?

- A. Connect the VPCs to a single Transit VPC.
- B. Configure a VPN network between each of the VPCs.
- C. Peer the VPCs directly.
- D. Merge all the subnets into a single VPC.

**Answer: A**

### NEW QUESTION # 25

Refer to the exhibit.  
Refer to the exhibit.

Network Function VMs	Power State	Cluster	Inbound/Outbound NICs	High Availability Role
SE - PA-VM Firewall-2	On	DM3-POC041	Inbound: 50:6b:8d:7b:09:0e Outbound: 50:6b:8d:76:e4:f9	Active
SE - PA-VM Firewall-1	On	DM3-POC041	Inbound: 50:6b:8d:5e:8a:6b Outbound: 50:6b:8d:40:11:31	Standby

An organization uses an FNS-NG Service Chain to steer application traffic through a pair of third-party firewall Network Function VMs operating in Active/Standby mode. Users suddenly report that all application access is blocked. The administrator reviews Prism Central -> Network & Security -> Network Functions, where the summary shown in the exhibit is displayed. Additional information: Alert: "Network Function 'PANW Service Insertion' virtual NIC pair(s) are unhealthy." Both firewall VMs are powered on and reachable. The security policy using the service chain has not been changed. Based on the exhibit and findings, what is the most likely cause of the traffic outage?

- A. The inbound vNIC on SE-PA-VM Firewall-2 failed, preventing redirected packets from reaching the firewall.
- B. The service-chain health check failed to reroute sessions to the healthy firewall.
- C. Firewall policy synchronization was not configured when the standby firewall became active.
- D. One of the Network Function vNIC pairs lost dataplane connectivity, interrupting traffic until health is stabilized.

**Answer: D**

### NEW QUESTION # 26

Which policy is used to isolate a compromised VM in the most efficient way possible?

- A. Shared Service Policy
- B. Quarantine Policy
- C. Application Policy
- D. Isolation Policy

**Answer: B**

### NEW QUESTION # 27

An administrator uses Nutanix Flow to secure a three-tier application (Web, App, and Database tiers).

After observing the traffic, they find that:

The Web tier communicates with the App tier over HTTP (port 80)

The App tier communicates with the Database tier over TCP port 1433

The Database tier does not initiate connections

The Web tier receives inbound HTTP traffic from the corporate DMZ on port 8080. No other traffic should be allowed. What should the administrator do to document and then securely apply these flows in Nutanix Flow?

- A. Disable traffic-flow discovery and configure all policies manually.
- B. Manually create isolation policies between all VMs in the environment.
- **C. Use Flow Network Visualization to capture observed flows and convert them into microsegmentation security policies.**
- D. Add all VMs to a single security policy to simplify communication.

**Answer: C**

#### NEW QUESTION # 28

An administrator is using Flow Network Security to secure a 3-tier application and has already created and assigned the categories.

The administrator does not have the details of the rules that need to be allowed to secure the application.

How can the administrator use Flow Network Security to monitor the traffic and help with the policy creation without impacting the applications connectivity?

- A. Create the Policy in Save mode, review the discovered traffic, allow the required traffic flows, and move Policy to Enforce mode.
- B. Use service insertion to redirect traffic through a monitoring service to capture the application traffic and create the Flow Network Security policy based on data captured in monitoring service.
- C. Redirect the traffic to a Syslog server and monitor the traffic on the syslog server and then create the Flow Network Security policy based on monitored data in syslog server.
- **D. Create the Policy in Monitor mode, review the discovered traffic, allow the required traffic flows, and move Policy to Enforce mode.**

**Answer: D**

#### NEW QUESTION # 29

.....

One of the top features of Nutanix NCP-NS exam dumps is the NCP-NS exam passing a money-back guarantee. In other words, your investments with DumpsFree Links to an external site. Nutanix Certified Professional Network & Security v6.10 exam questions are secured with the 100 Nutanix Certified Professional Network & Security v6.10 NCP-NS Exam passing a money-back guarantee. Due to any reason, if you did not succeed in the final NCP-NS exam despite using DumpsFree NCP-NS pdf questions and practice tests, we will return your whole payment without any deduction.
