Our company sets up the service tenet that customers are our gods and the strict standards for the quality of our PL-200 study materials and the employee's working abilities and attitudes toward work.

## Microsoft Power Platform Functional Consultant Sample Questions (Q181-Q186):

### NEW QUESTION # 181

You attempt to deactivate several currencies in a Microsoft Dataverse environment.

You are not able to deactivate one of the currencies.  
You need to determine why you cannot deactivate the currency.  
What is the reason?

- A. The currency is the base currency.
- B. The currency is used by an active business process.
- C. You are not the currency record owner.
- D. The currency is used by another record.

**Answer: A**

Explanation:

The base currency cannot be deactivated.

Incorrect:

Not D: You can't delete currencies that are in use by other records, but you can deactivate them.

Deactivating currency records doesn't remove the currency information stored in existing records, such as opportunities or orders.

However, you won't be able to select the deactivated currency for new transactions.

<https://docs.microsoft.com/en-us/power-platform/admin/manage-transactions-with-multiple-currencies>

## NEW QUESTION # 182

Hotspot Question

You are designing a canvas app that connects to Common Data Service.

You need to configure the app to meet the requirements and ensure that the canvas app is available offline.

What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

## NEW QUESTION # 183

A company deploys several model-driven apps. The company uses shared devices in their warehouse. The devices are always powered on. Users log on to the devices and then launch the apps to perform actions.

Unauthorized users recently uploaded several files after another user failed to log out of a device. The company needs to prevent these incidents from occurring in the future.

You need to configure the solution to prevent the reported security incidents.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Set a timeout in the Power Platform admin center.

To enforce users to reauthenticate after a pre-determined period of time, admins can set a session timeout for their individual environments. Users can only remain signed in the application for the duration of session. The application signs out the user when the session expires. Users need to sign in with their credentials to return to customer engagement apps.

Note: Configure session timeout

\* In the Power Platform admin center, select an environment.

\* Select Settings > Product > Privacy + Security.

\* Set Session Expiration and Inactivity timeout. These settings apply to all users.

Incorrect:

Configure inactivity timeout

- \* In the Power Platform admin center, select an environment.
- \* Select Settings > Product > Privacy + Security.
- \* Set Session Expiration and Inactivity timeout. These settings apply to all users.

Box 2: Enter the restricted file types in the SharePoint admin center.

To block uploading of specific file types

- \* Go to the Settings page of the new SharePoint admin center,
- \* Select Sync.

Graphical user interface, text, application Description automatically generated

- \* Select the Block upload of specific file types check box.
- \* Enter the file name extensions you want to block, for example: exe or mp3.
- \* Select Save.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/user-session-management>

<https://docs.microsoft.com/en-us/onedrive/block-file-types>

### NEW QUESTION # 184

You are a Dynamics 365 Customer Service administrator.

Users report that the main form does not display data from other entities or allow them to edit data from other entities.

You need to embed information from other entities in the form and allow users to edit the data.

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

Box 1: Add a quick create form

With quick create forms, your app can have a streamlined data entry experience with full support for logic defined by form scripts and business rules.

Box 2: Add a quick view

A quick view form can be added to another form as a quick view control. It provides a template to view information about a related entity record within a form for another entity record. This means your app users do not need to navigate to a different record to see the information needed to do their work.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-quick-create-forms>

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/create-edit-quick-view>

### NEW QUESTION # 185

You are examining several processes to determine if you can automate the processes by using Power Automate.

The processes must run without human intervention when possible.

You need to determine which flow type should be used for each process.

Which flow type should you use? To answer, drag the appropriate processes to the correct flow types. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Text Description automatically generated

Box 1: Attended desktop flow

Desktop flows are used to automate tasks on the Web or the desktop.

To run an attended desktop flow, you need to have an active Windows user session that matches the name of the user configured for your connection.

Note: Web applications are critical components of most organizations, and they are commonly used to access data from servers. Most CRM and ERP platforms run through web browsers, while the most popular business productivity tools are web services.

Web applications are unquestionably an integral part of the technological infrastructure of most companies.

To provide automation solutions for these applications, Power Automate Desktop supports all major browsers through its web automation actions.

Box 2: Unattended desktop flow.

Unattended desktop flows are best for applications that do not need human supervision.
