

NCP-EUC Exam Registration & Latest NCP-EUC Exam Book

NCP-EUC End User Computing Certification Details	
Exam Code	NCP-EUC
Full Exam Name	Nutanix Certified Professional - End User Computing
No. of Questions	75
Online Practice Exam	Refer the Link in the Description
Sample Questions	Refer the Link in the Description
Passing Score	3000/1000-6000
Time Limit	120 minutes
Exam Fees	\$199 USD

Become successful with VMEexam.com

2026 Latest PDFDumps NCP-EUC PDF Dumps and NCP-EUC Exam Engine Free Share: <https://drive.google.com/open?id=1MJM-os0c-6hBWKZiwlLhHS5EGq0PaIdG>

After a short time's studying and practicing with our NCP-EUC exam questions, you will easily pass the examination. We can claim that if you study with our NCP-EUC learning quiz for 20 to 30 hours, then you will be confident to attend the exam. God helps those who help themselves. If you choose our NCP-EUC Study Materials, you will find God just by your side. The only thing you have to do is just to make your choice and study. Isn't it very easy? So know more about our NCP-EUC practice guide right now!

Our brand has marched into the international market and many overseas clients purchase our NCP-EUC exam dump online. As the saying goes, Rome is not build in a day. The achievements we get hinge on the constant improvement on the quality of our NCP-EUC latest study question and the belief we hold that we should provide the best service for the clients. The great efforts we devote to the Nutanix exam dump and the experiences we accumulate for decades are incalculable. All of these lead to our success of NCP-EUC learning file and high prestige.

>> NCP-EUC Exam Registration <<

Latest NCP-EUC Exam Book | 100% NCP-EUC Correct Answers

The system of our NCP-EUC study materials is great. It is developed and maintained by our company's professional personnel and is dedicated to provide the first-tier service to the clients. Our system updates the NCP-EUC study materials periodically and frequently to provide more learning resources and responds to the clients' concerns promptly. Our system will supplement New NCP-EUC Study Materials and functions according to the clients' requirements and surveys the clients' satisfaction degrees about our NCP-EUC study materials.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q148-Q153):

NEW QUESTION # 148

An administrator wants to create Multi-PC Smart DR policies between file servers. What is one of the requirements to achieve this?

- A. Both Prism Central (PC) servers must have at least 64GB of RAM.
- B. Both Prism Central clusters must be in an availability zone (AZ) pair.**
- C. Both Prism Central (PC) clusters must support Near Sync.
- D. Must be less than 5 milliseconds round trip latency between the Prism Central (PC) clusters.

Answer: B

Explanation:

Nutanix Files Smart DR allows administrators to configure replication policies between file servers managed by different Prism

Central (PC) instances (Multi-PC).⁴ According to the Nutanix Files Guide and Disaster Recovery documentation, a strict prerequisite for this configuration is that both Prism Central clusters must be in an availability zone (AZ) pair.⁵ This pairing establishes the trust and replication channel required for the Files Manager to coordinate the disaster recovery policies between the source and target file servers across the different PC domains.

NEW QUESTION # 149

An administrator has been given a new support role for a group of 1000 users, which are all running Windows 10 Linked Clone virtual desktops,

The administrator learns quickly that the environment has been undersized with constant complaints from the user community around running out of storage. The administrator further discovers that the environment is memory constrained.

Which feature should the administrator enable to help relieve the capacity issue?

- A. Deduplication
- B. Auto-tiering
- C. Erasure Coding
- D. Compression

Answer: A

Explanation:

Deduplication is a process that eliminates duplicate data blocks and reduces the amount of storage space required for virtual desktops. Deduplication can be enabled at both cluster level and container level on Nutanix.

Deduplication can also work with VCAI (View Composer Array Integration), which is a feature that uses Nutanix native NFS snapshot technology to clone VMs². VCAI can improve performance and reduce storage consumption for linked-clone desktop pools.

Another feature that can help with capacity issue is Shadow Clones, which is a distributed caching mechanism that allows multiple VMs to read from a single vDisk copy stored locally on each node³. Shadow Clones can reduce network traffic and improve boot times for virtual desktops.

NEW QUESTION # 150

After receiving multiple complaints from VMware Horizon-based virtual desktop users about their slower logon and application load times, an administrator performed troubleshooting on the issue to optimize the environment.

The following discoveries were made on the Nutanix cluster:

- A. 75% average memory utilization
- B. 4% average CPU Ready time
- C. Host power Policy set to High Performance
- D. Failed to create Native clone errors.

Answer: D

Explanation:

one of the possible causes of slower logon and application load times for VMware Horizon-based virtual desktop users is Failed to create Native clone errors. This error occurs when there is a problem with cloning virtual machines using Nutanix Native Clones technology. To troubleshoot this issue, you can check the following:

The Nutanix cluster has enough free space to create clones

The Nutanix cluster has enough CPU and memory resources to handle cloning operations The Nutanix cluster is running a compatible version of AOS and AHV with VMware Horizon The VMware Horizon environment is configured correctly to use Nutanix Native Clones The VMware Horizon agent is installed and updated on the master image

NEW QUESTION # 151

An administrator plans to deploy a VMware Horizon Solution on AHV. The administrator used the cluster command to verify if

Shadow Clones are enabled in the AHV environment. This command shows the following output:

```
$ ncli cluster info
Cluster Id          : 0XXX
Cluster Uuid       : 0XXX
Cluster Name       : WINTERFELL
Cluster Version    : 6.5
Cluster Full Version : e17.3-release-fraser-6.5-stable-clcb24df40aaa4aa548f84003a27af28cc058e58
External IP address : XXX.XXX.XXX.XXX
Node Count         : 3
Block Count        : 3
Shadow Clones Status : Disabled
Has Self Encrypting Disk : no
Cluster Masquerading I... :
Cluster Masquerading PORT :
...

```

Which action should the administrator take to enable Shadow Clones?

- A. Connect to Prism Central
- B. Execute the `acluster edit-prams enable-shadow-clones=true` command.
- C. Execute the `cluster enable -cluster_cluster_uid 0xxx - show_clones=true` command.
- D. Connect to the AHV Host by SSH.

Answer: C

Explanation:

an action that the administrator should take to enable Shadow Clones for a VMWare Horizon Solution on AHV is Connect to Prism Central and execute the `cluster enable -cluster_cluster_uid 0xxx - show_clones=true` command. Shadow Clones are a feature that helps decrease read latency by creating local copies of frequently accessed data blocks on each host. To enable Shadow Clones, the administrator needs to connect to Prism Central and run a cluster command with the appropriate parameters.

NEW QUESTION # 152

An administrator has an ESXi-based Nutanix cluster exclusively using T4-2Q profile types. When attempting to power on virtual desktops with a T4-4Q profile, the operation fails.

The administrator has noted that the physical GPUs across the cluster show low usage with only one 2Q desktop per GPU per host, with plenty of spare frame buffer memory available. The administrator wants to maximize the number of users on a single card and allow 4Q and 2Q profiles to co-exist. The administrator acknowledges the lower performance that may occur.

How can the administrator accomplish this task?

- A. Add more RAM to the hosts.
- B. Change to Breadth mode.
- C. Change to Depth Mode.
- D. Remove some physical GPUs.

Answer: C

Explanation:

This issue is caused by the NVIDIA vGPU scheduling policy. On many NVIDIA GRID/vGPU architectures (prior to latest MIG capabilities), you cannot mix different vGPU profile sizes (e.g., 2Q and 4Q) on the same physical GPU.

* Current State (Breadth Mode): The scheduler is likely distributing the "2Q" VMs evenly across all available GPUs. This means every physical GPU has at least one "2Q" profile active, "tainting" the GPU so it can only accept other "2Q" VMs.

* The Fix (Depth Mode): By changing the allocation policy to Depth-First, the scheduler will fill up the first physical GPU with "2Q" VMs until it is full before moving to the next. This consolidates the "2Q" workloads onto fewer cards, leaving other physical GPUs completely empty. These empty GPUs can then accept the "4Q" profile type, allowing both profiles to co-exist on the same host (though on different physical cards).

NEW QUESTION # 153

.....

Our customers comment that the NCP-EUC latest dumps pdf covers most questions of actual test. Most questions in our NCP-EUC dumps valid will appear in the real test because Nutanix exam prep is created based on the formal test. If you practice the

NCP-EUC Test Questions and remember the key points of study guide, the rate of you pass will reach to 95%.
