## Fortinet NSE 5 - FortiSIEM 6.3 Sample Questions (Q16-Q21):

### NEW QUESTION # 16

A FortiSIEM administrator wants to collect both SIEM event logs and performance and availability metrics (PAM) events from a Microsoft Windows server

Which protocol should the administrator select in the AccessProtocol drop-down list so that FortiSIEM will collect both SIEM and PAM events?

- A. LDAPS
- B. LDAP start TLS
- C. WMI
- D. TELNET

**Answer: C**

### NEW QUESTION # 17

Which FortiSIEM components are capable of performing device discovery?

- A. FortiSIEM Linux agent
- B. FortiSIEM Windows agent
- C. Collector
- D. Worker

**Answer: D**

Explanation:

\* Device Discovery in FortiSIEM: Device discovery is the process by which FortiSIEM identifies and adds devices to its management scope.

\* Role of Collectors: Collectors are responsible for gathering data from network devices, including discovering new devices in the network.

Functionality: Collectors use protocols such as SNMP, WMI, and others to discover devices and gather their details.

\* Capability: While agents (Windows and Linux) primarily gather data from their host systems, the collectors actively discover devices across the network.

\* Reference: FortiSIEM 6.3 User Guide, Device Discovery section, which details the role of collectors in discovering network devices.

### NEW QUESTION # 18

Which database is used for storing anomaly data, that is calculated for different parameters, such as traffic and device resource usage running averages, and standard deviation values?

- A. SVN DB
- B. CMDB
- C. Event DB
- D. Profile DB

**Answer: D**

Explanation:

Anomaly Data Storage: Anomaly data, including running averages and standard deviation values for different parameters such as traffic and device resource usage, is stored in a specific database.

Profile DB: The Profile DB is used to store this type of anomaly data.

\* Function: It maintains statistical profiles and baselines for monitored parameters, which are used to detect anomalies and deviations from normal behavior.

Significance: Storing anomaly data in the Profile DB allows FortiSIEM to perform advanced analytics and alerting based on deviations from established baselines.

References: FortiSIEM 6.3 User Guide, Database Architecture section, which describes the purpose and contents of the Profile DB in storing anomaly and baseline data.

### NEW QUESTION # 19

What does the Frequency field determine on a rule?

- A. How often the rule will evaluate the subpattern.
- B. How often the rule will take a clear action.
- **C. How often the rule will trigger for the same condition.**
- D. How often the rule will trigger.

**Answer: C**

Explanation:

Rule Evaluation in FortiSIEM: Rules in FortiSIEM are evaluated periodically to check if the defined conditions or subpatterns are met.

Frequency Field: The Frequency field in a rule determines the interval at which the rule's subpattern will be evaluated.

\* Evaluation Interval: This defines how often the system will check the incoming events against the rule's subpattern to determine if an incident should be triggered.

\* Impact on Performance: Setting an appropriate frequency is crucial to balance between timely detection of incidents and system performance.

Examples:

\* If the Frequency is set to 5 minutes, the rule will evaluate the subpattern every 5 minutes.

\* This means that every 5 minutes, the system will check if the conditions defined in the subpattern are met by the incoming events.

References: FortiSIEM 6.3 User Guide, Rules and Incidents section, which explains the Frequency field and how it impacts the evaluation of subpatterns in rules.

### NEW QUESTION # 20

In FortiSIEM enterprise licensing mode, if the link between the collector and data center FortiSIEM cluster is down what happens?

- **A. The collector buffers events**
- B. The collector continues performance collection of devices, but stops receiving syslog
- C. The collector drops incoming events like syslog, but stops performance collection
- D. The collector processes stop, and events are dropped

**Answer: A**
