Salesforce Certified B2C Commerce Architect Sample Questions (Q58-Q63):

NEW QUESTION # 58

The client provided these business requirements:

- * The B2C Commerce platform will integrate with the client's Order Management System (OMS).
- * The OMS supports Integration us-no legacy RPC style SOAP services.
- * The OMS is hosted on client s infrastructure.

What is the right cartridge folder to place the WSDL provided for the OMS service?

- A. /cartridge
- B. /cartridge/services
- C. /cartridge/webreferences2
- D. /cartridge/webreferences

Answer: D

NEW QUESTION # 59

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases,Json file below will accomplish this task?

- A)
- B)
- C)
- D)

- A. Option D
- B. Option A
- C. Option B
- D. Option C

Answer: A

NEW QUESTION # 60

An Order Management System (OMS) handles orders from multiple brandspecific sites, as part of the processing, the OMS sends the processing detail to be added at notes to the orders in B2C Commerce. These processing details are captured temporarily in custom objects, and are later processed by a batch Job that:

* Processes the custom object to extract the orderid and note data.

* Tries to load the order.

* If the order is not found, it deletes the custom object and moves on.

* If the order is found, it updates notes In the Order, upon successful update of this order, it deletes the custom object.

There is an Issue reported that the job is constantly failing and custom objects are growing in number. On investigating the production look the message below is being logged on each failure:

What are three solution The Architect can take to fix this issue without losing meaningful data?

Choose 3 answers

- A. Take the backup of the custom object and delete the custom object to ensure on the next job run the custom objects are getting processed.
- B. Take the backup of the Order as XML and delete the Order to ensure on the next job run, the custom objects are getting processed.
- C. Using BM site import/export, softenthe<quota id="object.orderPo.relation,notes"> <custom- action>warn<custom- action> </quotes>to make sure that neither order notes are lost and custom object is processed.
- D. Take the backup of the Order as XML and delete the notes from Order to ensure on the next jobrun the custom objects are getting processed.
- E. Engage B2C Commerce Support Team to soften the quota limit for "object.OrderPO.relation.notes"

Answer: A,D,E

Explanation:

When facing an issue with a growing number of custom objects due to the exceeded quota limit for order notes, effective solutions include:

* Option C (Take the backup of the custom object and delete the custom object): This ensures that the data is preserved while freeing up space for new processes and reducing the load, allowing the job to continue running without the impediment of quota limits.

* Option D (Engage B2C Commerce Support Team to soften the quota limit for 'object.OrderPO.relation.notes'): Increasing the quota limit can resolve the root cause of the issue by accommodating the actual business needs without compromising the integrity of order processing and note addition.

* Option E (Take the backup of the Order as XML and delete the notes from Order): This allows the job to process the custom

objects as intended in subsequent runs by clearing out space while ensuring the order data remains intact for business needs. These steps address the quota limit issue effectively without losing valuable order or note data, ensuring continuity and integrity of business operations.

NEW QUESTION # 61

A company uses Service Cloud and B2C Commerce and now wants to enable the 'Order on Behalf' functionality on its storefront. The customers using the storefront are Person and Household accounts.

Which three design and architecture considerations should a Solution Architect follow to ensure that the 'Order on Behalf' functionality works well for all the designated storefront customers?

Choose 3 answers

- A. Verify that agents are Service Cloud and B2C Commerce users with Order on Behalf rights.
- B. Verify that the permissions used are Login_On_Behalf, Login_Agent, and Create_Order_On_Behalf_Of business manager functional permissions.
- C. The REST calls between B2C Commerce and Service Cloud do not count towards API governor limits.
- D. The Order on Behalf feature in the Service to B2C Commerce Connector only supports person accounts as a customer model by default.
- E. Default user is required for anonymous storefront shoppers.

Answer: A,C,D

NEW QUESTION # 62

A company needs to have specific fields encrypted in the user interface on the contact record in Service Cloud as well as on some fields in data extensions that exist only in the Marketing Cloud. The merchant believes that Salesforce Shield Encryption is a suitable solution.

Which two considerations are relevant for the merchant when determining an appropriate solution?

Choose 2 answers

- A. Shield encryption can be done on any standard or custom field on all field types, but cannot be set to encrypt those fields in Marketing Cloud.
- B. With Shield, encrypted fields are not visible to the user, but there are no other feature impacts.
- C. With Shield, encrypted fields cannot be used to filter or sort in Process Builder and Flow Builder.
- D. Field-Level Encryption is also required on Marketing Cloud to encrypt the custom fields.

Answer: A,C
