Microsoft PL-400 certification test is really hard examination. But it doesn't mean that you cannot get high marks and pass the exam easily. What is the shortcut for your exam? Do you want to know the test taking skills? Now, I would like to tell you making use of PassTorrent PL-400 Questions and answers can help you get the certificate.

## Microsoft Power Platform Developer Sample Questions (Q381-Q386):

### NEW QUESTION # 381

User1 and User2 use a form named F1 to enter account dat

a. Both users have the same security role, SR1, in the same business unit.

User1 has a business rule to make the main phone mandatory if the relationship type is Reseller. User2 must occasionally create records of the Reseller type without having the reseller's phone number and is blocked by User1's business rule.

You need to ensure that User2 can enter reseller data into the system.

Which three actions should perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct order you select.

### Answer:

Explanation:

- 1 - Open form F1 and save it as a form named F2.
- 2 - Remove the business role from form F2.
- 3 - Create a business rule for form F2 to make the phone number..

### NEW QUESTION # 382

An organization has a Dynamics 365 Sales environment.

You need to create a Power Apps component.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

#### Answer:

Explanation:

□ Explanation

□ Step 1: Run `pac pcf init -namespace ..`

This is the first command which creates basic folder structure of PCF control project.

Run the following command to create the control. The format of the control is:

```
pac pcf init -namespace <specify your namespace here> -name <put component name here> -template <component type>
```

□ Step 2: Run the `npm install` command

Install Dependencies

Once 'init' sets up the basic folder, as a next step install all the PCF control dependencies using 'npm install' command.

Example:

□ Now at this point, there is nothing we have actually created. However, the solution created contains sample PCF control code.

Step 3: Run the following `npm run build` command

Build PCF Component.

Once you implement the PCF component, build the code for any syntax errors.

Syntax:

```
npm run build
```

### NEW QUESTION # 383

You need to configure the custom connector to incorporate the environment name and DataId in the Web API URL. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

#### Answer:

Explanation:

□ 1 - Create a policy template that uses the Set host URL...

□ 2 - Set the operation to enrich.

□ 3 - Set the subdomain of URL template to: dataservice..

□ 4 - Set the path of the URL template path to: enrich..

### NEW QUESTION # 384

You are creating a canvas app to retrieve user sign in information from Microsoft Entra ID when someone searches for information about an end user.

You create an Azure Function to retrieve the required information by using JSON.

You need to ensure that the application functions correctly.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a custom connector by using the Azure Function API
- B. Use Azure Service Bus.
- C. Create an API definition for the Azure Function.
- D. Create a Power Automate flow to import data.

- E. Use app designer in the Power Platform admin center.

**Answer: A,C**

### NEW QUESTION # 385

A company has a Common Data Service (CDS) environment.

All accounts in the system with a relationship type of Customer set must have an account number. A plug-in has been developed.

When a Customer is updated with a relationship type, the plug-in sets the account number if not provided by the user.

You need to register the plug-in.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

□ Explanation

Timeline Description automatically generated with medium confidence

□ Step 1: In the Plug-in Registration tool, select Register New Assembly.

You use the Plug-in Registration tool (PRT) to register your plug-in assemblies and steps.

Registering an assembly is the process of uploading the assembly to the Dataverse database.

Step 2: In the Plug-in Registration tool, Select Register New Step,...PreOperation PreOperation occurs before the main system operation and within the database transaction.

If you want to change any values for an entity included in the message, you should do it here.

Step 3: In the Plug-in Registration tool, Select Register New Image, change the Image type to be a PreImage, and..

If your plug-in step is registered in the PreValidation or PreOperation stages of the execution pipeline, you could use the Organization service to retrieve the current value of the property, but this is not a good practice for performance. A better practice is to define a pre-entity image with your plug-in step registration.
