### Nutanix Certified Associate v6.10 Sample Questions (Q27-Q32):

#### NEW QUESTION # 27

An administrator needs to license a new AOS-based cluster with no add-on packages via Nutanix Cloud Platform Package Licensing.

What license type would fulfill this requirement?

- A. Nutanix Cloud Manager (NCM)
- B. Nutanix Database Service (NDB)
- C. Nutanix Unified Storage (NUS)
- D. Nutanix Cloud Infrastructure (NCI)

## Answer: D

Explanation:

To license a new AOS-based cluster with no add-on packages, the appropriate license type is Nutanix Cloud Infrastructure (NCI). The NCI license provides the fundamental capabilities required for Nutanix clusters, including:

- \* Storage and data management.
- \* Core virtualization features.
- \* Compute resources for workloads.

NCI is designed for organizations that need the essential features of the Nutanix platform without additional add-ons such as database services (NDB) or advanced storage options (NUS).

Other options:

- \* A. Nutanix Cloud Manager (NCM): Focuses on management capabilities for multi-cloud and operational tasks, not core infrastructure licensing.
- \* C. Nutanix Unified Storage (NUS): Specifically provides unified file and object storage capabilities, not relevant for a base AOS cluster.
- \* D. Nutanix Database Service (NDB): A dedicated licensing tier for database management features.

## NEW QUESTION # 28

What is true when adding a storage-only node to the cluster?

- A. Nutanix Objects must be deployed.
- B. Nutanix Files must be deployed.
- **C. It must have the same hypervisor as the other nodes in the cluster.**
- D. It can have a different hypervisor than the other nodes in the cluster.

## Answer: C

Explanation:

The correct answer is C. It must have the same hypervisor as the other nodes in the cluster.

When adding a storage-only (SO) node to a Nutanix cluster:

- \* It must run the same hypervisor as the existing nodes.
- \* The SO node does not host VMs but participates in the storage layer to increase capacity and performance.
- \* Nutanix currently does not support mixed hypervisors (e.g., combining AHV with ESXi) within the same cluster, even for storage-only nodes.

Clarifications:

- \* A & B: Neither Nutanix Files nor Objects are required for adding storage-only nodes.
- \* D: Cross-hypervisor configuration is unsupported at the cluster level.

\* Excerpt: "All nodes in a cluster, including storage-only nodes, must run the same hypervisor type."

## NEW QUESTION # 29

At what time does LCM auto-inventory run by default?

- A. 1:00am
- B. 2:00am
- C. 4:00am
- **D. 3:00am**

## Answer: D

## NEW QUESTION # 30

Which storage protocol is supported for a datastore when using ESXi as the hypervisor within a Nutanix cluster?

- A. NFS
- B. iSCSI
- C. SMB
- D. LVM

**Answer: A**

Explanation:

When using ESXi as the hypervisor in a Nutanix cluster, the supported storage protocol for a datastore is NFS (Network File System). Nutanix exposes its distributed storage to ESXi hosts using NFS for VM storage.

This protocol is simple to configure and provides high performance and reliability through Nutanix's data services.

Other options:

\* iSCSI: Not typically used for ESXi datastores but can be utilized for specific use cases like external storage connectivity.

\* SMB: Not supported for ESXi datastores.

\* LVM: Logical Volume Management is not used in this context.

**NEW QUESTION # 31**

Which storage protocol is used by Nutanix Distributed Storage Fabric (DSF) to provide access to an ESXi hypervisor?

- A. NFS
- B. iSCSI
- C. SMB
- D. LVM

**Answer: B**

Explanation:

Nutanix Distributed Storage Fabric (DSF) provides storage access to an ESXi hypervisor using the NFS (Network File System) protocol. DSF abstracts the underlying storage hardware and exposes storage as an NFS datastore to ESXi hosts. This integration enables high performance, data protection, and scalability while simplifying storage management.

Other options:

\* LVM: Not used in Nutanix storage.

\* iSCSI: Used for specific use cases, not the default protocol for ESXi.

\* SMB: Not supported for ESXi environments.
