인기자격증 C-C4H450-04인증덤프 샘플문제 시험덤프 최신자료

ITDumpsKR의 엘리트는 다년간 IT업계에 종사한 노하우로 높은 적중율을 자랑하는 SAP C-C4H450-04덤프를 연구제작하였습니다. 한국어 온라인서비스가 가능하기에 SAP C-C4H450-04덤프에 관하여 궁금한 점이 있으신 분은 구매전 문의하시면 됩니다. SAP C-C4H450-04덤프로 시험에서 좋은 성적 받고 자격증 취득하시길 바랍니다.

최신 SAP Certified Integration Associate C-C4H450-04 무료샘플문제 (Q54-Q59):

질문 # 54

How can you determine if a field in the message mapping in SAP Cloud Platform Integration is an extension field?

- A. By the WSDL naming convention
- B. By the mapping functions
- C. By the used namespace
- D. By the mapping icon

정답:C

질문 # 55

Which transaction codes do you use to register and activate the IDoc service on SAP ERP?

- A. SICF and IDoc, respectively
- B. IDoc and RBDMIDOC, respectively
- C. SRTIDOC and SICF, respectively
- D. SICF and RBDMIDOC, respectively

정답:C

질문 # 56

Which of the following business functions are supported by SAP S/4HANA Settlement Management?
Note: There are 3 correct Answers to this question

- A. Calendar-based settlement
- B. Evaluated receipt settlement
- C. Advance payments
- D. Business-volume-related rebates
- E. Accrual conditions

정답:A,B,C

질문 # 57

Which of the following views can be maintained for a material with material type SERV (Service

PassTIP는 우수한 IT인증시험 공부 가이드를 제공하는 전문 사이트인데 업계에서 높은 인지도를 가지고 있습니다. PassTIP에서는 IT인증시험에 대비한 모든 덤프자료를 제공해드립니다. MSSC인증 CLT시험을 준비하고 계시는 분들은 PassTIP의 MSSC인증 CLT덤프로 시험준비를 해보세요. 놀라운 고득점으로 시험패스를 도와드릴것입니다. 시험에서 불합격하면 덤프비용 전액환불을 약속드립니다.

MSSC CLT 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Inventory Control: This section of the exam measures skills of the Certified Logistics Technician and covers the methods used to track stock levels, perform cycle counts, and reconcile inventory discrepancies to maintain high accuracy and prevent shortages or overstock.
주제 2	<ul style="list-style-type: none"> • Product Receiving: This section of the exam measures skills of the Certified Logistics Technician and covers the technical procedures for inspecting, verifying, documenting, and correctly transferring incoming shipments of goods into storage facilities.

주제 3	<ul style="list-style-type: none"> • Safe Material Handling and Equipment Operation: This section of the exam measures skills of the Certified Logistics Associate and covers the proper methods for safely moving materials and the correct operation of common handling equipment like forklifts and pallet jacks.
주제 4	<ul style="list-style-type: none"> • The 4.0 Technologies: This section of the exam measures skills of the Certified Logistics Associate and covers emerging technologies like automation, the Internet of Things (IoT), and data analytics that are changing how modern supply chains operate in the current industrial revolution.
주제 5	<ul style="list-style-type: none"> • Packaging and Shipping: This section of the exam measures skills of the Certified Logistics Technician and covers the necessary techniques for securing goods safely for transit, selecting the right containers, and correctly labeling them for outbound transportation.
주제 6	<ul style="list-style-type: none"> • Safety Principles: This section of the exam measures skills of the Certified Logistics Associate and covers essential workplace safety guidelines and procedures needed to maintain a secure working environment and prevent common injuries.
주제 7	<ul style="list-style-type: none"> • Dispatch and Tracking Operations: This section of the exam measures skills of the Certified Logistics Technician and covers the procedures for organizing shipments, coordinating carriers, and monitoring the progress of goods in transit until they reach their destination.
주제 8	<ul style="list-style-type: none"> • Safe Handling of Hazardous Materials: This section of the exam measures skills of the Certified Logistics Technician and covers the specific regulations, documentation, and protective measures required for storing and moving dangerous goods safely.
주제 9	<ul style="list-style-type: none"> • Teamwork and Good Workplace Conduct to Solve Problems: This section of the exam measures skills of the Certified Logistics Associate and covers the professional behaviors and collaborative techniques needed to work effectively with colleagues and resolve common operational issues as a team.
주제 10	<ul style="list-style-type: none"> • Product Storage: This section of the exam measures skills of the Certified Logistics Technician and covers the best practices for organizing, locating, and maintaining products within a warehouse to maximize space efficiency and minimize damage or loss.

MSSC인증CLT시험준비를 하고 계시다면PassTIP에서 출시한MSSC인증CLT덤프를 제일 먼저 추천해드리고 싶습니다. PassTIP제품은 여러분들이 제일 간편한 방법으로 시험에서 고득점을 받을수 있도록 도와드리는 시험동반자입니다. MSSC인증CLT시험패는PassTIP제품으로 고고고!

최신 Certified Logistics Technician CLT 무료샘플문제 (Q72-Q77):

질문 # 72

Which of the following types of pallets offers an ability to handle extremely heavy loads?

- A. corrugated pallets
- B. rubber pallets
- C. wood pallets
- D. metal pallets

정답: D

설명:

Metal pallets, as described in CLT training materials under "Product Storage and Equipment," are designed for durability and high weight-bearing capacity. Constructed from steel or aluminum, these pallets are ideal for heavy industrial goods, automotive parts, and environments where hygiene or heat resistance is critical. They outperform wood pallets in strength and longevity, resisting impact, moisture, and infestation. While wood pallets are cost-effective and common, their load capacity is limited, and corrugated

or rubber pallets are suited for light-duty or specialty applications. The CLT emphasizes matching pallet material to load requirements to maintain safety and efficiency. Using metal pallets also reduces contamination risk and is often required in clean manufacturing or food environments. Proper load distribution and pallet inspection are essential to prevent damage and ensure stable stacking within racking systems.

질문 # 73

Which inventory control method has caused the definition of material handling to evolve away from "moving material" to providing all the "rights"?

- A. LIFO inventory control
- B. ABC inventory control
- C. FIFO inventory control
- **D. Just-In-Time inventory control**

정답: D

설명:

JIT emphasizes delivering the right material, in the right quantity, to the right place, at the right time, with the right quality-minimizing waste and inventory. CLT notes how JIT shifts material handling from simple movement to synchronized flow and point-of-use delivery, often using kanban signals and small, frequent replenishments to support lean operations.

Reference:

질문 # 74

Which of the following is NOT the purpose of JIT?

- **A. easily place inventory into stock**
- B. minimize inventory
- C. respond quickly to changes in demand
- D. produce only the exact number of units needed at a specific time

정답: A

설명:

JIT is designed to synchronize production with demand, reduce WIP and finished-goods inventory, and eliminate non-value-added activities. Its aims include quick response, minimal buffers, and producing to actual need. "Easily place inventory into stock" implies building inventory and storing it-a practice JIT explicitly seeks to avoid.

Reference:

질문 # 75

During the receiving process, after the materials are accepted, all of the following are completed by the material handler EXCEPT

- A. check the materials against the order and Bill of Lading
- **B. clear the staging area for the next appointment**
- C. check quantities
- D. inspect material, if required

정답: B

설명:

The material handler's receiving steps include verifying item/quantity/condition against the PO/ASN and Bill of Lading, documenting exceptions, and preparing accepted items for putaway-often including required quality checks. Housekeeping and staging-area turnover are important, but "clearing the staging area for the next appointment" is a broader dock/operations responsibility and not a receiving verification task per se. CLT receiving key activities emphasize document verification, quantity checks, and inspection as acceptance criteria. By focusing on those tasks, handlers protect inventory accuracy and ensure that only conforming product proceeds to storage. Facility-level 5S/housekeeping policies exist, but the question contrasts core receiving verification with general area readiness; hence "clear the staging area" is the exception in this context.

질문 # 76

Before unloading, it is essential to ensure that the vehicle is safely secured. Which of the following is true when safely securing a truck for unloading?

- A. The trailer should be able to move freely.
- B. The driver applies the parking brake.
- C. The ultimate responsibility of these safety checks lies with the warehouse supervisor.
- **D. The wheels of the truck are chocked.**

정답: D

설명:

Safety in receiving operations is a primary CLT competency. Before dock workers enter a trailer, it must be physically restrained to prevent motion. The correct procedure includes chocking the wheels, applying dock locks or restraints, and verifying dock plates are properly secured. Chocking provides mechanical stabilization, preventing the vehicle from rolling during loading or unloading. While the driver applies the parking brake, the CLT standards emphasize redundancy-mechanical wheel chocks or dock locks are mandatory for safety compliance. The supervisor oversees adherence but is not solely responsible for the act. Allowing trailer movement is a serious safety violation.

질문 # 77
