Nutanix Certified Associate v6.10 Sample Questions (Q76-Q81):

NEW QUESTION # 76

When multiple Alert policies are applied to an entity, which will take precedence?

- A. Policy are applied to all entities of an entity type.
- B. Policy are applied to an entity type in a category.
- C. Policy are applied to an entity type in a cluster.
- **D. Policy are applied to a specific entity type.**

Answer: D

Explanation:

When multiple alert policies are applied to an entity, Nutanix uses a hierarchical approach. Policies applied to an entity type within a category take precedence. For example:

* If a category (e.g., "Production") has policies applied to entities like VMs, and the entity matches that category, the category-specific policy will override general policies.

* This prioritization allows administrators to fine-tune alert policies for specific workloads or environments.

* A. Settings: Correct, as logs are collected and uploaded via the Settings dashboard.

* B. Alerts: Incorrect, as Alerts display system issues but do not provide log collection options.

* C. Health: Incorrect, as the Health dashboard focuses on system checks and cluster status.

Which Nutanix Disaster Recovery component or feature provides the best Recovery Time Objective (RTO)?

- A. Availability Zone
- **B. Metro Availability**
- C. NearSync
- D. Async

Answer: B

Explanation:

Nutanix Metro Availability provides the best Recovery Time Objective (RTO) because it enables synchronous replication between two sites. In the event of a failure at one site, VMs can be instantly restarted on the other site with minimal disruption. This setup ensures zero data loss and near-instantaneous recovery.

* A. Async:Provides high RPO (Recovery Point Objective) but has a longer RTO compared to synchronous replication methods.

* B. Availability Zone:This term refers to a general site setup, not specific to recovery objectives.

* C. Metro Availability:Correct, as it uses synchronous replication for near-zero RTO.

* D. NearSync:Provides better RPO than Async but does not match the RTO of Metro Availability.
