What's more, part of that Prep4sureGuide C_ACDET_2506 dumps now are free: https://drive.google.com/open?id=1QocdBKD2jodmj_M04zUjliSMsopzPgfX

C_ACDET_2506 test questions have so many advantages that basically meet all the requirements of the user. If you have good comments or suggestions during the trial period, you can also give us feedback in a timely manner. Our study materials will give you a benefit as Thanks, we do it all for the benefits of the user. C_ACDET_2506 study materials look forward to your joining in. We have full confidence to ensure that you will have an enjoyable study experience with our C_ACDET_2506 Certification guide, which are designed to arouse your interest and help you pass the exam more easily. You will have a better understanding after reading the following advantages.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

C_ACDET_2506 Valid Test Questions | New C_ACDET_2506 Test Book

Prep4sureGuide SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) questions are regularly updated to ensure it remains aligned with the SAP C_ACDET_2506 latest exam content. With access to the updated dumps, you can be confident that you always get C_ACDET_2506 updated questions that are necessary to succeed in your C_ACDET_2506 Exam and achieve SAP certification. Furthermore, Prep4sureGuide offers 1 year's worth of free C_ACDET_2506 exam questions updates. This valuable inclusion ensures that C_ACDET_2506 candidates have access to the latest C_ACDET_2506 exam dumps, even after their initial purchase.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q36-Q41):

NEW QUESTION # 36
In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. Create a package to migrate translations by ICM.
- B. Translations are included in migrations and are listed as AMLStringResource in the migration UI.
- C. Contact an SAP Deployment lead for customization help.
- D. User with Partner Administrator can configure translation.

Answer: B

Explanation:
In Greenfield deployments,translations for custom field labels, help tips, and validation/error messages are migrated as part of the configuration migration packageand are represented in the migration UI as AMLStringResourceentries. This structured approach ensures all language-specific content is consistently moved alongside configuration settings.
While administrators and deployment leads may support translation tasks, the migration of translation strings is managed automatically via this AML-based mechanism, not through manual reconfiguration or separate ICM packages.
This ensures a seamless multilingual user experience immediately upon go-live without requiring additional manual translation imports.

NEW QUESTION # 37
What system is provided by SAP free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Application Lifecycle Management
- B. SAP Ariba Enablement Workbook
- C. SAP Cloud Project Studio
- D. SAP for Me

Answer: B

Explanation:
TheSAP Ariba Enablement Workbookis an Excel-based project management tool provided free by SAP to assist customers and implementation partners in deploying SAP Ariba solutions. It contains detailed task lists, timelines, and activities aligned to the SAP Activate methodology and is designed to guide project teams through deployment steps such as data collection, configuration, and

testing. Other options like SAP for Me are customer portals, not deployment tools, and SAP Cloud Application Lifecycle Management is a broader lifecycle tool not focused specifically on Ariba deployments.

NEW QUESTION # 38
Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- A. SupplierContact - contacts for the suppliers
- B. Template - project templates such as Contract templates
- C. AMLExtension - AML customizations such as custom fields
- D. DynamicForm - custom for m templates (dForms)

Answer: A

NEW QUESTION # 39
How can you define default values on fields?

- A. Set as Constants or Expressions based on other field values
- B. Set only for Constant values
- C. Default values are not permitted
- D. Default values must be manually entered by the user

Answer: A

Explanation:
SAP Ariba allows you to definedefault values for fields either as static Constants or as dynamic Expressionsbased on other field values. Expressions use the Ariba expression language, supporting logical comparisons and operators to calculate defaults dynamically during data entry. This enables tailored defaulting logic that adapts to form context or user input. Default values are applied automatically by the system; users do not have to enter them manually unless they override the defaults. This flexibility improves data accuracy and user experience.

NEW QUESTION # 40
When you have created a new custom field and marked it as reportable, saved and published your changes, but the field does not show up in reports. How can you resolve the issue?

- A. Custom fields must be created in the same module where reports are generated.
- B. Run the "Retrieve flexible fields metadata for reporting" task under Reporting Manager.
- C. You did not assign the custom field to the appropriate report category.
- D. Wait 2 hours for the schema to refresh automatically.

Answer: B

Explanation:
After publishing a custom reportable field, the"Retrieve flexible fields metadata for reporting" task must be runto update the reporting schema with the new field metadata. Without this manual step, the reports do not recognize the new field despite it being published. The system does not perform automatic timed refreshes of the schema. Module location or report category assignment is not a prerequisite for report visibility in SAP Ariba's analytics.

NEW QUESTION # 41
.....

Do you want to pass the exam just for one time? If you do want choose our C_ACDET_2506 exam dumps.
