

Study Materials NETA NETA_2 Review - New NETA_2 Brindumps Files

NETA LEVEL 2 EXAM (ACTUAL) LATEST 2024 WITH 300+ EXPERT CERTIFIED QUESTIONS AND ANSWERS I ALREADY GARDED A+

At what current level does ventricular fibrillation occur?

-60 to 100mA in AC systems

-300 to 500mA in DC systems

What is the LET-GO current threshold?

For a 70kg body

75mA DC

15mA AC

Meter Sockets and meter disconnect switches should be connected on the load side of a service disconnecting means.

FALSE

(NEC Article 230.82)

Which standard addresses equipment grounding?

NFPA 70 (National Electric Code)

A moving iron meter operates by applying _____ current to the coil.

Operating current (can be AC or DC)

In addition to the content updates, our system will also be updated for the NETA_2 training materials. If you have any opinions, you can tell us that our common goal is to create a product that users are satisfied with. After you start learning, I hope you can set a fixed time to check emails. If the content of the NETA_2 Practice Guide or system is updated, we will send updated information to your e-mail address. Of course, you can also consult our e-mail on the status of the product updates. I hope we can work together to make you better use NETA_2 simulating exam to pass the NETA_2 exam.

The price of our NETA_2 learning guide is among the range which you can afford and after you use our NETA_2 study materials you will certainly feel that the value of the NETA_2 exam questions far exceed the amount of the money you pay for the pass rate of our practice quiz is 98% to 100% which is unmatched in the market. Choosing our NETA_2 Study Guide equals choosing the success and the perfect service.

New NETA NETA_2 Brindumps Files | NETA_2 Reliable Exam Registration

We are here to lead you on a right way to the success in the NETA certification exam and save you from unnecessary hassle. Our NETA_2 brindumps torrent are developed to facilitate our candidates and to validate their skills and expertise for the NETA_2 Practice Test. We are determined to make your success certain in NETA_2 real exams and stand out from other candidates in the IT field.

NETA Level 2 Certified Assistant Electrical Testing Specialist Sample Questions (Q73-Q78):

NEW QUESTION # 73

A transformer contains insulating fluid with a specific gravity greater than 1. From where should the oil sample be drawn?

- A. From the conservator
- **B. From the top of the tank**
- C. From the bottom of the tank
- D. From the middle of the tank

Answer: B

Explanation:

Specific gravity greater than 1 means the insulating fluid is heavier than water. Any free water contamination will settle below the oil. To avoid collecting settled contaminants and to obtain a representative oil sample, NETA practice requires sampling from the top of the tank.

Correct sampling technique is critical for accurate dielectric, moisture, and dissolved gas analysis results.

NETA Level 2 technicians must understand fluid properties to avoid misleading test conclusions.

NEW QUESTION # 74

When personnel are working in a permitted confined space, how many attendants must remain outside the space and for how long?

- A. Two attendants, until entry permit expires
- B. One attendant, during entry only
- C. Two attendants, during energized work
- **D. One attendant, for the duration of the operation**

Answer: D

Explanation:

Confined space safety requirements mandate that at least one trained attendant remain outside the space for the entire duration of the entry operation. The attendant monitors conditions, maintains communication, and initiates rescue procedures if needed. NETA Level 2 technicians must comply with confined space protocols when testing transformers, vaults, or enclosed switchgear compartments.

NEW QUESTION # 75

Why should lint-free rags be used when cleaning circuit breaker components?

- **A. Lint attracts dust and contamination**
- B. Lint prevents corrosion
- C. Lint improves lubrication retention
- D. Lint increases dielectric strength

Answer: A

Explanation:

Lint fibers can attract dust, moisture, and contaminants, which may degrade insulation and interfere with mechanical movement. NETA Level 2 technicians are expected to maintain cleanliness during maintenance and testing activities to prevent introducing foreign material that could affect breaker performance or reliability.

NEW QUESTION # 76

The smallest particle of a substance that still retains the properties of that substance is a:

- **A. Molecule**
- B. Atom
- C. Electron

- D. Ion

Answer: A

Explanation:

Anomolecule is the smallest unit of a substance that retains its chemical and physical properties. This basic scientific principle supports understanding of insulating materials, gases, and liquids used in electrical equipment, particularly when discussing dielectric behavior and contamination effects.

NEW QUESTION # 77

The sum of all voltage drops around a series circuit is:

- A. Dependent on resistance values
- B. Greater than the applied voltage
- **C. Equal to the applied voltage**
- D. Zero

Answer: C

Explanation:

Kirchhoff's Voltage Law states that the algebraic sum of voltages around any closed loop equals the applied voltage. This principle underpins circuit analysis and is essential for verifying expected readings during troubleshooting and commissioning.

NEW QUESTION # 78

.....

We provide 24-hour online service for all customers who have purchased NETA_2 test guide. You can send us an email to ask questions at anytime, anywhere. For any questions you may have during the use of NETA_2 exam questions, our customer service staff will be patient to help you to solve them. At the same time, if you have problems with downloading and installing, NETA_2 Torrent prep also has dedicated staff that can provide you with remote online guidance. In order to allow you to use our products with confidence, NETA_2 test guide provide you with a 100% pass rate guarantee. Once you unfortunately fail the exam, we will give you a full refund, and our refund process is very simple.
