## Salesforce Arch-303 Lab Questions | Exam Arch-303 Questions Answers

It is really not easy to pass Arch-303 exam, but once you get the exam certification, it is not only a proof of your ability, but also an internationally recognised passport for you. You cannot blindly prepare for Arch-303 exam. Our PassExamDumps technical team have developed the Arch-303 Exam Review materials in accordance with the memory learning design concept, which will relieve

your pressure from the preparation for Arch-303 exam with scientific methods.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q44-Q49):

### NEW QUESTION # 44

While validating a LINK Cartridge for inclusion into the solution, an Architect notices that the UNK cartridge documentation requires the Architect to add a script node to a Pipeline in the storefront cartridge. The script is also a valid CommonJS module. Which approach can the Architect use to Integrate this cartridge into a site that uses Controllers only?

- A. Copy and paste the script that is required directly into the Controller, add the appropriate arguments, then execute the correct method
- B. Add the script that is required via a Module, exports statement in the Controller add the appropriate arguments, and execute the correct method.
- C. Add the script that is required via an importScript statement in the Controller, add the appropriate arguments, and execute the correct method.
- D. Add the script that is required via a require statement In the Controller, add the appropriate arguments, and execute the correct method.

**Answer: D**

Explanation:

In a site using Controllers, the most efficient way to integrate a script from a LINK cartridge that is also a valid CommonJS module is by using a require statement. This method enables the Architect to modularly load the necessary script, passing in any arguments that the script needs to function correctly within the existing Controller framework. This approach maintains modularity and adherence to the CommonJS module pattern, making it the most suitable for seamless integration.

### NEW QUESTION # 45

The following promotions are configured with no exclusivity (can be combined with any other promotion) in a - 1month campaign:

- \* Free correct- in -store shipping
- \* 20% accessories products discount, applies for all customers
- \* \$5 off coupon based discount, sent to a selected group of customers

The combination of above promotions allows customers to get 16 socks for free in store. This was unintended, and the Client If considering disabling the coupon. The Client is concerned about a potential spike in the number of Call Center calls from customers who had the coupon code added to their baskets before it was disabled. As basket lifetime is set to 30 days for all customers, this can continue for the full length of the campaign.

What solutions should the Architect suggest to keep the Call Center calls to a minimum?

- A. Disable the coupon code. Reduce the basket lifetime in Business Manager to expire some of the existing baskets
- B. Disable the coupon code. Email all the customers to not use the coupon code in their baskets.
- C. Disable the coupon code. Clear the production cache from the Business Manager to clear existing baskets.
- D. Disable the coupon code. Restart the production instance from control Center to clear existing baskets.

**Answer: A**

Explanation:

Reducing the basket lifetime is a strategic approach to minimizing the impact of disabling a promotional coupon. This action will cause baskets that may still contain the now-disabled coupon to expire sooner, thereby reducing the potential volume of calls to the Call Center from customers inquiring about the coupon.

This method also avoids the drastic measure of clearing all existing baskets or restarting the production instance, which could disrupt user experience and lead to further customer dissatisfaction.

### NEW QUESTION # 46

There Is an Issue with the site when the domain Is opened from Google search results. After researching the problem. It turns out that the site returns \* 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. Add dynamic redirect if the URL contains parameter to Home Show. Add this snippet to the aliases configuration for the domain
- B. Add dynamic catch-all rule to redirect to home page.

- C. Add this snippet to the aliases configuration for the domain
- D. Add this snippet to the aliases configuration for the domain:

**Answer: B**

Explanation:

To address the issue of the site returning a 404 error when accessed with a parameter from Google search results, a dynamic catch-all rule to redirect such requests to the homepage is an effective solution (Answer A).

This approach ensures that users landing from external links with appended parameters, which might not match any configured route or alias, are redirected to a valid page instead of seeing an error page. This improves the user experience and minimizes potential bounce rates caused by broken links or outdated URLs.

#### NEW QUESTION # 47

A client receives multiple feeds from third parties on the same SFTP location:

- \* Product prices (sftp: prod/prices)
- \* Stores information (sftp: prod/stores;
- \* Product information (sftp: prod/catalog)
- \* Categories information (sftp: prod/marketing)
- \* Content (sftp: prod/marketing)

Some of the feeds are placed on sftp multiple times a day, as the information is updated in the source system.

The Architect decides to have only two jobs:

- \* One that checks and downloads available feeds every hour
- \* One that imports the files from Webdav once a day before the data replication, using the standards steps available in the Job Framework. Which design is correct for the import Job, taking the steps scope in consideration?

- A. -Four sibling flows execute steps in parallel: import products, stores, price, content-last flow executes steps in sequence: import:categories, reindex
- B. - four sibling flows execute steps in parallel: import products, stores, prices, content- fifth flow executes: import categories-last flow executes steps in sequence: reindex
- C. - three sibling flows import steps in parallel: import products, stores, prices- fourth flow executes: import categories- last flow executes steps in sequence: reindex, Import content
- D. - four sibling flows execute steps in parallel: import products, stores, prices, content- last flow executes steps in sequence import categories, reindex

**Answer: D**

Explanation:

This design maximizes efficiency and concurrency. By having the jobs that import products, stores, prices, and content run in parallel, the system can handle multiple data streams simultaneously, reducing total processing time. The sequential execution of importing categories followed by reindexing ensures that all new and updated information is properly indexed and available for site use, following the completion of the import of more frequently updated data. This order respects dependencies between steps and aligns with best practices for handling complex data workflows in B2C Commerce environments.

#### NEW QUESTION # 48

A business wants to migrate its customer service provider from provider A to provider B. Provider e offers a LINK cartridge to integrate with its commerce solution.

Which three artifacts need to be created by the Architect? Choose 3 answers

- A. Document the data mapping between commerce and customer service provider.
- B. Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs.
- C. Document the design of implementing a new B2C Commerce cartridge following the Industry standard best practices
- D. Document the data objects, the interface, and data synchronization frequency between the systems.
- E. Document how the customer online journey flows from landing on the page to placing of the order

**Answer: B,C,D**

Explanation:

When integrating a new LINK cartridge for a customer service provider, the following documents are essential:

\* Option A (Document the design of implementing a new B2C Commerce cartridge following the industry standard best practices): This ensures that the cartridge is implemented in a manner that is consistent with established best practices, enhancing maintainability and compatibility.

\* Option B (Document the data objects, the interface, and data synchronization frequency between the systems): It's crucial to define how data will flow between the new customer service provider and the commerce system, including the frequency of synchronization to ensure data integrity and timeliness.

\* Option D (Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs): Customizing the cartridge to fit the specific needs and existing setup of the commerce system ensures that the integration adds the intended value without disrupting existing operations.

These artifacts will guide the structured integration and customization of the LINK cartridge, ensuring it meets the business's operational and strategic needs.

## NEW QUESTION # 49

.....

As for buying Arch-303 questions and answers for the exam, people may have different concerns. Most candidates can pass the exam by using the Arch-303 questions and answers of us just one time, we ensure you that we will give you refund if you can't pass. Or if you have other exams to attend, we can replace other 2 valid exam dumps for you, at the same time, if Arch-303 Questions and answers you buy updates, you can also get the latest version for free. You just need to send us the failure scanned, and we will replace the exam dumps or return your money to you.
