Successful candidates will receive a Salesforce Certified Sharing and Visibility Architect credential, which is recognized as a mark of excellence in the Salesforce community and can help professionals advance their careers in this exciting field.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q47-Q52):

NEW QUESTION # 47
The sales manager in Japan have asked the sales manager in Australia to assist them with closing their deals.
How are these requirements achieved?

- A. Use sharing set to give the sales manager access to the deals.
- B. Create ownership-based sharing rule.
- C. Use opportunity teams to automatically add the sales manager as a team member.

- D. Assign the sales manager View All on the opportunity object.

Answer: C

NEW QUESTION # 48
Customer complaints for bad interactions with a customer support agent are logged as Cases and assigned to a human resources representative. The agent of the complaint should not see the case, but their manager should.
How is this accomplished?

- A. Case is owned by the subject of the complaint, so their manager in the role hierarchy can access the record. CRED permission are removed on Case so the agent cannot read the case record.
- B. Criteria based Sharing Rule on Case that shares to the Role Manager and above when a custom field Assigned Agent (subject of the complaint) Is not blank,
- C. Trigger on Case to lookup and share to the manager of an Assigned Agent custom field (the subject of the complaint) using Apex Managed Sharing.

Answer: C

Explanation:
Explanation
Using a trigger on Case to lookup and share to the manager of an Assigned Agent custom field using Apex Managed Sharing would allow the HR representative to control the visibility of the case based on the subject of the complaint. Criteria-based sharing rules cannot be used to exclude a specific user from seeing a record.
Changing the owner of the case would affect other aspects of data visibility and security.

NEW QUESTION # 49
Universal Computers (UC) is looking to expand its delivery capabilities through a network of distributors that use a Partner Community license. UC employees currently can view all delivery records through the organization-wide default (OWD) setting of Public Read Only.
Which approach would an architect recommend to limit the records a distributor can see?

- A. Create a criteria-based sharing rule to grant access to the distributor
- B. Create an ownership-based sharing rule to grant access to the distributor.
- C. Remove Read permission from the distributor profile.
- D. Set the External OWD to Private for the Delivery object.

Answer: D

Explanation:
Explanation
Setting the External OWD to Private for the Delivery object is the best approach to limit the records a distributor can see, since it will restrict the access to only the records they own or are shared with them. Option A is incorrect, since ownership-based sharing rules are not available for partner community users. Option B is incorrect, since removing Read permission from the distributor profile would prevent them from accessing any delivery records. Option D is incorrect, since criteria-based sharing rules are not available for partner community users.

NEW QUESTION # 50
The corporate identity and access team needs to audit User setup in the Salesforce org.
Which permission should be granted to this team so they can perform their audit?

- A. View All Users
- B. View permission on the User object
- C. View All Data

Answer: A

NEW QUESTION # 51
Universal Containers (UC) tuned off the Customer User Visibility feature in its Customer Community.
What community functionality is expected by having the Customer User Visibility tuned off?

- A. Search for internal users.
- B. Creating new Customer community users.
- C. Searching for other external users.
- D. Updating their user profile.

Answer: C

Explanation:
Explanation
By turning off the Customer User Visibility feature in its Customer Community, Universal Containers can expect that community functionality related to searching for other external users will be affected. The Customer User Visibility feature allows customer community users to find and collaborate with other customer community users who belong to different accounts. If this feature is turned off, customer community users can only see other users who belong to the same account as them. Turning off this feature will not affect creating new customer community users, updating their user profile, or searching for internal users.

NEW QUESTION # 52
......
