2026 SPLK-2003 – 100% Free Valid Test Guide | Pass-Sure Interactive SPLK-2003 EBook

Our company constantly increases the capital investment on the research and innovation of our SPLK-2003 training materials and expands the influences of our SPLK-2003 study materials in the domestic and international market. Because the high quality and passing rate of our SPLK-2003 Practice Questions more than 98 percent that clients choose to buy our study materials when they prepare for the test SPLK-2003 certification. We have established a good reputation among the industry and the constantly-enlarged client base.

Splunk Phantom Certified Admin Sample Questions (Q12-Q17):

NEW QUESTION # 12
Which of the following is an advantage of using the Visual Playbook Editor?

- A. Supports Python or Javascript.
- B. Easier playbook maintenance.
- C. Eliminates any need to use Python code.
- D. The Visual Playbook Editor is the only way to generate user prompts.

Answer: B

Explanation:
Visual Playbook Editor is a feature of Splunk SOAR that allows you to create, edit, and implement automated playbooks using visual building blocks and execution flow lanes, without having to write code. The Visual Playbook Editor automatically generates the code for you, which you can view and edit in the Code Editor if needed. The Visual Playbook Editor also supports Python and Javascript as scripting languages for custom code blocks. One of the advantages of using the Visual Playbook Editor is that it makes

playbook maintenance easier, as you can quickly modify, test, and debug your playbooks using the graphical interface.

NEW QUESTION # 13
Which of the following queries would return all artifacts that contain a SHA1 file hash?

- A. https://<PHANTOM_URL>/rest/artifact?_filter_cef_sha1_insull=False
- B. https://<PHANTOM_URL>/rest/artifact?_filter_sha1__insull=False
- C. https://<PHANTOM_URL>/rest/artifact?_filter_cef_Sha1_contains="'"
- D. https://<PHANTOM_URL>/rest/artifact?_filter_cef_md5_insull=false

Answer: A

Explanation:
To retrieve all artifacts containing a SHA1 file hash via the Splunk SOAR REST API, the appropriate query would filter for artifacts where the 'cef_sha1' field is not null, indicating that a SHA1 hash is present. The correct REST API call should use the filter parameter _filter_cef_sha1__isnull=False (assuming 'sha1' is a typo and it should be 'sha1'). This query parameter is used to filter out artifacts that do not have a SHA1 hash, thus returning only those that do.

NEW QUESTION # 14
What is the simplest way to pass data between playbooks?

- A. File system
- B. KV Store
- C. Action results
- D. Artifacts

Answer: D

Explanation:
The simplest way to pass data between playbooks in Splunk SOAR is through the use of artifacts. Artifacts are objects that can store data and are associated with containers. When multiple playbooks work on a single container, they can access and manipulate the same set of artifacts, allowing for seamless data transfer between playbooks. This method is straightforward and does not require additional setup or management of external storage systems, making it the most direct and efficient way to pass data within the Splunk SOAR environment1.

NEW QUESTION # 15
Which is the primary system requirement that should be increased with heavy usage of the file vault?

- A. Amount of storage.
- B. Amount of memory.
- C. Bandwidth of network.
- D. Number of processors.

Answer: A

Explanation:
Explanation
The primary system requirement that should be increased with heavy usage of the file vault is the amount of storage. The file vault is a secure repository for storing files on Phantom. The more files are stored, the more storage space is needed. The other options are not directly related to the file vault usage. See [File vault] for more information.

NEW QUESTION # 16
If two or more conditions apply to data in a filter block, which path is followed in the playbook?

- A. All matching paths will be followed, but the first path to reach the end block will terminate the playbook.
- B. Only the last matching condition will activate its path.
- C. All paths with matching conditions are followed in parallel.
- D. Only the first matching condition will activate its path.

Answer: C

NEW QUESTION # 17
