If you are prepared to take the 2V0-32.24 exam with the help of excellent 2V0-32.24 learning materials on our website, the choice is made brilliant. Our 2V0-32.24 training materials are your excellent choices, especially helpful for those who want to pass the 2V0-32.24 Exam without bountiful time and eager to get through it successfully. Besides that, our 2V0-32.24 study questions have three versions: PDF version, Soft version and APP version, which can be interesting and helpful for you to choose.

We have applied the latest technologies to the design of our 2V0-32.24 exam prep not only on the content but also on the displays. As a consequence you are able to keep pace with the changeable world and remain your advantages with our 2V0-32.24 training braindumps. Besides, you can consolidate important knowledge for you personally and design customized study schedule or to-do list on a daily basis. As long as you follow with our 2V0-32.24 Study Guide, you are doomed to achieve your success.

2V0-32.24 Quiz Torrent: VMware Cloud Operations 8.x Professional V2 - 2V0-32.24 Exam Guide & 2V0-32.24 Test Braindumps

With "reliable credit" as the soul of our 2V0-32.24 study tool, "utmost service consciousness" as the management philosophy, we

endeavor to provide customers with high quality service. Our customer service staff, who are willing to be your little helper and answer your any questions about our 2V0-32.24 qualification test, fully implement the service principle of customer-oriented service on our 2V0-32.24 Exam Questions. Any puzzle about our 2V0-32.24 test torrent will receive timely and effective response, just leave a message on our official website or send us an e-mail for our 2V0-32.24 study guide.

VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Installing, Configuring, and Setting Up: This section of the exam measures skills of Implementation Specialists and covers the end-to-end setup process for vRealize Suite Lifecycle Manager, vRealize Operations, and Log Insight. It includes prerequisites, installation steps (manual and automated), identity and access configuration, environment settings, data sources, content packs, and system integrations to enable a functional cloud management platform.
Topic 2	<ul style="list-style-type: none"> VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.
Topic 3	<ul style="list-style-type: none"> Administrative and Operational Tasks: This section of the exam measures skills of Cloud Administrators and covers daily operational tasks such as content and environment management in vRealize Suite Lifecycle Manager. It also includes managing licensing, alert systems, dashboards, metrics, cost assessments, capacity optimization, workload planning, and system monitoring. Additionally, it explores access control, patching, and retention settings in vRealize Log Insight, ensuring ongoing operational excellence across VMware tools.
Topic 4	<ul style="list-style-type: none"> Performance-tuning, Optimization, and Upgrades: This section has no testable objectives and therefore is not directly assessed in the exam.
Topic 5	<ul style="list-style-type: none"> Troubleshooting and Repairing: This section of the exam measures skills of Support Engineers and covers the diagnosis and resolution of common performance and configuration issues in vRealize Operations, Log Insight, and Lifecycle Manager. It also includes cluster management options, log bundle generation, password handling, and changing authentication settings, equipping professionals to ensure system reliability.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q24-Q29):

NEW QUESTION # 24

A vRealize Log Insight (vRLI) administrator wants to search archived logs for certain events. What are the required steps to provide the administrator the ability to search the log messages?

- A. SSH into the NFS server, install vRLI tools, then import the archive using CLI from NFS share to the vRLI appliance.
- B. SSH into the vRLI appliance, mount the archiving NFS share then import the archive using CLI.**
- C. SSH into the vRLI appliance, install vRLI tools, then import the archive using CLI from NFS share to the vRLI appliance.
- D. SSH into the NFS server, mount the archiving partition, then import the archive using CLI to vRLI appliance.

Answer: B

Explanation:

To allow the administrator to search archived logs in vRealize Log Insight (vRLI), the logs stored in an NFS share must be imported into the vRLI appliance. The correct steps involve SSHing into the vRLI appliance, mounting the NFS share where the archived logs are stored, and then using the CLI to import the archived logs into the vRLI appliance for searching. This is the standard method for handling archived log files in vRLI.

NEW QUESTION # 25

Which three guest information properties are collected for all objects created by the OS and Application Monitoring management

pack? (Choose three.)

- A. MAC Address
- B. BIOS UUID
- C. IP Address
- D. OS Build Number
- E. OS Version
- F. Hostname

Answer: C,D,E

Explanation:

The OS and Application Monitoring management pack in vRealize Operations collects various guest information properties for all objects, including:

OS Build Number: The version/build of the operating system running on the guest.

OS Version: The version of the operating system installed on the guest.

IP Address: The network IP address assigned to the guest.

NEW QUESTION # 26

Which three types of Virtual Machine (VM) action can be scheduled in a vRealize Operations Automation Central job? (Choose three.)

- A. Delete powered off VMs
- **B. Downsize oversized VMs**
- C. Move VMs
- **D. Reboot VMs**
- E. Delete unused snapshots for VMs
- **F. Power On VMs**

Answer: B,D,F

Explanation:

Power On VMs: You can schedule the action to power on specific VMs at a specified time.

Reboot VMs: Scheduling a reboot for VMs can be done to automate maintenance or restart processes.

Downsize oversized VMs: This action allows you to resize VMs based on performance data, ensuring resources are allocated optimally.

NEW QUESTION # 27

Refer to the exhibit.

[<< Back To Cost Drivers](#)

Server Hardware : Traditional

You can view the total cost of servers such as tower, blade or desktop that are associated with all your vCenter Server instances. The amortized cost of each server hardware is calculated based upon depreciation years and model defined in Cost Settings. Please refer to Storage tab to enter cost per GB, for datastores.

Edit Mode

- Edit for All Datacenters
 Edit for specific Datacenter

No Traditional Servers Available for the Selected Datacenter

An administrator is tasked to manually upload the cost drivers of all the hosts, to obtain cost calculations accurate for their datacenter. However, when the administrator tries to update the cost drivers, the message displayed on the exhibit is shown. What is the cause of this message?

- A. Cost drivers must be established on a per Datacenter basis.
- B. Cost calculation process is running at this moment.
- C. All hosts are in vSAN enabled clusters.
- D. Reference database is being used.

Answer: A

Explanation:

The message in the exhibit indicates that no "Traditional Servers" are available for the selected datacenter, which means the cost drivers have not been configured for that specific datacenter. In vRealize Suite, cost drivers must be set up on a per-datacenter basis, and the administrator needs to select the appropriate datacenter to configure and upload the cost drivers accordingly.

NEW QUESTION # 28

Which three deployment architectures are valid for vRealize Log Insight listed below? (Choose three.)

- A. Single node deployment with an external load balancer
- B. Two node deployment with the integrated load balancer
- C. Single node deployment with no load balancer
- D. Three node deployment with an external load balancer
- E. Single node deployment with the integrated load balancer
- F. Ten node deployment with the integrated load balancer

Answer: B,C,D

Explanation:

Two node deployment with the integrated load balancer: vRealize Log Insight supports a two-node deployment with an integrated load balancer, providing redundancy and load distribution.

Three node deployment with an external load balancer: A three-node deployment with an external load balancer is a valid and scalable option, ensuring high availability and load balancing.

Single node deployment with no load balancer: A single node can be deployed without a load balancer for smaller environments or testing purposes.
