Topic - Invoice and Revenue Rates: How They Are Determined
Oracle Fusion Project Billing uses bill rates, burdening, and transfer price schedules to derive standard bill rates, multipliers, markups, and bases for calculating potential revenue when the revenue method classification on a revenue plan is as billed, as incurred, or rate based. Similarly, bill rates derive invoice amounts when the invoice method classification on a bill plan is rate based.

- Option A : Resource class rate schedule > Override rate > Job rate schedule > Person rate schedule
- Option B : Override rate > Job rate schedule > Resource class rate schedule > Person rate schedule
- Option C : Person rate schedule > Job rate schedule > Resource class rate schedule > Override rate
- Option D : Override rate > Person rate schedule > Job rate schedule > Resource class rate schedule
- Option E : Job rate schedule > Resource class rate schedule > Override rate > Person rate schedule

Correct Answer: D

Bill Plan - Create a bill plan within a contract that uses the invoice method you require. Assign the bill plan to one or more contract lines. A set of instructions on a contract that define how to invoice a customer.

Multiple contract lines on a contract can use the same or different bill plans. Invoice Method is used in creating Bill Plan - not a separate setup.

Billing Controls - Contract feature that controls the types of transactions, dates, and amounts a customer may be invoiced for and revenue can be recognized for a contract or contract line. Define billing controls at the contract or contract line level.

Topic - Creating a Contract for Percent Spent Invoice and Revenue Methods: Worked Example This example describes a scenario where transactions for a contract line need to be invoiced and the revenue recognized using the percent spent method.

What are the revenue and invoice method classifications? Percent Spent

What is the billing extension calculation level for the contract line and project association? Project level
Summary of the Tasks Create a contract, create the percent spent contract lines, create the bill plan, create the revenue plan.

Prerequisites

- * Create a project.
- * Create the project plan for percent spent revenue. Specify the plan type on the percent spent billing extension.
- * Create an approved cost budget.
- * Create cost and burden rates.
- * Enter labor and expense transactions for the project.
- * Collect costs for the transactions.

Configuration Steps

- * Creating the Contract
- * Creating the Percent Spent Contract Lines
- * Creating the Bill Plan - A set of instructions on a contract that define how to invoice a customer.

Multiple contract lines on a contract can use the same or different bill plans.

- * Creating the Revenue Plan - Common set of instructions for recognizing revenue within a contract.

Multiple contract lines on a contract can use the same or different revenue plans.

Invoice method classifications determine how transactions are invoiced. The invoice method determines how invoice amounts are derived.

- * Enter an invoice method on a bill plan, which you create for a contract and assign to contract lines to provide a set of instructions for creating an invoice.
- * Create billing controls for a contract or contract line to define the valid transaction dates, billing resources, and amount limits for transactions associated with the contract.
- * Generate invoices to calculate the invoice amounts for a contract.

The following figure illustrates the components of a project and a contract that determine invoice amounts, and the relationships between the components.

Project and contract components used to determine invoice amounts and generate invoices.

- C. Prior actions
- D. Date-wise updates to the document
- E. Pre-approval activities

Status tracking provides information such as who approved or rejected the invoice, when and why they took the action, who is currently assigned to approve or reject the invoice, etc. Three of the information that can be tracked as status tracking for project invoice approval notifications are:

- * Person assigned for approval: This shows the name of the person who is currently assigned to approve or reject the invoice notification.
- * Prior actions: This shows the list of actions that have been taken on the invoice notification by previous approvers or rejectors, such as approve, reject, request information, etc.
- * Persons with whom it is still pending approval: This shows the list of persons who are still in the approval chain for the invoice notification and have not taken any action yet. Pre-approval activities and date-wise updates to the document are not information

- D. Provide absence details for resources
- E. Calculate Resources Availability Scores
