C-SIGVT-2506시험 - C-SIGVT-2506퍼펙트 덤프데모문제 보기

SAP C-SIGVT-2506인증덤프는 최근 출제된 실제시험문제를 바탕으로 만들어진 공부자료입니다. SAP C-SIGVT-2506 시험문제가 변경되면 제일 빠른 시일내에 덤프를 업데이트하여 최신버전 덤프자료를SAP C-SIGVT-2506덤프를 구매한 분들께 보내드립니다. 시험탈락시 덤프비용 전액환불을 약속해드리기에 안심하시고 구매하셔도 됩니다.

SAP C-SIGVT-2506 시험요강:

주제	소개
주제 1	Monitoring Transformation Progress using SAP Cloud ALM: This section of the exam measures the capabilities of Cloud ALM Specialists and covers the use of SAP Cloud ALM to track project progress and operational performance. It explains how Cloud ALM supports implementation tasks, monitors system health, and provides visibility into key milestones. Candidates learn how to use the platform to support continuous governance and ensure transformation activities remain on track.
주제 2	Validating Business Processes with SAP Signavio: This section of the exam measures the skills of Business Process Analysts and covers the use of SAP Signavio to evaluate, analyze, and validate business processes during transformation projects. It focuses on understanding how process insights support decision-making and how Signavio helps identify gaps between current operations and desired outcomes. The section ensures candidates can apply Signavio tools to support business process optimization.
주제 3	Exploring the SAP Business Transformation Methodology: This section of the exam measures the skills of Transformation Consultants and introduces SAP structured methodology for guiding organizations through transformation programs. It covers the stages, principles, and frameworks used to support business evolution, ensuring candidates understand how SAP's methodology enables structured planning, execution, and adoption across transformation lifecycles.

주제 4	Exploring SAP Cloud Strategy: This section of the exam measures the skills of Cloud Strategy Analysts and focuses on SAP overall cloud vision, deployment models, and strategic direction. It includes understanding the value of cloud adoption, SAP portfolio of cloud solutions, and how organizations benefit from modern cloud architectures. The section validates foundational knowledge of SAP cloud ecosystem and its relevance to transformation.
주제 5	Using LeanIX for Enterprise Architecture Validation: This section of the exam measures the abilities of Enterprise Architects and focuses on using LeanIX to validate architecture landscapes. It includes understanding how LeanIX maps applications, data, and business capabilities to support modernization efforts. The domain emphasizes validating architecture readiness and ensuring that the existing IT landscape aligns with transformation goals.

최신 SAP Certified Associate C-SIGVT-2506 무료샘플문제 (Q25-Q30):

질문 # 25

What transformation method does SAP Signavio use to offer fast insights with minimal setup?

- A. Extend and Merge
- **B. Plug and Gain**
- C. Lift and Shift
- D. Clone and Execute

정답: B

설명:

SAP Signavio's Plug and Gain approach is designed to provide organizations with rapid process insights without requiring extensive configuration or long deployment cycles. The method allows companies to connect their SAP systems to Signavio in a streamlined manner so the platform can immediately begin analyzing transactional data, identifying performance gaps, and revealing improvement opportunities. This makes it particularly valuable during early stages of transformation, when leadership needs fast visibility into system performance and process inefficiencies.

Plug and Gain eliminates the need for heavy upfront modeling or manual data migration. Instead, it leverages automated data integration and prebuilt best-practice process models to start generating insights almost immediately. As a result, companies can accelerate their discovery phase, understand current process behavior, and prepare for fit-to-standard workshops much more efficiently.

Options A, C, and D refer to general transformation concepts that are not tied to SAP Signavio's methodology. Plug and Gain is the only method specifically developed for Signavio to offer quick, meaningful insights with minimal effort. It supports transformation readiness by helping teams identify high-priority areas early and align their process improvement initiatives with quantifiable data.

질문 # 26

Which SAP LeanIX product helps organizations understand their current application landscape?

- A. SAP LeanIX Landscape Management
- B. SAP LeanIX Onboarding Tracker
- C. SAP LeanIX Architecture and Road Map Planning
- **D. SAP LeanIX Application Portfolio Management**

정답: D

설명:

Application Portfolio Management (APM) is the LeanIX product specifically designed to help organizations analyze their current application landscape. It provides an inventory of applications, lifecycle information, ownership details, technology stacks, and relationships to business capabilities. APM allows companies to evaluate redundancy, risks, and optimization opportunities. Other LeanIX modules support planning or governance but do not focus primarily on understanding the existing application portfolio.

질문 # 27

Which tool is used for business process analysis in the RISE toolchain?

- A. SAP Enable Now
- B. SAP Business Technology Platform
- C. SAP Signavio
- D. SAP LeanIX

정답: C

설명:

SAP Signavio is SAP's dedicated suite for business process analysis and optimization. Within the RISE with SAP toolchain, Signavio enables organizations to evaluate existing processes, identify performance gaps, benchmark operations, and design optimized target processes. It is used heavily during the Discover and Prepare phases to guide fit-to-standard workshops. The other tools support architecture, extensions, and training but do not serve as the main process analysis engine.

질문 # 28

What are the phases of a business transformation process?

- A. Discover, plan, analyze, design, implement, operate
- B. Discover, plan, execute, deploy, evaluate, run
- C. Analyze, plan, execute, monitor
- D. Discover, prepare, explore, realize, deploy, run

정답: D

설명:

These six phases-Discover, Prepare, Explore, Realize, Deploy, and Run-represent the standard SAP Activate-based structure used in transformation projects. Each phase has specific deliverables: discovery focuses on identifying value and readiness; prepare sets the foundation; explore validates fit-to-standard processes; realize configures and tests the solution; deploy transitions the system into production; and run focuses on operations and continuous improvement. This phased approach provides consistency across transformation initiatives.

질문 # 29

What does Cloud ALM Integration & Exception Monitoring track?

- A. Business partner roles
- B. Cloud API changes
- C. Cross-system process adherence
- D. Communication failures between systems

정답: D

설명:

Integration & Exception Monitoring in SAP Cloud ALM provides transparency into message flows and data exchanges between integrated systems. It identifies communication failures, processing delays, and error situations across cloud and on-premise landscapes. This helps operations teams quickly identify root causes and ensure uninterrupted business processes. It does not track master data roles or cross-system process conformance; its focus is strictly on integration health and exception handling.

질문 # 30

.....

성공을 위해 길을 찾고 실패를 위해 구실을 찾지 않는다는 말이 있습니다. SAP인증 C-SIGVT-2506시험이 영어로 출제되어 시험패스가 너무 어렵다 혹은 회사다니느라 공부할 시간이 없다는 등등은 모두 공부하기 싫은 구실에 불과합니다. PassTIP의 SAP인증 C-SIGVT-2506덤프만 마련하면 실패를 성공으로 바꿀수 있는 기적을 체험할수 있습니다.
