

IDPX Bestehen Sie Interior Design Professional Exam! - mit höhere Effizienz und weniger Mühen

Laden Sie die neuesten EchteFrage IDPX PDF-Versionen von Prüfungsfragen kostenlos von Google Drive herunter:
<https://drive.google.com/open?id=1n9rrJkelNtbKBjqbgaDpRdmn6LBU8Btl>

Das Zertifikat für CIDQ IDPX bedeutet einen neuen Meilenstein im Leben. Mit dem bekommt man mehr berufliche Aufstiegschancen und bessere Arbeitsaussichten. Daher träumt jeder IT-Fachmann davon. Es ist allen bekannt, dass solche CIDQ IDPX Prüfung schwer zu bestehen ist. In der Tat ist es auch so, zahlreiche Prüflinge fallen in der Prüfung durch. Wenn man sich gar nicht um die Prüfung bemüht, fällt einem noch schwerer. Die CIDQ IDPX Zertifizierungsprüfung verlangt jedoch umfangreiche Fachkenntnisse. Unser EchteFrage bietet Ihnen einen kürzeren Weg zu der CIDQ IDPX Zertifizierung. Auf unserer Website gibt es viele Prüfungsmaterialien für die CIDQ IDPX Zertifizierung, die Ihnen zum Bestehen der Prüfung unter Garantie helfen. Außerdem können Sie dabei viel Zeit ersparen. So ist es Ihnen ganz preisgünstig, dass man per EchteFrage mit weniger Zeit und Geld ein wertvolles Zertifikat bekommt.

CIDQ IDPX Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Project Assessment and Sustainability: This section of the exam measures skills of an Interior Design Consultant and covers understanding and evaluating square footage standards, environmental and wellness criteria, existing site conditions, and key project drivers such as client goals, culture, and budget.
Thema 2	• Code Requirements, Laws, Standards, and Regulations: This section of the exam measures the skills of a Regulatory Compliance Specialist and covers environmental regulations, accessibility standards, building codes, and zoning laws. It also addresses understanding jurisdictional permit processes and legal implications for design compliance.
Thema 3	• Integration of Furniture, Fixtures, & Equipment: This section of the exam measures the skills of a FF&E Specialist and focuses on selecting and integrating furniture and equipment. It includes understanding product types, code compliance, maintenance requirements, procurement, installation processes, and cost estimation methods.
Thema 4	• Integration with Building Systems and Construction: This section of the exam measures skills of a Building Systems Coordinator and involves applying knowledge of structural, mechanical, plumbing, electrical, fire protection, lighting, and acoustical systems. It also includes coordinating with ceiling plans, installation sequencing, and understanding building components and transport systems.

CIDQ IDPX Prüfungsaufgaben - IDPX Buch

Es ist unrealistisch, beim Lernen der relevanten Bücher diese CIDQ IDPX Prüfung zu bestehen. Es ist besser für Sie, einige wertvolle Prüfungsfragen zu machen, statt alle Kenntnisse für die Prüfung ziellos auswendig zu lernen. Die hocheffektive Dumps sind das beste Vorbereitungsgerät. So Kaufen Sie bitte schnell die CIDQ IDPX Dumps von EchteFrage. Das ist Dumps mit höher Hit-Rate. Und es ist wirksamer als alle andere Lernmethoden. Die sind die Unterlagen, womit Sie einmaligen Erfolg machen können.

CIDQ Interior Design Professional Exam IDPX Prüfungsfragen mit Lösungen (Q11-Q16):

11. Frage

When completing an analysis of the existing conditions for a two-story commercial building, what are some CRITICAL accessibility items to review?

- **A. entrances, restroom (washroom) facilities, and vertical transportation**
- B. exit signs, interior path of travel, and location of accessible parking
- C. entrances, exit signs, and location of accessible parking
- D. interior path of travel, fire protection system, and vertical transportation

Antwort: A

Begründung:

Accessibility analysis under ADA Standards (Section 206, 216, 407) focuses on key elements ensuring equitable use: entrances (accessible entry points), restroom facilities (compliant fixtures and clearances), and vertical transportation (elevators or lifts for multi-story access). Option A includes exit signs (life safety, not accessibility-specific) and misses restrooms and vertical movement. Option B omits entrances, critical for access. Option D includes fire protection (unrelated to accessibility) and misses restrooms. Option C covers the most critical ADA components for a two-story building, ensuring comprehensive compliance.

Verified Answer from Official Source: C - entrances, restroom (washroom) facilities, and vertical transportation

"Critical accessibility items in a multi-story building include entrances, restroom facilities, and vertical transportation to ensure compliance with ADA standards." (NCIDQ IDPX Study Guide, Section 1: Codes and Standards) Explanation from Official Source: The NCIDQ aligns with ADA requirements, emphasizing these elements as essential for accessibility in commercial spaces, especially multi-level structures.

Objectives:

* Apply accessibility standards to existing conditions (IDPX Objective 1.6).

12. Frage

An owner wants to control the lights above the television separately from the lights over the table in their conference room. What should the designer do?

- **A. Add an additional switch zone**
- B. Gang the switches under a single switch plate cover
- C. Control the lights over the table with an occupancy sensor
- D. Change the switches to three-way switches

Antwort: A

Begründung:

The NCIDQ IDPX exam tests the designer's ability to coordinate electrical systems to meet client needs. The owner's request to control the lights above the television separately from the lights over the table requires a solution that allows independent operation of the two lighting groups.

* Option A (Add an additional switch zone): This is the correct choice. A switch zone refers to a group of lights controlled by a single switch. Adding an additional switch zone means installing a separate switch to control the lights above the television independently from the lights over the table. This directly addresses the owner's request for separate control.

* Option B (Change the switches to three-way switches): Three-way switches are used to control a single light fixture from two different locations (e.g., at either end of a hallway). They do not allow for separate control of two different groups of lights, so this option does not meet the owner's need.

* Option C (Gang the switches under a single switch plate cover): Ganging switches means placing multiple switches in a single electrical box with a shared cover plate. While this might be part of the installation process for Option A, it does not address the core need to create separate control zones for the lights.

* Option D (Control the lights over the table with an occupancy sensor): An occupancy sensor automatically turns lights on or off based on room occupancy. While this might be a useful feature, it does not provide the manual, separate control the owner is requesting for the two lighting groups.

Verified Answer from Official Source:

The correct answer is verified from NCIDQ's official study materials on electrical coordination and lighting design.

"To allow separate control of different lighting groups, the designer should specify additional switch zones to ensure each group can be operated independently." (NCIDQ IDPX Study Guide, Building Systems Section) The NCIDQ IDPX Study Guide recommends adding switch zones to achieve separate control of lighting groups, which directly addresses the owner's request. Option A provides the most effective solution by ensuring that the lights above the television and over the table can be controlled independently.

Objectives:

- * Understand electrical coordination for lighting control (NCIDQ IDPX Objective: Building Systems).
- * Apply design solutions to meet client lighting needs (NCIDQ IDPX Objective: Design Development).

13. Frage

When developing a design, which BEST unifies the project and provides specific direction for the design?

- A. Feasibility studies
- B. Space allocation studies
- C. Programming and research
- **D. Concept statement**

Antwort: D

Begründung:

The NCIDQ IDPX exam focuses on the design process, including the role of various documents and activities in guiding a project. A unifying element in design provides a cohesive vision and direction for the project team.

* Option A (Feasibility studies): Feasibility studies assess the viability of a project, including budget, site constraints, and regulatory requirements. While important, they do not provide a unifying design direction; they are more about determining if the project can proceed.

* Option B (Concept statement): A concept statement is a written narrative that articulates the overarching design vision, aesthetic, and functional goals of the project. It serves as a guiding principle that unifies all design decisions, ensuring consistency across the project. This makes it the best choice for providing specific direction and unifying the design.

* Option C (Space allocation studies): Space allocation studies involve determining the spatial needs of the project (e.g., square footage for each function). While they help with planning, they are more technical and do not provide a unifying vision or direction for the design's aesthetic or experiential goals.

* Option D (Programming and research): Programming and research involve gathering data on the client's needs, goals, and functional requirements. While this is a critical step, it is more about collecting information than providing a unifying design direction.

Verified Answer from Official Source:

The correct answer is verified from NCIDQ's official study materials on the design process.

"The concept statement defines the design vision and provides a cohesive direction for the project, ensuring that all design decisions align with the overall intent." (NCIDQ IDPX Study Guide, Design Process Section) The NCIDQ IDPX Study Guide highlights the concept statement as a key tool for unifying a project. It acts as a touchstone for the design team, ensuring that all elements—from materials to spatial organization—align with the intended vision, making Option B the best choice.

Objectives:

- * Understand the role of the concept statement in the design process (NCIDQ IDPX Objective: Design Process).
- * Apply design principles to create a cohesive project vision (NCIDQ IDPX Objective: Design Development).

14. Frage

What provision should a designer include in the contract to minimize liability in claims that arise from delays caused by other project members?

- **A. An exclusion of liability for delays caused by other project members**
- B. A specified number of months the contract is in force, with a renewal clause
- C. Language excluding the designer from delay-related errors and omissions liability
- D. A realistic project schedule with deadlines for each phase of the project

Antwort: A

Begründung:

The NCIDQ IDPX exam tests the designer's understanding of professional practice, including contract provisions to manage liability. Delays caused by other project members (e.g., contractors, subcontractors) can lead to claims against the designer, and the contract should include provisions to mitigate this risk.

* Option A (An exclusion of liability for delays caused by other project members): This is the correct choice. Including a clause that explicitly excludes the designer from liability for delays caused by other project members (e.g., contractor delays, supplier issues) protects the designer from claims arising from factors outside their control. This provision ensures that the designer is not held responsible for delays they did not cause.

* Option B (A realistic project schedule with deadlines for each phase of the project): While a realistic schedule is important for project management, it does not directly minimize liability for delays caused by others. It helps set expectations but does not protect the designer from claims.

* Option C (A specified number of months the contract is in force, with a renewal clause): This provision defines the contract duration but does not address liability for delays. It is unrelated to minimizing claims caused by other project members.

* Option D (Language excluding the designer from delay-related errors and omissions liability):

This clause might protect the designer from liability due to their own errors, but it does not specifically address delays caused by other project members, which is the focus of the question. Option A is more directly applicable.

Verified Answer from Official Source:

The correct answer is verified from NCIDQ's official study materials on professional practice and contract drafting.

"To minimize liability for delays caused by other project members, the designer should include a contract provision excluding liability for such delays, ensuring they are not held responsible for factors outside their control." (NCIDQ IDPX Study Guide, Professional Practice Section) The NCIDQ IDPX Study Guide recommends including an exclusion clause for delays caused by others to protect the designer from related claims. This provision directly addresses the scenario in the question, making Option A the correct answer.

Objectives:

* Understand contract provisions to manage liability (NCIDQ IDPX Objective: Professional Practice).

* Apply risk management strategies in contract drafting (NCIDQ IDPX Objective: Contract Administration).

15. Frage

On a multi-tenant floor, what is the usable area when calculating square footage according to Building Owners and Managers Association (BOMA) standards?

- A. Tenant 1, Tenant 2, Electrical/Telephone 5, and Elevator Lobby 3
- **B. Tenant 1 and Tenant 2**
- C. Tenant 1, Tenant 2, and Electrical/Telephone 5
- D. Tenant 1, Tenant 2, and Elevator Lobby 3

Antwort: B

Begründung:

The NCIDQ IDPX exam tests the designer's knowledge of BOMA (Building Owners and Managers Association) standards for calculating usable area in multi-tenant buildings. Usable area is the space a tenant can actually occupy, excluding common areas that serve the entire floor.

* BOMA Standards Overview: According to the BOMA Office Standard (ANSI/BOMA Z65.1-2017), usable area is measured from the finished surface of the tenant side of demising partitions, excluding common areas such as elevator lobbies, electrical/telephone rooms, washrooms, and stairwells that serve all tenants.

* Analysis of the Floor Plan (from previous context): The floor plan includes Tenant 1, Tenant 2, Elevator Lobby 3, Electrical/Telephone 5, washrooms, and stairwells.

* Tenant 1 and Tenant 2: These are the primary tenant spaces, which are considered usable areas for the respective tenants.

* Elevator Lobby 3: This is a common area serving all tenants, so it is not included in the usable area of any specific tenant.

* Electrical/Telephone 5: This is a shared utility space for the building, also excluded from the usable area.

* Washrooms and Stairwells: These are common areas and are not part of the usable area.

- * Option A (Tenant 1 and Tenant 2): This is the correct choice. The usable area includes only the spaces within Tenant 1 and Tenant 2, as these are the occupiable areas for the tenants, excluding all common areas.
 - * Option B (Tenant 1, Tenant 2, and Elevator Lobby 3): The elevator lobby is a common area and should not be included in the usable area of any tenant.
 - * Option C (Tenant 1, Tenant 2, and Electrical/Telephone 5): The electrical/telephone room is a common utility space and is excluded from the usable area.
 - * Option D (Tenant 1, Tenant 2, Electrical/Telephone 5, and Elevator Lobby 3): Both the electrical/telephone room and elevator lobby are common areas and should not be included in the usable area.
- Verified Answer from Official Source:
- The correct answer is verified from the BOMA Office Standard, as referenced in NCIDQ IDPX study materials.
- "Usable area is the occupiable space within a tenant's demised premises, excluding common areas such as elevator lobbies, electrical/telephone rooms, washrooms, and stairwells that serve the entire floor." (ANSI /BOMA Z65.1-2017, Office Buildings: Standard Methods of Measurement, Section on Usable Area) The BOMA Office Standard defines usable area as the space within the tenant's demised premises, excluding common areas like elevator lobbies and electrical/telephone rooms. Option A correctly identifies Tenant 1 and Tenant 2 as the usable areas, excluding all common spaces.
- Objectives:
- * Understand BOMA standards for space measurement (NCIDQ IDPX Objective: Professional Practice).
 - * Apply space calculation methods to multi-tenant buildings (NCIDQ IDPX Objective: Project Planning).

16. Frage

Wir bemühen uns nun darum, den Kandidaten rechtzeitigen und effizienten Service zu bieten, um Ihre wertvolle Zeit zu ersparen. EchteFrage bietet Ihnen zahlreiche Lerntipps, Fragen und Antworten zur CIDQ IDPX Zertifizierungsprüfung. Einige Websites bieten Ihnen auch Lernmaterialien zur IDPX Zertifizierungsprüfung, die von guter Qualität ist und mit dem Zeit Schritt halten. Aber EchteFrage ist die einzige Website, die beste Schulungsunterlagen zur IDPX Zertifizierungsprüfung bietet. Mit Hilfe der Lernmaterialien und der Anleitung von EchteFrage können Sie die CIDQ IDPX Zertifizierungsprüfung einmalig bestehen.
