On request we can provide you with another exam of your choice absolutely free of cost.

## IFMA Certified Facility Manager Sample Questions (Q58-Q63):

### NEW QUESTION # 58

What is an Integrated Workplace Management System (IWMS)?

- A. An enterprise-level software platform that facilitates integration of data.
- B. Requires a BAS system to be in place.
- C. Must be replaced or updated every 5 years to remain viable.
- D. An energy-efficient tool to operate HVAC systems.

**Answer: A**

Explanation:

An Integrated Workplace Management System (IWMS) is a comprehensive software platform that integrates facility management, space management, maintenance, and sustainability functions.

\* Option C (Enterprise-level platform) is correct because IWMS centralizes facility data for strategic decision-making.

\* Option A (Energy-efficient tool) describes BAS, not IWMS.

- \* Option B (Requires BAS) is incorrect; IWMS can function independently.
  - \* Option D (Must be replaced every 5 years) is not a fixed rule; updates depend on business needs.
- IWMS enhances operational efficiency, cost management, and resource utilization.

#### NEW QUESTION # 59

In relation to establishing a level of acceptable risk, what should you include in your Business Continuity Plan (BCP) to help measure the plan's expected level of success against that level of risk?

- A. Lessons learned
- B. Business analysis
- C. Contracted support
- **D. Performance metrics**

**Answer: D**

Explanation:

Performance metrics in a Business Continuity Plan (BCP) help quantify success and assess risk management effectiveness. The correct answer is:

\* Performance metrics ensure that response strategies align with risk tolerance levels and provide measurable indicators of recovery speed, downtime, and business impact.

\* Why the other options are incorrect:

\* (A) Contracted support ensures resources but does not measure success.

\* (B) Lessons learned contribute to future improvements but do not track current success.

\* (C) Business analysis helps identify risks but does not measure performance against risk levels.

#### NEW QUESTION # 60

There has been a recent increase in complaints of items stolen from people's desks within a facility. What is the facility manager's initial step regarding the security of the staff and facility?

- **A. Investigate each case and remind staff to ensure all valuables are locked.**
- B. Update your security procedures to ensure that staff maintain a secure desk.
- C. Install security cameras throughout the facility to ensure you capture future incidents.
- D. Turn the matter over to a professional security company to lead an investigation.

**Answer: A**

Explanation:

When addressing security issues, facility managers must first conduct a thorough investigation to understand the scope and nature of the problem before implementing any new measures. The logical first step is to investigate each reported case, gather facts, and remind staff about securing their belongings.

\* Investigating each case ensures that management is aware of the extent of the issue and can identify any patterns (e.g., specific areas targeted or peak times of theft).

\* Educating staff about securing their valuables (e.g., locking drawers, not leaving items unattended) is a quick and effective preventive measure.

\* Security cameras (Option A) should be considered after initial fact-finding, as installing cameras may require budget approval and privacy considerations.

\* Updating security procedures (Option B) should follow after assessing the investigation's findings to ensure targeted improvements.

\* Engaging a professional security company (Option D) may be necessary if theft continues or if internal resources are insufficient.

#### NEW QUESTION # 61

A company is ready to sign a lease for a new location. The new space must be renovated before workstations can be moved. The facility manager is asked to provide the occupancy date. Why is providing the occupancy date information critical?

- A. The facility manager will lose credibility if the information provided is incorrect.
- B. The moving company must be scheduled.
- C. The date cannot be changed once the lease is signed.
- **D. The occupancy date represents when the company must begin paying rent.**

**Answer: D**

Explanation:

The occupancy date is critical because it determines when the company begins paying rent, regardless of whether renovations are complete.

- \* Lease agreements typically require rent payments from the occupancy date onward.
- \* Failure to account for renovation time could lead to unnecessary costs.
- \* Why the other options are incorrect:
- \* (A) Scheduling a moving company is important but secondary to financial commitments.
- \* (C) The date can often be negotiated if properly addressed in the lease agreement.
- \* (D) While credibility is important, financial and contractual obligations take precedence.

#### NEW QUESTION # 62

What are the three steps in conducting a risk assessment?

- A. Consultation, identification, and treatment.
- B. Analysis, consultation, and review.
- C. Likelihood, consequence, and rating.
- **D. Identification, analysis, and evaluation.**

**Answer: D**

Explanation:

The risk assessment process involves three primary steps:

- \* Identification: Recognizing potential risks that may impact the facility.
- \* Analysis: Determining the severity, probability, and potential impact of identified risks.
- \* Evaluation: Prioritizing risks based on their significance and deciding on mitigation measures.
- \* Why the other options are incorrect:
- \* (B) Consultation and review are valuable but do not define the core steps of risk assessment.
- \* (C) Treatment is a separate step that follows assessment.
- \* (D) Likelihood, consequence, and rating are part of risk analysis but do not form the complete risk assessment process.

#### NEW QUESTION # 63

.....

It is the most straightforward format of our Certified Facility Manager (CFM) exam material. The PDF document has updated and actual IFMA Exam Questions with correct answers. This format is helpful to study for the CFM exam even in busy routines. CFM Exam Questions in this format are printable and portable.
