Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q71-Q76):

NEW QUESTION # 71

The company's ten most senior executives are to have their offices outfitted with dedicated, standardized video conference cameras, microphones, and screens. The goal is to reduce the amount of technical support they require due to frequent, habitual switching

between various mobile and PC devices throughout their busy days. You must ensure that it is easier for the executives to join Meet video conferences with the dedicated equipment instead of whatever device they happen to have available.
What should you do?

- A. Set up unmanaged Chromeboxes and set the executives' homepage to meet.google.com via Chrome settings.
- B. Deploy Hangouts Meet Hardware Kits to each executive office, and associate the Meet hardware with the executives' calendars.
- C. Set up the executive offices as reservable Calendar Resources, deploy Hangouts Meet Hardware Kits, and associate the Meet hardware with the room calendars.
- D. Provision managed Chromeboxes and set the executives' Chrome homepage to meet.google.com via device policy.

Answer: C

Explanation:

Create Calendar Resources:

In the Google Workspace Admin console, navigate to "Directory" > "Buildings and resources" > "Manage resources".

Create new resources for each executive office and name them appropriately.

Deploy Hangouts Meet Hardware Kits:

Set up the Hangouts Meet Hardware Kits in each executive office.

Connect the hardware kits to the network and ensure they are configured correctly.

Associate Meet Hardware with Room Calendars:

Link each Hangouts Meet Hardware Kit to the corresponding room calendar resource.

This allows meetings scheduled in the room to automatically connect to the Meet hardware.

Set Up and Test:

Ensure that the hardware is functioning correctly by testing video conferences.

Train executives on how to use the dedicated equipment for joining Meet video conferences.

NEW QUESTION # 72

Your company recently decided to use a cloud-based ticketing system for your customer care needs. You are tasked with rerouting email coming into your customer care address, customercare@your-company.com to the cloud platform's email address, your-company@cloudprovider.com. As a security measure, you have mail forwarding disabled at the domain level.

What should you do?

- A. Create a recipient map in the Google Workspace Admin console that maps customercare@your-company.com to your-company@cloudprovider.com
- B. Create a content compliance rule in the Google Workspace Admin console to change route to your-company@cloudprovider.com
- C. Create a rule to forward mail in the customercare@your-company.com mailbox to your-company@cloudprovider.com
- D. Create a mail contact in the Google Workspace directory that has an email address of your-company@cloudprovider.com

Answer: A

Explanation:

Disable automatic forwarding <https://support.google.com/a/answer/2491924?hl=en> Redirect incoming messages to another email address <https://support.google.com/a/answer/4524505?hl=en> (Optional) To send the message to the original recipient as well as the new address, under Routing options, check the Also route to original destination box.

NEW QUESTION # 73

Your organization has users in the United States and Europe. For compliance reasons you want to ensure that user data is always stored in the region where the user is located. What should you do?

- A. Do nothing. No extra configuration is needed because user data is always stored in the region the user is located.
- B. Specify a data region policy for each Organizational Unit (OU) where users are grouped by location
- C. Create two Google Groups titled "United States" and "Europe". Assign users to either group based on location
- D. Populate the Address field on each user record ensuring the country information is accurate

Answer: B

Explanation:

Step by Step Comprehensive Detailed Explanation:

- * Access the Admin Console: Sign in to your Google Admin console.
- * Navigate to Data Regions: Click on "Account" and then "Data Regions."
- * Create Data Region Policy: Create a data region policy specifying where data should be stored.
- * Apply to OUs: Apply the data region policy to the organizational units (OUs) based on user location, ensuring data is stored in the respective regions.
- * Save Configuration: Save the settings to enforce the data region policies.

NEW QUESTION # 74

Your corporate LDAP contains the email addresses of several hundred non-employee business partners. You want to sync these contacts to Google Workspace so they appear in Gmail's address autocomplete for all users in the domain.

What are two options to meet this requirement? (Choose two.)

- A. Use the Directory API to upload a .csv file containing the contacts.
- B. Use the People API to upload a .csv file containing the contacts.
- C. **Develop a custom application to call the Domain Shared Contacts API.**
- D. Configure GCDS to populate a Group with external members.
- E. **Configure GCDS to synchronize shared contacts.**

Answer: C,E**NEW QUESTION # 75**

The organization has conducted and completed Security Awareness Training (SAT) for all employees. As part of a new security policy, employees who did not complete the SAT have had their accounts suspended. The CTO has requested to be informed of any accounts that have been re-enabled to ensure no one is in violation of the new security policy.

What should you do?

- A. Enable "Suspicious login" rule -Other Recipients: CTO
- B. Enable "Suspended user made active" rule and select "Deliver to" Super Administrator(s)
- C. Enable "Email settings changed" rule --Other Recipients: CTO
- D. **Enable "Suspended user made active" rule -Other Recipients: CTO**

Answer: D

Explanation:

CTO must be informed when creating the Suspended user made active--A suspended user is made active by an admin Alert.
