NEW QUESTION # 32

A driving relationship is _____.

- A. The link between a predecessor and the activity whose dates it controls.
- B. A finish-to-start relationship.
- C. A critical relationship.
- D. The link between two related activities.

Answer: A

Explanation:

A driving relationship is the dependency link where the predecessor activity directly governs the dates of the successor activity.

* Option A confuses "driving" with critical path relationships.

* Option B oversimplifies by focusing on one type of relationship.

* Option C is vague and does not specify the control aspect.

The driving relationship determines schedule flow and is essential for maintaining logical dependencies in CPM scheduling.

NEW QUESTION # 33

Which of the following types of delay will NOT result in a time extension and additional compensation for a contractor?

- A. Compensable delay
- B. Non-excusable delay
- C. Excusable delay
- D. Non-compensable delay

Answer: B

Explanation:

Definitions of Delays

* Excusable Delay: These are delays not caused by the contractor and may be beyond their control. They can be compensable (entitling the contractor to both time and monetary compensation) or non-compensable (entitling only time extension). Examples include acts of God or owner-caused delays.

* Non-Excusable Delay: These delays are caused by the contractor, such as poor planning or lack of resources. Non-excusable delays do not qualify for any compensation or time extensions.

* Compensable Delay: A type of excusable delay caused by the owner or their representatives that entitles the contractor to both time extension and additional compensation.

* Non-Compensable Delay: An excusable delay that entitles only time extension but no monetary compensation (e.g., natural disasters).

PSP Study Guide Reference: The PSP Study Guide emphasizes understanding the types of delays to analyze their impacts on schedules and costs. Non-excusable delays, which result from the contractor's actions, are clearly categorized as not providing grounds for time extensions or additional payments.

Analysis for Selection:

* Option A: Non-excusable delays do not provide contractors with any extensions or compensation as they result from the contractor's responsibility.

* Option B: Compensable delays provide both time and compensation and do not match the question's condition.

* Option C: Non-compensable delays, though they provide no monetary compensation, can allow time extensions under certain circumstances.

* Option D: Excusable delays generally entitle contractors to time extensions, with or without compensation depending on the type.

Conclusion: The correct answer is A. Non-excusable delay, as these delays provide neither time extensions nor compensation to the contractor.
