We believe that our Slack-Admn-201 test torrent can help you improve yourself and make progress beyond your imagination. If you buy our Slack-Admn-201 study torrent, we can make sure that our study materials will not be let you down.

Salesforce Certified Slack Administrator Sample Questions (Q97-Q102):

NEW QUESTION # 97

You're an Org Admin for an organization with an Enterprise Grid plan. You receive a list of several full members who will be leaving

the organization in 5 days, with the instruction to deactivate their accounts after their departure.
What is the best way to do this?

- A. Deactivate the members in the Organization Settings 'Members' tab.
- **B. Deactivate the members utilizing the SCIM API.**
- C. Contact Slack via /feedback to get the members deactivated.
- D. Request the Primary Org Owner do this, as they are the only one who can perform this action.

Answer: B

Explanation:

Slack recommends:

"When using SCIM provisioning, admins can automate the deactivation of user accounts through the SCIM API, ensuring synchronization with identity provider (IdP) data." Deactivating manually through the Org Settings (A) is possible but less efficient and scalable. Contacting Slack via /feedback (B) is not appropriate for standard admin tasks. Deactivation is not limited to Primary Org Owners only (D).

(Reference: Slack Administration Study Guide - User Lifecycle Management with SCIM)

-

NEW QUESTION # 98

You're an admin for your company's Slack Enterprise Grid org.

There are now too many social channels in a single workspace, and employees report difficulty finding relevant customer information.

What do you recommend as a next step?

(Select the best answer.)

- **A. Create a new Social workspace, and move the relevant channels to that workspace.**
- B. Delete social channels that have been inactive for more than 90 days.
- C. Create a new Social workspace, and make all the channels multi-workspace.
- D. Delete or consolidate some of the social channels since there are too many.

Answer: A

Explanation:

Slack recommends:

"When social channels overwhelm the workspace and impact findability of work-related content, creating a separate workspace for social and community discussions helps maintain focus and discoverability." Simply deleting channels (B, D) risks damaging community culture. Making channels multi-workspace (A) doesn't solve workspace clutter - it just duplicates visibility.

(Reference: Slack Administration Study Guide - Workspace Design for Scalability and Discoverability)

-

NEW QUESTION # 99

Paul leads an accounting team and is implementing a new expense reporting system.

He wants to update employees on the status of the system's rollout to different offices. He also wants to post links to help articles and online trainings that the team can use as resources. However, he wants to maintain control over the flow of information for these updates and would like to minimize off-topic discussion.

Which of the following would help him achieve his goal?

- A. Create a new public workspace called "Expenses" with access granted to all employees.
- B. Create a private channel called #expense-system-updates with all employees added.
- C. Create a new invite-only workspace called "Expenses."
- **D. Create a public announce-only channel for the expense system**

Answer: D

Explanation:

Slack recommends:

"Use public announce-only channels for company-wide updates. Only designated members can post, while everyone else can view and react without disrupting the information flow." This keeps updates structured and prevents off-topic discussion, while maximizing visibility to the whole organization.

(Reference: Slack Administration Study Guide - Announce-Only Channel Best Practices)

-

NEW QUESTION # 100

Your organization is in the process of determining its Slack Enterprise Grid design.

The latest draft proposal is a multi-workspace design that includes:

- * Focused workspaces for each major business function,
- * Global and Social workspaces where all organization members will be added,
- * Separate workspaces for each major external partner.

You need to evaluate the current proposal and communicate potential issues to the team leading the Enterprise Grid design and launch.

What is the most relevant issue to communicate to the team about the challenges of the current proposal?

- A. It presents challenges from both admin control and user management perspectives.
- **B. It creates challenges related to context switch and scalability in your Enterprise Grid.**
- C. It has high risk of notification and message noise compared to a single workspace design.
- D. It presents issues from a Slack Connect security perspective.

Answer: B

Explanation:

Slack warns that:

"Having too many workspaces can create challenges with context switching, where users need to frequently switch between workspaces to find information, reducing efficiency. It also impacts scalability as the organization grows." While admin and user management complexity (C) can exist, context-switching (D) is the most relevant and critical issue in multi-workspace designs like the one proposed.

(Reference: Slack Administration Study Guide - Enterprise Grid Design Best Practices)

-

NEW QUESTION # 101

You're a Slack admin at a nonprofit organization. You need to add a new workspace to your Slack Enterprise Grid. This workspace needs to support the fundraising efforts of the development team. It should be a place for the team to collaborate on upcoming campaigns, events, and conduct retrospectives on past efforts. You can't devote significant admin energy to managing this workspace, and most members of your org participate in fundraising efforts in some capacity.

What visibility setting should you select for this new workspace?

(Select the best answer.)

- **A. Open**
- B. Hidden
- C. Invite Only
- D. By Request

Answer: A

Explanation:

An Open workspace allows anyone in the organization to join without requiring invitations or approvals, minimizing admin overhead. According to Slack Enterprise Grid documentation:

"Open workspaces allow any member of the organization to join, making them ideal for widely participated efforts like fundraising, campaigns, or company-wide initiatives." Invite Only and By Request models would require manual intervention and approval, not ideal when admin resources are limited. Hidden workspaces are for restricted, confidential groups.
