Our company gives priority to the satisfaction degree of the clients on our VMCE_v12 Exam Questions and puts the quality of the service in the first place. We also have free demo of our VMCE_v12 learning guide for you to check the quality before your payment.

Veeam Certified Engineer v12 Sample Questions (Q174-Q179):

NEW QUESTION # 174

In Veeam Enterprise Manager, what granular restoration permission can be set for the Restore Operator role?

- A. OneDrive items
- B. Active Directory items
- C. SharePoint items
- D. File items

Answer: D

Explanation:

Explanation

The granular restoration permission that can be set for the Restore Operator role in Veeam Enterprise Manager is File items. This permission allows the restore operator to recover files and folders from the backup of any machine in their restore scope. The restore operator can also specify the file types that they want to recover, such as documents, images, videos, and so on1. The other options are not valid for the Restore Operator role, as they are related to application items that can only be restored by the Portal User role with appropriate delegation settings2. For more information on the Restore Operator role and its permissions, see Accounts and Roles Overview in the Veeam Backup Enterprise Manager Guide.

NEW QUESTION # 175

If you need to run a script to stop a service in order to get an application-consistent backup on a Windows server, where can the script be run?

- A. In the guest processing setting of the job, enable application-aware processing and add a pre-freeze script to the VM
- B. Copy the script to the VM and schedule the script to run prior to the start of the backup job using the Windows Task Scheduler in the VM
- C. In the virtual machines setting of the job, add a script in the scripts tab under "Run the following script before the job:"
- D. Configure the script to run on the Veeam Backup & Replication server using the Windows Task Scheduler

Answer: A

NEW QUESTION # 176

For best performance when backing up NAS file shares, which component should be connected to the network as closely as possible to the source?

- A. Backup proxy
- B. Guest interaction proxy
- C. Veeam Backup & Replication server
- D. Mount serve

Answer: A

NEW QUESTION # 177

The administrator of a VMware environment backed up by Veeam Backup & Replication has a critical server with corruption on one of its three data drives. What is the fastest way to bring this drive back online with the least disruption to business?

- A. Instant Disk Recovery
- B. Entire VM restore
- C. Instant VM Recovery
- D. Staged restore

Answer: A

Explanation:

The fastest way to bring a corrupted data drive back online with the least disruption in a VMware environment is through Instant Disk Recovery. This feature allows the administrator to quickly restore the specific affected disk from a backup, minimizing downtime and impact on business operations. NEW QUESTION # 178

What can Veeam service providers deploy in Service Provider Console 7.0?

- A. Veeam Backup for Microsoft 365
- B. Enterprise plugins
- C. Veeam Backup & Replication
- D. Veeam One

Answer: A

Explanation:

In the Service Provider Console 7.0, Veeam service providers can deploy Veeam Backup for Microsoft 365.

This allows them to offer Microsoft 365 backup and recovery services to their customers, managing the protection of Microsoft 365 data including Exchange Online, SharePoint Online, OneDrive for Business, and Microsoft Teams data. References:
