You can gain essential knowledge and clear all concepts related to the final exam by using these 300-430 practice test questions.

Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions (Q278-Q283):

NEW QUESTION # 278

You are configuring the social login for a guest network. Which three options are configurable social connectors in Cisco CMX Visitor Connect? (Choose three)

- A. Myspace
- B. LinkedIn
- C. Pinterest
- D. Google+
- E. Medium
- F. Facebook

Answer: B,D,F

Explanation:

Cisco CMX Visitor Connect supports various social connectors for guest network login. The configurable social connectors include LinkedIn, Google+, and Facebook, but not Pinterest, Medium, or Myspace.

NEW QUESTION # 279

A Cisco CMX 3375 appliance on the 10.6.1 version code counts duplicate client entries, which creates wrong location analytics. The issue is primarily from iOS clients with the private MAC address feature enabled. Enabling this feature requires an upgrade of the Cisco CMX 3375 appliance in a high availability pair to version 10.6.3. SCP transfers the Cisco CMX image, but the upgrade script run fails. Which configuration change resolves this issue?

- A. Run root patch to first upgrade to version 10.6.2 and then migrate to version 10.6.3.
- B. Upgrade the high availability pair to version 10.6.2 image first and then upgrade to version 10.6.3.
- C. Break the high availability using the `cmxha config disable` command and upgrade the primary and secondary individually.
- D. Save configuration and use the upgrade script to upgrade the high availability pair without breaking the high availability.

Answer: C

Explanation:

The issue with duplicate client entries from iOS clients with the private MAC address feature enabled can be resolved by breaking the high availability using the `cmxha config disable` command and upgrading the primary and secondary individually. This approach allows for each appliance to be upgraded without affecting the high availability pair's synchronization and operation.

NEW QUESTION # 280

An engineer is implementing profiling for BYOD devices using Cisco ISE. When using a distributed model, which persona must the engineer configure with the profiling service?

- A. Primary Admin Node
- B. Monitor Node
- C. Device Admin Node
- D. Policy Services Node

Answer: D

NEW QUESTION # 281

An engineer is implementing a FlexConnect group for access points at a remote location using local switching but central DHCP. Which client feature becomes available only if this configuration is changed?

- A. mDNS
- B. fast roaming
- C. multicast
- D. static IP

Answer: D

Explanation:
