## New XK0-005 Exam Camp, XK0-005 Latest Exam Papers

Free update for one year for XK0-005 study guide is available, namely, you don't need to spend extra money on update version, and the update version for XK0-005 exam materials will be sent to your email automatically. In addition, we are pass guarantee and money back guarantee, and if you fail to pass the exam by using XK0-005 Exam Dump of us, we will give you full refund. We have online and offline chat service for XK0-005 exam materials, and the staffs possess the professional knowledge, if you have any questions, you can consult us, and we will give you reply as quickly as we can.

CompTIA XK0-005 (CompTIA Linux+ Certification) certification exam is a highly respected certification in the IT industry, designed to validate the candidate's knowledge and skills in Linux operating systems. CompTIA Linux+ Certification Exam certification is ideal for IT professionals who work with Linux-based systems and want to enhance their knowledge and skills. XK0-005 Exam is vendor-neutral and designed by CompTIA, a leading provider of IT certifications. Passing the Linux+ certification exam demonstrates the candidate's proficiency in Linux concepts and is highly sought after by potential employers.

## CompTIA Linux+ Certification Exam Sample Questions (Q220-Q225):

### NEW QUESTION # 220

A raw VM image is being compressed with bzip2 and copied to a flash drive at /dev/hdb for off-site use by the marketing department.

Which of the following command lines accomplishes this task?

- A. **bzip2 -c /vm/mktg.img | dd of=/dev/hdb**
- B. mv /vm/mktg.img | bzip2 /dev/hdb/mktg.img.bz2
- C. cp /vm/mktg.img | bzip2 /dev/hdb/mktg.img.bz2
- D. cp -a -r /vm/mktg.img bzip2 /dev/hdb/mktg.img.zip

**Answer: A**

Explanation:

```
bzip2 -c mktg.img | dd of=/home/shahin/hosts-test/copiedfile.img
```

```
0+1 records in
```

```
0+1 records out
```

```
14 bytes copied, 3.927e-05 s, 357 kB/s
```

```
-----  
ls -la
```

```
.rw-rw-r-- shahin shahin 14 B Sun May 16 16:59:36 2021 copiedfile.img
```

### NEW QUESTION # 221

Which of the following data structures is written in JSON?

- A. ☐
- **B. ☒**
- C. ☐
- D. ☐

**Answer: B**

Explanation:

Option C is the only data structure that is written in JSON format. JSON stands for JavaScript Object Notation, and it is a lightweight and human-readable data interchange format. JSON uses curly braces to enclose objects, which consist of key-value pairs separated by commas. JSON uses square brackets to enclose arrays, which consist of values separated by commas. JSON supports six data types: strings, numbers, booleans, null, objects, and arrays. Option C follows these rules and syntax of JSON, while the other options do not. Option A is written in XML format, which uses tags to enclose elements and attributes. Option B is written in YAML format, which uses indentation and colons to define key-value pairs. Option D is written in INI format, which uses sections and equal signs to define key-value pairs. References: CompTIA Linux+ (XK0-005) Certification Study Guide, Chapter 21: Automating Tasks with Ansible, page 591.

### NEW QUESTION # 222

An administrator is running a web server in a container named web, but none of the error output is not showing. Which of the following should the administrator use to generate the errors on the container?

- A. dockerps WEB -f
- **B. dockerlogs WEB**
- C. dockerrun -nameWEB -volume/dev/stdout:/var/log/nginx/error.log
- D. docker-compose inspect WEB

**Answer: B**

Explanation:

The docker logs command is used to fetch the logs of a container. If the error output is not showing for a running container, the docker logs command can be used to view these details<sup>56</sup>.

References:<sup>5</sup>(<https://www.docker.com/blog/how-to-fix-and-debug-docker-containers-like-a-superhero/>)<sup>6</sup>

(<https://stackoverflow.com/questions/33083385/getting-console-output-from-a-docker-container>)

### NEW QUESTION # 223

A systems administrator is gathering information about a file type and the contents of a file. Which of the following commands should the administrator use to accomplish this task?

- A. file filename
- B. ls of filename
- C. grep filename
- D. touch filename

**Answer: A**

Explanation:

The file command is used to determine the type of a file by examining its contents. It can recognize many different formats, such as text, binary, executable, compressed, image, audio, video, etc. It can also display some additional information about the file, such as encoding, size, dimensions, etc. 12 References: 1: file(1) - Linux manual page 2: How to use the file command in Linux

### NEW QUESTION # 224

The administrator comptia is not able to perform privileged functions on a newly deployed system. Given the following command outputs:

Which of the following is the reason that the administrator is unable to perform the assigned duties?

- A. The administrator did not update the sudo database.
- B. The administrator's credentials need to be more complex.
- C. The administrator is not a part of the correct group.
- D. The administrator needs a password reset.

**Answer: C**

Explanation:

The reason that the administrator is unable to perform the assigned duties is because the administrator is not a part of the correct group. This is option B.

Based on the image that you sent, I can see that the user comptia has a user ID and a group ID of 1000, and belongs to only one group, which is also comptia. However, the sudoers file, which defines the permissions for users to run commands as root or other users, does not include the comptia group in any of the entries.

Therefore, the user comptia cannot use sudo to perform privileged functions on the system.

The other options are incorrect because:

A: The administrator needs a password reset.

This is not true, because the password aging information for the user comptia shows that the password was last changed on Oct 24, 2023, and it does not expire until Jan 22, 2024. There is no indication that the password is locked or expired.

C: The administrator did not update the sudo database.

This is not necessary, because the sudo database is automatically updated whenever the sudoers file is modified. There is no separate command to update the sudo database.

D: The administrator's credentials need to be more complex.

This is not relevant, because the complexity of the credentials does not affect the ability to use sudo. The sudoers file does not specify any password policy for the users or groups that are allowed to use sudo.

### NEW QUESTION # 225

.....

Without bothering to stick to any formality, our XK0-005 learning quiz can be obtained within five minutes. No need to line up or queue up to get our XK0-005 practice materials. They are not only efficient on downloading aspect, but can expedite your process of review. No harangue is included within XK0-005 Training Materials and every page is written by our proficient experts with dedication. And we have demos of the XK0-005 study guide, you can free download before purchase.
