**APPLICATION FOR EXEMPTION  
RELIGIOUS AND RELIGION BASED ORGANIZATION**

**CAROLE KEETON STRAYHORN • TEXAS COMPTROLLER OF PUBLIC ACCOUNTS**

Nonprofit religious organizations should use this application to request exemption from Texas sales tax, hotel occupancy tax, and franchise tax, if applicable. To receive a state tax exemption as a religious organization, a nonprofit religious organization must be an organized group of people regularly meeting at a particular location with an established congregation for the primary purpose of holding, conducting and sponsoring religious worship services according to the rites of their sect. Exemption from federal tax is not required to qualify for exemption from state tax as a religious organization.

The exemption for religious organizations is provided for in Sections 151.310, 156.102, and 171.058 of the Texas Tax Code, and more detailed information can be found in Comptroller's Rules 3.322, 3.161, and 3.541.

Some organizations will not qualify for exemption as a religious organization as that term is defined in Texas' law and rules, even though their activities may be religious in nature. Evangelistic associations do not qualify for exemption as religious organizations. Organizations that simply support and encourage religion as an incidental purpose, or that further religious work or teach their membership religious understanding, such as Bible study groups, prayer groups, and revivals do not qualify for exempt status under this category. Such an organization might still qualify for exemption from Texas sales taxes, and franchise tax, if applicable, based on their exemption under certain sections of the Internal Revenue Code (IRC).

Texas tax law provides an exemption from **sales** taxes on goods and services purchased for use by organizations exempt under IRC Section 501(c)(3), (4), (8), (10), or (19). However, exempt organizations are required to collect tax on most of their sales of taxable items. See *Exempt Organizations-Sales and Purchases*, Publication 96-122. Texas law also provides an exemption from **franchise** taxes for corporations exempted from the federal income tax under IRC Section 501(c)(2), (3), (4), (5), (6), (7), (8), (10), (16), (19), or (25).

If your organization has been granted federal tax exemption under one of the qualifying sections listed above, your organization will be granted an exemption from Texas sales tax, or sales and franchise tax, on the basis of the IRS exemption, as required by state law. Organizations that qualify for exemption based on a federal exemption are not exempt from hotel occupancy tax because the hotel tax law does not recognize any federal exemptions.

The laws, rules and other information about exemptions are online at:

Send the completed application along with all required documentation to:

COMPTROLLER OF PUBLIC ACCOUNTS  
Exempt Organizations Section  
P.O. Box 13528  
Austin, Texas 78711-3528

We will contact you within 10 working days after receipt of your application to let you know the status of your application. We may require an organization to furnish additional information to establish the claimed exemption. After a review of the material, we will inform the organization in writing if it qualifies for exemption. The comptroller or an authorized representative of the comptroller may audit the records of an organization at any time during regular business hours to verify the validity of the organization's exempt status.

If you have questions or need more information, contact our Tax Assistance staff at 1-800-252-5555 or, in Austin, call (512)463-4600.

You have certain rights under Ch. 559, Government Code, to review, request, and correct information we have on file about you. Contact us at the address or toll-free number listed on this form.

### 최신 Accredited Professional AP-209 무료샘플문제 (Q39-Q44):

#### 질문 # 39

Out of the below options, which three questions should a consultant typically ask during the first day of an initial implementation?

- A. What needs to be synced with Salesforce? What integration is needed with external apps?
- B. How are the different business units set up? Geographical/ functional/ both?
- C. What are the different types of services provided to customers? What are the skills required and the estimated duration?
- D. What Service Objectives and what should their corresponding weights be within the different Scheduling Policies?
- E. Which Dynamic Gantt features should be incorporated into the use cases?

정답: A,B,C

#### 설명:

During the "Day 1" or Scoping phase of an implementation, the goal is to define the high-level architecture and business model.

\* A is correct:DefiningIntegrationpoints (ERP, HR, Inventory) is a foundational requirement that dictates the project scope and data strategy.

\* D is correct:Defining theWork(Work Types, Skills, Durations) is the core of the Field Service data model. You cannot configure the system without knowing what services are being performed.

\* E is correct:Defining theTerritory Structure(Business Units) sets up the security model, sharing settings, and resource organization.

\* Options B and Care incorrect for thefirst daybecause they are detailed configuration specifics (Refinement). You cannot define "Service Objective Weights" or "Gantt Features" until you understand the basic business goals, services, and territories.

#### 질문 # 40

Technicians are tasked with performing product upgrades at customer sites. During the upgrade process, a new product is installed to replace the obsolete product. For reporting purposes, the information about the obsolete and upgraded products, as well as the customer for which the upgrade is done should be tracked in Salesforce.

Which object should an admin configure to support this process?

- A. Asset Warranty
- B. Child Asset
- C. Asset Relationship
- D. Maintenance Asset

정답: C

#### 설명:

This question asks how to track the history/link between an old asset and a new one.

\* Option C is correct.TheAsset Relationshipobject is a standard Salesforce object designed specifically to link two assets. It includes fields like Relationship Type (which can be set to "Replacement,"

"Upgrade," etc.) and From Date/To Date. This creates a clear lineage: Asset A was replaced by Asset B.

- \* Option A (Child Asset) implies a hierarchy (one is part of the other), not a replacement.
- \* Option D (Maintenance Asset) is used for Maintenance Plans (PMs), not for tracking swap/upgrade history.

#### 질문 # 41

Which of the following objects have fieldsets that allow controlling how the data is displayed in the 'Dispatcher Console'? (Choose 3 options)

- A. Assigned Resource
- **B. Service Resource**
- C. Service Territory
- **D. Resource Absence**
- **E. Service Appointment**

**정답: B,D,E**

#### 설명:

The Dispatcher Console (Gantt) allows admins to customize which fields are visible in various panels and tooltips using standard Salesforce Field Sets.

\* A is correct (Resource Absence): You can control what information appears when a dispatcher hovers over a non-availability block (e.g., "Sick Day," "Doctor's Appointment") by editing the field set on the Resource Absence object.

\* B is correct (Service Appointment): This is the most heavily customized object. You can configure field sets to control the columns in the Appointment List, the text shown on the Gantt bar, and the fields in the tooltip (hover).

\* C is correct (Service Resource): You can customize the resource list (left-hand side of the Gantt) to show fields like "Vehicle Type," "Skill Level," or "Phone Number" by editing the field set on the Service Resource object.

\* Options D and E: Service Territory and Assigned Resource do not have direct field sets that control the Dispatcher Console layout in the same way the primary transactional objects do.

#### 질문 # 42

Green Energy Solutions employs a field workforce and must ensure they have coverage to respond to emergencies, which may occur at any given time. GES' field service organization consists of several business units configured as Service Territories, of which a resource may support simultaneously.

Resources do not work in more than a single timezone at a given time, however, GES is looking for a solution to allow their resources to be available for emergency work in the off-hours, in all the territories that they may support.

Which solution should a consultant recommend?

- **A. Create a shift for the Service Resource without a specified Service Territory, set the time slot type to 'Designated' and verify that the shift is contained in the Primary Territory membership dates**
- B. Service Resources cannot be assigned to more than one Service Territory
- C. Create a shift for each Service Territory the Service Resource may belong to, set the time slot type to 'Designated' to apply to emergencies only, and verify that the shift is contained in the Primary Territory membership dates
- D. Create a shift for the Service Resource without a specified Service Territory, use recordset filter criteria to apply to emergencies only, and verify that the shift is contained in the Primary Territory membership dates

**정답: A**

#### 설명:

This scenario requires managing availability for resources who work across multiple territories (Primary and Secondary memberships) specifically for "off-hours" emergencies.

\* Option D is correct because Shifts in Salesforce Field Service allow you to define ad-hoc availability outside of standard Operating Hours. Crucially, if you create a Shift without specifying a Service Territory, that availability applies to the resource's Primary Territory by default. However, because the resource also holds Secondary Territory Memberships for the other business units, the scheduling engine (specifically the "Match Territory" Work Rule) recognizes this availability as valid for those territories as well, provided the shift falls within the membership dates.

\* Setting the Time Slot Type to 'Designated' (or 'Extended') is the standard way to mark time for specific work types (like Emergencies) using Work Rules that filter on those time slot types.

\* Option B is incorrect because creating a separate shift for every territory is administrative overhead and unnecessary when a single non-territory-specific shift can cover the resource's availability across their memberships.

\* Option A is factually incorrect; resources can have multiple territory memberships.

### 질문 # 43

Which of the following objects have fieldsets that allow controlling how the data is displayed in the 'Dispatcher Console'? (Choose 3 options)
