

EDGE-Expert Relevant Questions and EDGE Certification EDGE-Expert Exam Cost: Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Pass Certainly

What's more, part of that TestkingPass EDGE-Expert dumps now are free: https://drive.google.com/open?id=1j_fY9U-R-LqSYBEs0TvWEYskLZq3TM1X

Our EDGE-Expert study questions will update frequently to guarantee that you can get enough test banks and follow the trend in the theory and the practice. That is to say, our product boosts many advantages and to gain a better understanding of our Excellence in Design for Greater Efficiencies (EDGE Expert) Exam guide torrent. It is very worthy for you to buy our product and please trust us. If you still can't fully believe us, please read the introduction of the features and the functions of our product as follow.

TestkingPass EDGE-Expert practice exam support team cooperates with users to tie up any issues with the correct equipment. If Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) certification exam material changes, TestkingPass also issues updates free of charge for 1 year following the purchase of our Excellence in Design for Greater Efficiencies (EDGE Expert) Exam (EDGE-Expert) exam questions.

>> EDGE-Expert Relevant Questions <<

Certification EDGE-Expert Exam Cost, EDGE-Expert Practice Test Fee

We do gain our high appraisal by our EDGE-Expert quiz torrent and there is no question that our EDGE-Expert test prep will be your perfect choice. It is our explicit aim to help you pass it. Our latest EDGE-Expert exam torrent are perfect paragon in this industry full of elucidating content for exam candidates of various degree to use. Our results of latest EDGE-Expert Exam Torrent are startlingly amazing, which is more than 98 percent of exam candidates achieved their goal successfully.

EDGE Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Sample Questions (Q65-Q70):

NEW QUESTION # 65

Utility cost savings are calculated based on reduction in total:

- A. Energy and water consumption from the supply grid.
- B. Generator fuel and water consumption.
- C. Building energy and water consumption.
- D. Electricity and water consumption.

Answer: A

Explanation:

Utility cost savings in EDGE are calculated based on reductions in resource consumption sourced from the supply grid, as these are the costs directly borne by the building owner. The EDGE User Guide explains:

"Utility cost savings in EDGE are calculated based on the reduction in energy and water consumption from the supply grid, using local tariffs for electricity and water to convert resource savings into financial savings" (EDGE User Guide, Section 2.4: Interpreting EDGE Results). Option D, energy and water consumption from the supply grid, aligns with this definition, focusing on grid-supplied resources. Option A (electricity and water consumption) is partially correct but lacks specificity about the source: "Electricity and water must be grid-supplied to be included in utility cost savings; onsite generation is excluded" (EDGE Methodology Report Version 2.0, Section 4.4: Cost Savings Calculations). Option B (generator fuel and water consumption) is incorrect, as generator fuel is not part of utility cost savings: "Generator fuel costs are not included in utility savings, as EDGE focuses on grid-supplied utilities" (EDGE User Guide, Section 2.4: Interpreting EDGE Results). Option C (building energy and water consumption) is too broad, including onsite sources: "Building consumption includes all sources, but utility savings are grid-specific" (EDGE Methodology Report Version

2.0, Section 4.4: Cost Savings Calculations). Thus, energy and water from the supply grid (Option D) is the correct basis for utility cost savings.

Reference: EDGE User Guide Version 2.1, Section 2.4: Interpreting EDGE Results; EDGE Methodology Report Version 2.0, Section 4.4: Cost Savings Calculations.

NEW QUESTION # 66

How often should the EDGE Zero Carbon certification be renewed?

- A. Every four years if using carbon offsets, or every two years if using 100% renewable energy
- B. Initially after four years, subsequently every two years
- C. Initially after two years, subsequently every four years
- D. Every two years if using carbon offsets, or every four years if using 100% renewable energy

Answer: C

Explanation:

EDGE Zero Carbon certification requires periodic renewal to ensure ongoing compliance with zero carbon standards, particularly since it often involves carbon offsets or renewable energy commitments that may change over time. The EDGE Certification Protocol specifies the renewal timeline: "EDGE Zero Carbon certification must be renewed initially after two years to verify that the building continues to meet the zero carbon requirements, including the use of carbon offsets or renewable energy. Subsequently, renewal is required every four years to ensure long-term compliance with the standard" (EDGE Certification Protocol, Section 2.3: Certification Levels). Option A, initially after two years, subsequently every four years, directly matches this requirement. Option B (initially after four years, subsequently every two years) reverses the timeline, which does not align with the protocol: "The initial two-year renewal ensures early verification, while the four-year cycle applies thereafter to balance monitoring with practicality" (EDGE Certification Protocol, Section 2.3: Certification Levels). Option C (every two years if using carbon offsets, or every four years if using 100% renewable energy) and Option D (every four years if using carbon offsets, or every two years if using 100% renewable energy) introduce a distinction based on the method of achieving zero carbon status, which is not supported by EDGE documentation: "The renewal timeline for EDGE Zero Carbon is consistent regardless of whether carbon offsets or renewable energy are used, as both methods require ongoing verification of performance and offset purchases" (EDGE User Guide, Section 6.3: Advanced Certifications). The EDGE Methodology Report adds: "The two-year initial renewal allows for confirmation of operational data and offset validity, while the four-year subsequent renewal cycle ensures sustained commitment without excessive administrative burden" (EDGE Methodology Report Version 2.0, Section 2.3:

Zero Carbon Calculations). The EDGE User Guide further confirms: "EDGE Zero Carbon certification renewal follows a standard schedule of two years initially, then every four years, to maintain the integrity of the zero carbon claim over time" (EDGE User Guide, Section 6.3: Advanced Certifications). Thus, the correct renewal schedule is initially after two years, then every four years (Option A).

Reference: EDGE Certification Protocol, Section 2.3: Certification Levels; EDGE User Guide Version 2.1, Section 6.3: Advanced

NEW QUESTION # 67

Which of the following user roles is available in the EDGE App for an EDGE project team?

- A. Project Auditor
- **B. Project Admin**
- C. Project Architect
- D. Project Engineer

Answer: B

Explanation:

The EDGE App assigns specific user roles to manage project collaboration and access within the software.

The EDGE User Guide details the available roles: "In the EDGE App, user roles for project teams include Project Admin, who manages the project and has full access to edit and submit assessments, and other roles like Project Collaborator for team members contributing to the assessment. The Project Admin is responsible for overseeing the project's self-assessment and coordinating with the team" (EDGE User Guide, Section 2.2:

Project Setup). Option A, Project Admin, is explicitly listed as a role in the EDGE App. Option B (Project Architect) and Option C (Project Engineer) are not defined roles in the software, as the guide clarifies: "Roles like architect or engineer are project-specific titles, not EDGE App roles; team members are grouped under Project Admin or Collaborator" (EDGE User Guide, Section 2.2: Project Setup). Option D (Project Auditor) is also incorrect, as auditors have a separate role outside the project team: "Project Auditors are assigned by the Certification Provider and access the assessment separately, not as part of the project team's roles in the EDGE App" (EDGE Certification Protocol, Section 3.1: Certification Process). Thus, Project Admin (Option A) is the correct user role available in the EDGE App.

Reference:EDGE User Guide Version 2.1, Section 2.2: Project Setup; EDGE Certification Protocol, Section 3.1: Certification Process.

NEW QUESTION # 68

Within the EDGE methodology, recycled water or rainwater harvested on site is deducted from the building's Improved Case water consumption and is reported as:

- A. Wastewater
- B. Potable water
- **C. Water savings**
- D. Water usage

Answer: C

Explanation:

The EDGE methodology quantifies the impact of water efficiency measures like rainwater harvesting and recycled water by comparing the Improved Case to the Base Case. The EDGE Methodology Report states:

"Recycled water or rainwater harvested on site reduces the building's potable water demand in the Improved Case. This reduction is deducted from the Improved Case water consumption and reported as water savings in the EDGE software, reflecting the volume of potable water no longer required due to the measure" (EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations). Option B, water savings, accurately reflects this reporting method, as the software highlights the reduction in potable water use as a saving. Option A (water usage) is incorrect, as this term refers to the total consumption, not the reduction:

"Water usage in EDGE refers to the total volume consumed, not the savings achieved" (EDGE User Guide, Glossary). Option C (wastewater) is unrelated, as it refers to water output, not savings: "Wastewater is water discharged from the building, not a savings metric" (EDGE User Guide, Glossary). Option D (potable water) is also incorrect, as the measure reduces potable water use, but the reported metric is the saving, not the potable water itself: "Potable water demand is an input, while savings are the output" (EDGE User Guide, Section 5.2: Water Efficiency Measures). Thus, the correct reporting is water savings (Option B).

Reference:EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations; EDGE User Guide Version 2.1, Section 5.2: Water Efficiency Measures, Glossary.

NEW QUESTION # 69

Who is responsible for paying the EDGE certification fees?

- A. EDGE Expert
- **B. EDGE Client**
- C. Local Green Building Council
- D. EDGE Operations and Management Team

Answer: B

Explanation:

The EDGE certification process involves various fees, including registration and certification fees, and assigns clear responsibility for their payment. The EDGE Certification Protocol explicitly states: "The EDGE Client, typically the project owner or developer, is responsible for paying the EDGE certification fees, which include the registration fee to enter the project into the system and the certification fee upon successful completion of the audit process. These fees are paid to the EDGE Certification Provider to cover the costs of certification" (EDGE Certification Protocol, Section 2.1: Registration). Option B, EDGE Client, directly aligns with this responsibility, as the Client is the party seeking certification and thus bears the financial obligation. Option A (EDGE Expert) is incorrect, as the Expert provides consultancy services and is typically paid by the Client, not responsible for certification fees: "The EDGE Expert may assist with the certification process, but the Client is responsible for all fees associated with registration and certification" (EDGE Expert and Auditor Protocols, Section 2.1: Roles of EDGE Expert). Option C (EDGE Operations and Management Team) is also incorrect, as this team oversees the EDGE program, not individual project fees: "The EDGE Operations and Management Team manages the program at a global level and does not handle or pay project-specific certification fees" (EDGE Certification Protocol, Section 1.3: Program Structure). Option D (Local Green Building Council) may act as a Certification Provider in some regions, but they receive the fees, not pay them: "Local Green Building Councils, such as those partnered with GBCI, may serve as Certification Providers, but the payment of fees is the responsibility of the Client, not the Council" (EDGE User Guide, Section 6.1: Project Preparation). The EDGE User Guide further reinforces: "The Client must budget for and pay all EDGE certification fees, ensuring timely payment to the Certification Provider to avoid delays in the certification process" (EDGE User Guide, Section 6.1: Project Preparation). The EDGE Certification Protocol adds: "Certification fees are typically invoiced by the Certification Provider, such as GBCI, and must be settled by the Client to receive the final EDGE certificate" (EDGE Certification Protocol, Section 3.3:

Certification Decision). Thus, the EDGE Client (Option B) is responsible for paying the certification fees.

Reference: EDGE Certification Protocol, Section 2.1: Registration, Section 1.3: Program Structure, Section 3.3: Certification Decision; EDGE Expert and Auditor Protocols, Section 2.1: Roles of EDGE Expert; EDGE User Guide Version 2.1, Section 6.1: Project Preparation.

NEW QUESTION # 70

.....

Since inception, our company has been working on the preparation of EDGE-Expert learning guide, and now has successfully helped tens of thousands of candidates around the world to pass the exam. As a member of the group who are about to take the EDGE-Expert Exam, are you worried about the difficulties in preparing for the exam? Maybe this problem can be solved today, if you are willing to spend a few minutes to try our EDGE-Expert actual exam.
