Salesforce Certified Platform Sharing and Visibility Architect Sample Questions (Q17-Q22):

NEW QUESTION # 17

Sales operations at Universal Containers (UC) wants to create list views to filter opportunities for certain geographies. How should UC hide list views that are not relevant to an individual user since there will be more than SO list views?

- A. Share the list views with the appropriate queue.
- **B. Share the list views with the appropriate public group.**
- C. Share the list views with the appropriate individual users.

Answer: B

NEW QUESTION # 18

Universal Containers (UC) service reps are assigned to a profile which has View All on the Case object. The organization-wide default (OWD) for the Account and Case objects is Private.

To make sure service reps have access to all relevant information (Accounts and Contacts) to attend to customer requests, which detail should an architect consider?

- A. Service reps will be able to access the relevant Contacts if their OWD is Controlled by Parent.
- B. Service reps will NOT be able to access the relevant Accounts if their OWD is Private.
- **C. Service reps will NOT be able to access the relevant Contacts if their OWD is Controlled by Parent.**

Answer: C

NEW QUESTION # 19

Universal Containers (UC) has a team that analyzes customer orders looking for fraud. This team needs access to Invoice records (custom object, Private organization-wide default). UC has complex rules to control users' access. The architect recommended using Apex managed sharing to meet these requirements.

Which recommendation should a developer consider when implementing the changes?

- A. Use "With Sharing" keyword to enforce Field-Level Security.
- **B. Use runAs system method to test different users accessing these records.**
- C. Use "Without Sharing" keyword to make sure record visibility will be considered.

Answer: B

NEW QUESTION # 20

A sales rep (John) at Universal Containers requested to update information in an account record where he has Read-Only access.

John requested the Edit access permission from the owner of the record (Paul). Paul manually shared the record with John.

Assuming the organization-wide default of the Account object is Public Read-Only, what is the impact in the system?

- A. New AccountShare record is created. Row Cause is "Owner" and Access Level is "Full".
- B. Existing AccountShare record is updated. Row Cause is "Manual" and Access Level is "Read/Write".
- **C. New AccountShare record is created. Row Cause is "Manual" and Access Level is "Read/Write".**

Answer: C

NEW QUESTION # 21

Universal Containers created a public group with certain sales engineers to help on complex deals, as well as a sharing rule to grant access to these opportunities. The Opportunity organization-wide default is Private.

What is the impact of these sharing settings?

- **A. Sales engineers and their managers in the Role Hierarchy will also have access to these records.**
- B. Subordinates of managers who have sales engineers in the public group will also have access to these records.
- C. Other sales engineers who are in the same Role Hierarchy as the sales engineers of the public group will also have access to these records.

Answer: A

NEW QUESTION # 22

.....
