ISO-IEC-27001-Lead-Auditor-CN 최신버전 덤프 공부문제 & ISO-IEC-27001-Lead-Auditor-CN 시험대비 최신버전 자료

ExamPassdump의 IT전문가들이 자신만의 경험과 끊임없는 노력으로 최고의 PECB ISO-IEC-27001-Lead-Auditor-CN 학습자료를 작성해 여러분들이 PECB ISO-IEC-27001-Lead-Auditor-CN 시험에서 패스하도록 최선을 다하고 있습니다. 덤프는 최신 시험문제를 커버하고 있어 시험패스율이 높습니다. PECB ISO-IEC-27001-Lead-Auditor-CN 시험을 보기로 결심한 분은 가장 안전하고 가장 최신인 적중율 100%에 달하는 PECB ISO-IEC-27001-Lead-Auditor-CN 시험대비덤프를 ExamPassdump에서 받을 수 있습니다.

최신 ISO 27001 ISO-IEC-27001-Lead-Auditor-CN 무료샘플문제 (Q58-Q63):

질문 # 58

您正在作為審核組組長進行您的第一次第三方 ISMS 監督審核。您目前與審核團隊的另一位成員一起在被審核方的資料中心。

您目前所在的大房間被分成幾個較小的房間，每個房間的門上都有一個數位密碼鎖和刷卡器。您注意到兩個外部承包商使用中心接待台提供的刷卡和組合號碼進入客戶的套房進行授權的電氣維修。

您前往接待處並要求查看客戶套房的門禁記錄。這表示只刷了一張卡。你問接待員，他們回答說：“是的，這是一個常見問題。我們要求每個人都刷卡，但尤其是承包商，一個人往往會刷卡，而其他人只是‘尾隨’進來”，但我們知道他們是誰接待處簽到。

根據上述情況，您現在會採取下列哪一項行動？

- A. 針對控制 A.7.6「在安全區域工作」提出不符合項，因為尚未定義在安全區域工作的安全措施
- B. 由於尚未與供應商就資訊安全要求達成一致，因此針對控制措施 A.5.20「解決供應商關係中的資訊安全問題」提出不符合項
- C. 告訴組織他們必須寫信給承包商，提醒他們需要適當使用門禁卡
- D. 提供改進機會，在接待處設置大型標牌，提醒每個需要進入的人必須始終使用刷卡
- E. 由於安全區域未充分保護，因此針對控制 A.7.2「物理進入」提出不符合項
- F. 提供改進機會，承包商在訪問安全設施時必須始終有人陪同
- G. 確定是否有任何額外的有效安排來驗證個人對安全區域（例如閉路電視）的存取權限
- H. 不採取任何行動。無論有什麼建議，承包商都將始終以這種方式行事

정답: E

설명:

According to ISO/IEC 27001:2022, which specifies the requirements for establishing, implementing, maintaining and continually improving an information security management system (ISMS), control A.7.2 requires an organization to implement appropriate physical entry controls to prevent unauthorized access to secure areas¹. The organization should define and document the criteria for granting and revoking access rights to secure areas, and should monitor and record the use of such access rights¹. Therefore, when auditing the organization's application of control A.7.2, an ISMS auditor should verify that these aspects are met in accordance with the audit criteria.

Based on the scenario above, the auditor should raise a nonconformity against control A.7.2, as the secure area is not adequately protected from unauthorized access. The auditor should provide the following evidence and justification for the nonconformity:

* Evidence: The auditor observed two external contractors using a swipe card and combination number provided by the centre's reception desk to gain access to a client's suite to carry out authorized electrical repairs. The auditor checked the door access record for the client's suite and found that only one card was swiped. The auditor asked the receptionist and was told that it was a common problem that contractors tend to swipe one card and tailgate their way in, but they were known from the reception sign-in.

* Justification: This evidence indicates that the organization has not implemented appropriate physical entry controls to prevent unauthorized access to secure areas, as required by control A.7.2. The organization has not defined and documented the criteria for granting and revoking access rights to secure areas, as there is no verification or authorization process for providing swipe cards and combination numbers to external contractors. The organization has not monitored and recorded the use of access rights to secure areas, as there is no mechanism to ensure that each individual swipes their card and enters their combination number before entering a secure area. The organization has relied on the reception sign-in as a means of identification, which is not sufficient or reliable for ensuring information security.

The other options are not valid actions for auditing control A.7.2, as they are not related to the control or its requirements, or they are not appropriate or effective for addressing the nonconformity. For example:

* Take no action: This option is not valid because it implies that the auditor ignores or accepts the nonconformity, which is contrary to the audit principles and objectives of ISO 19011:2018², which provides guidelines for auditing management systems.

* Raise a nonconformity against control A.5.20 'addressing information security in supplier relationships' as information security requirements have not been agreed upon with the supplier: This option is not valid because it does not address the root cause of the nonconformity, which is related to physical entry controls, not supplier relationships. Control A.5.20 requires an organization to agree on information security requirements with suppliers that may access, process, store, communicate or provide IT infrastructure components for its information assets¹. While this control may be relevant for ensuring information security in supplier relationships, it does not address the issue of unauthorized access to secure areas by external contractors.

* Raise a nonconformity against control A.7.6 'working in secure areas' as security measures for working in secure areas have not been defined: This option is not valid because it does not address the root cause of the nonconformity, which is related to physical entry controls, not working in secure areas. Control A.7.6 requires an organization to define and apply security measures for working in secure areas¹.

While this control may be relevant for ensuring information security when working in secure areas, it does not address the issue of unauthorized access to secure areas by external contractors.

* Determine whether any additional effective arrangements are in place to verify individual access to secure areas e.g. CCTV: This option is not valid because it does not address or resolve the nonconformity, but rather attempts to find alternative or compensating controls that may mitigate its impact or likelihood. While additional arrangements such as CCTV may be useful for verifying

individual access to secure areas, they do not replace or substitute the requirement for appropriate physical entry controls as specified by control A.7.2.

* Raise an opportunity for improvement that contractors must be accompanied at all times when accessing secure facilities: This option is not valid because it does not address or resolve the nonconformity, but rather suggests a possible improvement action that may prevent or reduce its recurrence or severity. While accompanying contractors at all times when accessing secure facilities may be a good practice for ensuring information security, it does not replace or substitute the requirement for appropriate physical entry controls as specified by control A.7.2.

* Raise an opportunity for improvement to have a large sign in reception reminding everyone requiring access must use their swipe card at all times: This option is not valid because it does not address or resolve the nonconformity, but rather suggests a possible improvement action that may increase awareness or compliance with the existing controls. While having a large sign in reception reminding everyone requiring access must use their swipe card at all times may be a helpful reminder for ensuring information security, it does not replace or substitute the requirement for appropriate physical entry controls as specified by control A.7.2.

* Tell the organisation they must write to their contractors, reminding them of the need to use access cards appropriately: This option is not valid because it does not address or resolve the nonconformity, but rather instructs the organization to take a corrective action that may not be effective or sufficient for ensuring information security. While writing to contractors, reminding them of the need to use access cards appropriately may be a communication measure for ensuring information security, it does not replace or substitute the requirement for appropriate physical entry controls as specified by control A.

7.2.

질문 # 59

選出最能完成句子的單字:

Select the words that best complete the sentence:

"The purpose of a third-party audit is to _____ an organisation's _____ to inform _____ decision."

To complete the sentence with the best word(s), click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable text from the options below. Alternatively, you may drag and drop the option to the appropriate blank section.

approve inspect a compliance an accreditation products evaluate management system a certification processes

정답:

설명:

Select the words that best complete the sentence:

"The purpose of a third-party audit is to **evaluate** _____ an organisation's **management system** to inform _____ decision."

To complete the sentence with the best word(s), click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable text from the options below. Alternatively, you may drag and drop the option to the appropriate blank section.

approve inspect a compliance an accreditation products **evaluate** management system a certification processes

질문 # 60

以下選項是第一方審核中涉及的關鍵操作。對階段進行排序以顯示操作發生的順序。

Appoint an audit team leader

Prepare the audit checklist

Gather objective evidence

Review audit evidence

Document findings

Issue the report

To complete the sequence click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable text from the options below. Alternatively, you may drag and drop the options to the appropriate blank section.

Prepare the audit checklist

Gather objective evidence

Review audit evidence

Document findings

PECB

질문 # 61

在與被審計方初次聯繫之前發送業務約定書的主要原因是什麼？

- A. 建立稽核目標
- B. 確認進行稽核的權限
- C. 提供初步審計細節並安排初次聯繫

정답: C

설명:

Comprehensive and Detailed In-Depth

B. Correct Answer:

The engagement letter serves to inform the auditee about the audit details, including:

Audit scope

Audit schedule

Expectations from both parties

It formally introduces the audit process and schedules the initial contact.

A. Incorrect:

The authority to conduct the audit is established by the certification body's agreement, not just the engagement letter.

C. Incorrect:

Audit objectives are determined in the planning phase and are not the primary function of the engagement letter.

질문 # 62

문제:

關於資訊安全中的威脅和漏洞，下列哪一項敘述不正確？

- A. 脆弱性可分為內在脆弱性和外在脆弱性，前者與資產本身的特性相關，後者與外在因素相關。
- B. 所有漏洞都需要立即實施控制措施，無論相應的威脅為何。
- C. 威脅必須利用漏洞才能對資訊的機密性、完整性和/或可用性產生負面影響

정답: B

설명:

Comprehensive and Detailed In-Depth Explanation:

* C. Incorrect Statement - Not all vulnerabilities require immediate remediation. Risk assessment determines whether controls are necessary. Some vulnerabilities pose low risks and may not need urgent fixes.

* A. Correct Statement - Vulnerabilities can be intrinsic (inherent flaws) or extrinsic (caused by external misconfigurations).

* B. Correct Statement - Threats must exploit vulnerabilities to cause harm.

This aligns with ISO/IEC 27001:2022 Annex A Control A.8.8 (Management of Technical Vulnerabilities).

질문 # 63

.....

빨리 ExamPassdump 덤프를 장바구니에 넣으시죠. 그러면 100프로 자신감으로 응시하셔서 한번에 안전하게 패스하실 수 있습니다. 단 한번으로 PECB ISO-IEC-27001-Lead-Auditor-CN 인증 시험을 패스한다..... 여러분은 절대 후회할 일 없습니다.
