HOT ASIS-PSP Latest Test Braindumps: Physical Security Professional Exam - High-quality ASIS New ASIS-PSP Test Preparation

You can learn from your Physical Security Professional Exam (ASIS-PSP) practice test mistakes and overcome them before the actual Physical Security Professional Exam (ASIS-PSP) exam. The software keeps track of the previous Physical Security Professional Exam (ASIS-PSP) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the ASIS ASIS-PSP Practice Test immediately, which is an excellent way to understand which area needs more attention.

To be eligible to take the ASIS-PSP Exam, candidates must have at least four years of experience in physical security or a related field, or a combination of education and experience. ASIS-PSP exam covers a range of topics such as physical security risk assessment, security program management, access control systems, perimeter security, and CCTV systems. It consists of 125

multiple-choice questions and is a four-hour timed exam.

ASIS Physical Security Professional Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

What are used only for handling and storing high-value cargo?

- A. Exclusion areas
- B. Multiple areas
- C. None of the above
- D. Limited areas

Answer: A

Explanation:

Exclusion areas are the most secure zones within a controlled facility, designed specifically for handling or storing high-value, classified, or critical assets. These areas have strict access controls, surveillance, and protective measures in place to prevent unauthorized access or theft.

Limited areas (A) offer less stringent protection than exclusion areas.

Multiple areas (C) is a non-standard term.

"None of the above" (D) is incorrect because exclusion areas is the correct answer.

NEW QUESTION # 18

What is an operational method in which the very act of the attack is dependent upon the death of the perpetrator?

- A. Suicide attack
- B. Time bomb attack
- C. Terrorist attack

Answer: A

NEW QUESTION # 19

The temperature at which a solid fuel will inflame without direct flame contact is known as:

- A. Agitate temperature
- B. Ignition temperature
- C. None of the above
- D. Excess temperature

Answer: B

NEW QUESTION # 20

The term used to express the output of a light source is called a:

- A. Fresnel
- B. Lumen
- C. Pixel
- D. Watt

Answer: B

Explanation:

Lumen is the unit used to measure the luminous flux or total amount of visible light emitted by a source. It quantifies brightness and is crucial in lighting design for security applications.

A (Pixel) relates to image resolution.

B (Watt) measures energy consumption, not light output.
D (Fresnel) refers to a type of lens used to focus or direct light.

NEW QUESTION # 21

Contingency planning is the result of which four major components?

- A. basic planning, crisis management, business recovery, business resumption
- B. under investigation, crisis management, business recovery, pressure devices
- **C. emergency response, crisis management, business recovery, business resumption**
- D. emergency response, crisis management, pressure devices, risk analysis

Answer: C

Explanation:

Comprehensive Detailed Explanation:

Contingency planning in security and business continuity comprises four key components:

Emergency Response - immediate action to protect life and assets.

Crisis Management - command, communication, and decision-making during crises.

Business Recovery - restoring critical functions temporarily.

Business Resumption - restoring full, normal operations post-disruption.

Other options include irrelevant terms such as "pressure devices" or "under investigation," which are not core to contingency planning.
