AP-217 Reliable Exam Questions | Test AP-217 Simulator

App online version being suitable to all kinds of digital equipment is supportive to offline exercises on the condition that you practice it without mobile data. These versions of AP-217 test guide make our customers sublimely happy. So they are great AP-217 test guide with high approbation. Our AP-217 Torrent prep is fabulous with inspired points of questions for your reference. After your practice and regular review of our AP-217 exam questions the advancement will be obvious, and your skills of the exam will be improved greatly.

Salesforce Media Cloud Accredited Professional Sample Questions (Q36-Q41):

NEW QUESTION # 36

A publishing company has an existing media plan creation process that was setup using OmniStudio a few months ago. A new requirement has come up where the user will be required to enter a new secondary budget field and this field should be stored with the rest of the media plan details.

On which object should a Consultant add this field so that it is stored with the rest of the media plan and can be added to the appropriate OmniScript?

- **A. Media Plan Placement**
- B. Quote
- C. Opportunity
- D. Order

Answer: A

NEW QUESTION # 37

A Consultant is asked to help design a solution which could aid a company in expanding their reach into the small and medium business (SMB) segment. This has traditionally been a challenge for a company in the direct-sales channel because the small and medium business greatly outnumber the Sales team.

What should the Consultant do in the design to allow for Advertiser/Agency to self-service their media plans?

- A. Set up Web-to-Lead and have the Advertiser/Agency submit their media plan through a website so the Sales team can later take ownership of the record and follow up to finalize the media plan.
- B. Set up a public user, which anyone can use to create their own media plan, and provide their company information in the record detail.
- **C. Leverage the Advertising Sales Management Self-Care feature so that approved Advertiser/Agency can access an Experience Cloud portal where they can create and track their media plans.**
- D. Build an Experience Cloud with the Customer Service template for the Advertiser to navigate the product catalog and configure the products in the site.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Advertising Sales Management (ASM) Self-Care is a built-in feature in Media Cloud that allows approved Advertisers and Agencies to use an Experience Cloud portal for creating and tracking media plans. This is the recommended solution to enable self-service while maintaining controlled access, which is critical for scaling SMB reach efficiently. Web-to-Lead or public users lack the robustness and security of the Self-Care portal.

NEW QUESTION # 38

A Consultant working on the implementation of Media Cloud for a publishing company has been asked by an IT Manager at the publishing company to better understand the structure of the Media Cloud data model.

How should the Consultant describe the characteristics of the Media Cloud data model?

- **A. It is composed of Custom and Standard Objects.**
- B. It is composed exclusively of Standard Objects.

- C. It is composed exclusively of Custom Objects.
- D. It is composed of Custom and Standard Objects with no extensions.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Media Cloud's data model includes both standard Salesforce objects (like Account, Contact, Quote) and custom objects specifically designed to handle media-related data. This hybrid model leverages Salesforce's core platform while extending it for media sales and delivery.

NEW QUESTION # 39

A customer needs to implement an automated Continuous Integration and Continuous Development (CI/CD) workflow where developers will work on their own Developer orgs to configure different OmniScripts. The developers then need to migrate the changes they have done to a sandbox that will be used for testing before promoting changes to Production.

Which tool should developers use to automate the migration of OmniStudio DataPacks and Salesforce metadata within the Media Cloud orgs?

- **A. IDX Build Tool**
- B. IDX Workbench
- C. Data Loader
- D. Backup and Restore Automation

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

IDX Build Tool is the recommended tool for automating migration and deployment of OmniStudio DataPacks and metadata between Salesforce orgs, supporting CI/CD workflows. IDX Workbench is more manual, and Backup and Restore Automation and Data Loader do not support OmniStudio DataPacks.

NEW QUESTION # 40

Cloud Kicks is setting up a new instance for Media Cloud and their Sales Reps should only see opportunities that they have created. When Sales Managers run reports, they need to see the data for all the reps that report to them.

How should a Consultant set this up?

- A. Set the organization wide default (OWD) for the Opportunity object to public. Use Apex Sharing to ensure Manager's can see the records owned by users below them in the role hierarchy.
- B. Set the organization wide default (OWD) for the Opportunity object to public. Filter the reports to show the records owned by users below them in the role hierarchy.
- **C. Set the organization wide default (OWD) for the Opportunity object to private. Set up the role hierarchy to ensure Managers can see the records owned by users below them in the role hierarchy.**
- D. Set the organization wide default (OWD) for the Opportunity object to private. Use sharing rules to share records owned by Sales Reps that are below the Manager in the role hierarchy.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Setting the OWD to private restricts record visibility to owners by default. Using the role hierarchy allows managers to view records owned by subordinates without additional sharing rules or code. This is the standard Salesforce approach for hierarchical visibility. Public OWD would not restrict sales reps' views.
