Splendid 1Z0-182 Exam Braindumps are from High-quality Learning Quiz - RealExamFree

P.S. Free & New 1Z0-182 dumps are available on Google Drive shared by RealExamFree: https://drive.google.com/open?id=1xDwu0e30I4ypatgLeSdNNF2pJlBmsQHH

The passing rate of our 1Z0-182 training quiz is high as 98% to 100% and the hit rate is also high. Our professional expert team seizes the focus of the exam and chooses the most important questions and answers which has simplified the important information and follow the latest trend to make the client learn easily and efficiently on our 1Z0-182 Study Guide. YOu can also free download the demos of our 1Z0-182 learning materials to have a check.

Oracle 1Z0-182 Exam Syllabus Topics:

Topic	Details
Topic 1	• Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.
Topic 2	• Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.
Topic 3	• Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.
Topic 4	• Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.
Topic 5	• Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.
Topic 6	• Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).

Topic 7	• Managing Tablespaces and Datafiles: This section assesses the abilities of Storage Administrators in creating, modifying, and describing tablespaces. It also covers recognizing data storage requirements and understanding datafile placement for efficient storage management.
Topic 8	• Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.

1Z0-182 Reliable Test Book & Valid 1Z0-182 Test Review

1Z0-182 study material has a high quality service team. First of all, the authors of study materials are experts in the field. They have been engaged in research on the development of the industry for many years, and have a keen sense of smell for changes in the examination direction. During your installation, 1Z0-182 exam questions hired dedicated experts to provide you with free remote online guidance. During your studies, 1Z0-182 Exam Torrent also provides you with free online services for 24 hours, regardless of where and when you are, as long as an email, we will solve all the problems for you. At the same time, if you fail to pass the exam after you have purchased 1Z0-182 training materials, you just need to submit your transcript to our customer service staff and you will receive a full refund.

Oracle Database 23ai Administration Associate Sample Questions (Q68-Q73):

NEW QUESTION # 68
You want to apply the principle of least privilege in all your live databases. One of your requirements is to revoke unnecessary privileges from all users who have them using Privilege Analysis. Which two types of analyses can be done using the DBMS_PRIVILEGE_CAPTURE package?

- A. Analysis of privileges granted indirectly to a role that are then used by a user who has been granted that role.
- B. Analysis of all privileges used by the SYS user.
- C. Analysis of privileges that a user has on other schemas' objects.
- D. Analysis of privileges that a user has on their own schema objects.
- E. Analysis of privileges granted directly to a role that are then used by a user who has been granted that role.

Answer: A,E

Explanation:
A .False. Limited to captured privileges, not all schema objects.
B .False. SYS is excluded from capture.
C .True. Captures indirect role privileges used.
D .True. Captures direct role privileges used.
E .False. Focus is on roles, not self-owned objects broadly.

NEW QUESTION # 69
Your data center uses Oracle Managed Files (OMF) for all databases. All tablespaces are smallfile tablespaces. SALES_Q1 is a permanent user-defined tablespace in the SALES database. The following command is about to be issued by a DBA logged in to the SALES database: ALTER TABLESPACE sales_q1 ADD DATAFILE; Which two actions independently ensure that the command executes successfully?

- A. Ensure that DB_RECOVERY_FILE_DEST and DB_CREATE_FILE_DEST each specify locations with at least 50 MB of available space.
- B. Ensure that DB_RECOVERY_FILE_DEST and DB_CREATE_FILE_DEST each specify locations with at least 50 MB of available space.
- C. Ensure that DB_CREATE_FILE_DEST specifies a location with at least 100 MB of available space.
- D. Add the AUTOEXTEND ON clause with NEXT set to 100M.
- E. Specify a path in the DATAFILE clause of the command specifying a location with at least 100 MB of available space.

Answer: A,C

Explanation:
With OMF enabled, Oracle automatically manages file creation. The command ALTER TABLESPACE sales_q1 ADD DATAFILE without a file specification relies on initialization parameters:
A . Specify a path in the DATAFILE clause ... with at least 100 MB of available space.False. With OMF, explicitly specifying a path overrides OMF behavior, but it's not required for success if OMF parameters are set correctly.
B . Add the AUTOEXTEND ON clause with NEXT set to 100M.False. AUTOEXTEND is optional and affects file growth, not the initial creation success, which depends on available space in the OMF location.
C . Ensure that DB_RECOVERY_FILE_DEST and DB_CREATE_FILE_DEST each specify locations with at least 50 MB of available space.True. If both parameters are set,Oracle may use either for data files (depending on context), and sufficient space (e.g., 50 MB minimum for a smallfile) ensures success.
D . Ensure that DB_CREATE_FILE_DEST specifies a location with at least 100 MB of available space.True. This is the primary OMF parameter for data files; sufficient space (typically 100 MB minimum for a new file) guarantees the command succeeds.
E . Ensure that DB_RECOVERY_FILE_DEST and DB_CREATE_FILE_DEST each specify locations with at least 50 MB of available space.False. This is redundant with C; only one needs sufficient space, though C's phrasing makes it a valid independent action.

NEW QUESTION # 70
Which four statements are true about the Oracle Server architecture?

- A. Each server process or background process has their own Program Global Area (PGA).
- B. A session represents the state of a user's login to an instance.
- C. The buffer cache and the redo log buffer are held in the large pool.
- D. A person or program can have more than one session with an instance by logging in with different users.
- E. A person or program can have more than one session with an instance by logging in with the same user.
- F. A connection represents the state of a user's login to an instance.

Answer: A,B,D,E

Explanation:
A .True. Multiple sessions with different users are possible.
B .False. Buffer cache and redo log buffer are in SGA, not large pool.
C .True. Session tracks login state.
D .True. Each process has its own PGA.
E .False. Connection is the network link; session is the state.
F .True. Same user can have multiple sessions (e.g., via different terminals).

NEW QUESTION # 71
Which two statements are true about the configuration and use of UNDO?

- A. Unexpired UNDO is always retained.
- B. UNDO_RETENTION specifies how long all types of UNDO are retained.
- C. Active UNDO is always retained.
- D. UNDO_RETENTION specifies for how long Oracle attempts to keep unexpired UNDO.
- E. UNDO_RETENTION specifies for how long Oracle attempts to keep expired and unconsumed UNDO.

Answer: C,D

NEW QUESTION # 72
Which three statements are true about row chaining and row migration done by Oracle database block space management?

- A. Row pieces of a chained row must always reside in different blocks.
- B. A migrated row results in an update to any index on the table to point the row ID in the index to the row's new location.
- C. Insert statements can result in a migrated row.
- D. Update statements can result in one or more migrated rows.
- E. Update statements can result in one or more chained rows.

Answer: B,D,E

Explanation:
A .True. Migration updates index ROWIDs.
B .True. Updates can migrate rows if space is insufficient.
C .True. Large updates can chain rows across blocks.
D .False. Chained rows may span blocks but aren't required to.
E .False. Inserts don't migrate; they chain if too large initially.

NEW QUESTION # 73

......

You may find that on our website, we have free renewal policy for customers who have bought our 1Z0-182 practice quiz. You can enjoy one year free updated service. This policy greatly increase the pass percentage of the candidates if they can't pass in one time or in the limited date. And they can enjoy 50% off if they buy them again one year later. All in all, our service is completely considerate. Come to experience our 1Z0-182 Training Materials.
