

# EXIN CDCS Study Guides & CDCS Valid Torrent

P.S. Free 2026 EXIN CDCS dumps are available on Google Drive shared by LatestCram [https://drive.google.com/open?id=1NpYWQPUFaP-a0hjFy6b\\_QFzTXVEHruVJ](https://drive.google.com/open?id=1NpYWQPUFaP-a0hjFy6b_QFzTXVEHruVJ)

I am glad to introduce a secret weapon for all of the candidates to pass the exam as well as get the related certification without any more ado-- our CDCS study materials. You can only get the most useful and efficient study materials with the most affordable price. With our CDCS practice test, you only need to spend 20 to 30 hours in preparation since there are all essence contents in our CDCS Study Materials. What's more, if you need any after service help on our CDCS exam guide, our after service staffs will always offer the most thoughtful service for you.

## EXIN CDCS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Data Centre Environmental Considerations and Efficiency: This section evaluates the proficiency of data center professionals in addressing environmental factors and promoting efficiency within data center operations. The target audience, including data center managers and engineers, will be tested on their ability to identify and implement measures that enhance energy efficiency, cooling management, and sustainable practices.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Designing and Implementing a Data Centre: In this module, the exam assesses the knowledge of EXIN data center professionals tasked with the design and implementation of data centers. Candidates will learn the key principles of creating an efficient data center layout, including considerations for scalability, redundancy, and security.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Data Centre Life Cycle and Standards: This section of the exam measures the skills of data center professionals and covers the various stages involved in the life cycle of a data center, from planning and design to implementation and decommissioning.</li> </ul>

## Updated CDCS Study Guides | Amazing Pass Rate For CDCS Exam | Marvelous CDCS: EXIN EPI Certified Data Centre Specialist

Success is has method. You can be successful as long as you make the right choices. LatestCram's EXIN CDCS exam training materials are tailored specifically for IT professionals. It can help you pass the exam successfully. If you're still catching your expertise to prepare for the exam, then you chose the wrong method. This is not only time-consuming and laborious, but also is likely to fail. But the remedy is not too late, go to buy LatestCram's EXIN CDCS Exam Training materials quickly. With it, you will get a different life. Remember, the fate is in your own hands.

### EXIN EPI Certified Data Centre Specialist Sample Questions (Q46-Q51):

#### NEW QUESTION # 46

A 5kW (power consumption) server keeps crashing with the message 'temperature too high'.

The intake temperature is measured at 25 °C/77 °F and a relative humidity (RH) level of 50%.

The exhaust temperature is 29 °C/84 °F and 45% RH.

The raised floor is providing an adequate amount of CFM/CMH at a reasonable velocity.

The pressure under the raised floor is approximately 25 Pa/0.1 inch H#O.

Analyze the situation and indicate what the most likely cause is for this server to crash.

- A. No cause could be determined as the CFM/CMH of the air conditioning equipment is not stated
- B. Dust inside the server causing issues with convection-based heat transfer**
- C. The raised floor pressure is too low and/or the raised floor tile % opening is not adequate
- D. The exhaust temperature is exceeding the ASHRAE recommended values

#### Answer: B

Explanation:

The server's repeated overheating despite adequate intake and exhaust temperatures suggests that dust buildup inside the server may be impeding heat transfer. Dust accumulation can obstruct airflow within the server, insulate components, and disrupt the convection-based cooling systems that regulate internal temperatures, leading to overheating and potential hardware failures.

Detailed Explanation:

While the intake and exhaust temperatures appear within acceptable ranges, internal dust can reduce airflow and impede cooling efficiency, causing internal components to overheat despite seemingly normal ambient conditions. Regular cleaning and maintenance are critical for preventing dust-related issues, especially in high-powered equipment like a 5kW server.

EPI Data Center Specialist References:

EPI emphasizes regular maintenance to prevent dust buildup in data center equipment. Dust can significantly impact cooling efficiency and lead to overheating, which underlines the importance of routine cleaning for optimal server performance.

#### NEW QUESTION # 47

A data center requires an audit for ANSI/TIA-942 Rated-3 compliance. Will the network architecture be part of this audit?

- A. No, only the type of cabling used will be audited
- B. No, as concurrent maintainability only applies to electrical and mechanical
- C. Yes, amongst other aspects the network architecture should be Rated-3 compliant with ANSI/TIA-942**
- D. Yes, but only if network administration does not comply with ANSI/TIA-606

**Answer: C**

Explanation:

ANSI/TIA-942 defines ratings across four areas:

- \* Architectural
- \* Electrical
- \* Mechanical
- \* Telecommunications (network cabling + architecture)

A data center cannot be considered Rated-3 unless all four areas meet the concurrent maintainability criteria.

For telecom/networking, this means dual redundant backbone cabling, proper pathways, and separate routes to ensure no single point of failure.

\* A and B are incorrect because they limit scope to electrical/mechanical or cabling only.

\* C is incomplete: administration (ANSI/TIA-606) is part of compliance but architecture redundancy is mandatory.

References: ANSI/TIA-942-B §5.2 (Rated Levels), Annex E (Telecommunications infrastructure examples).

**NEW QUESTION # 48**

The building in which the computer room is housed is required to have a sprinkler system. The building is therefore equipped with a wet pipe system.

What action, if any, should you recommend for the computer room?

- A. Replace the wet pipe system with a dry pipe system
- B. Maintain the current wet pipe system
- **C. Replace the wet pipe system with a pre-action system**
- D. Replace the wet pipe system with a deluge system

**Answer: C**

Explanation:

In computer rooms, replacing a wet pipe system with a pre-action system is advisable. Pre-action systems provide additional protection by requiring two triggers (e.g., heat and smoke) before water is released, minimizing the risk of accidental discharge and water damage, which is crucial for safeguarding sensitive IT equipment.

Detailed Explanation:

Wet pipe systems contain water in the pipes at all times, which poses a higher risk of accidental discharge. Pre-action systems, however, only fill the pipes with water upon detection of a fire, reducing the risk of water-related damage due to leaks or malfunctions. This approach is considered best practice for environments housing sensitive electronic equipment.

EPI Data Center Specialist References:

EPI advises using pre-action fire suppression in data centers to reduce risks associated with accidental water release, providing a safer and more controlled fire response that better protects critical infrastructure.

**NEW QUESTION # 49**

You are allowed to use a calculator for this question. A battery bank is rated at a total capacity of 600 Ah.

Calculate how much charging current the rectifier should be able to supply as charging current.

- A. 60 Amperes
- B. 12 Amperes
- C. 80 Amperes
- **D. 30 Amperes**

**Answer: D**

Explanation:

To determine the charging current for a battery bank, a general rule of thumb is that the charging current should be 5% of the total battery capacity. For a battery rated at 600 Ah, this calculation would be:

$600 \text{ Ah} \times 0.05 = 30 \text{ Amperes}$   $600 \text{ Ah} \times 0.05 = 30 \text{ Amperes}$  This ensures the battery is charged efficiently without overloading the rectifier or risking battery damage.

Detailed Explanation:

Battery charging current is typically set as a percentage of the battery's capacity to balance effective charging with longevity and safety. A 5% charging rate is standard for lead-acid batteries, which would be 30 Amperes for a 600 Ah battery bank.

EPI Data Center Specialist References:

EPI standards recommend calculating charging currents based on a percentage of the battery capacity to ensure safety and efficiency, aligning with best practices for battery management in data centers.

### NEW QUESTION # 50

In order to save energy, you are going to install an automated system to switch off lights. What should be taken into consideration when installing such a system?

- A. The system should not be based on motion detection as the lights might suddenly switch off while staff is still at work.
- B. It is not advisable to use such a system since it will reduce the lifetime of LED lighting.
- **C. At all times, the levels should allow for security cameras to function properly.**
- D. Security guards should perform regular inspections verifying the system works.

**Answer: C**

Explanation:

When installing an automated lighting system, especially in a security-sensitive area like a data center, it's essential to ensure that lighting levels support security camera functionality at all times. Sufficient lighting is necessary for cameras to capture clear footage, ensuring continuous monitoring and security regardless of occupancy.

Detailed Explanation:

Automated lighting based on occupancy or time settings can reduce energy costs, but it must be configured to maintain adequate illumination for surveillance. Security cameras require minimum lighting levels to operate effectively, so lighting should be configured to avoid compromising security.

EPI Data Center Specialist References:

EPI emphasizes security and safety in data centers, advising that lighting systems should maintain levels conducive to effective surveillance, ensuring operational security even when lights are automatically controlled.

### NEW QUESTION # 51

.....

Our CDCS Study Materials are recognized as the standard and authorized study materials and are widely commended at home and abroad. Our CDCS study materials boast superior advantages and the service of our products is perfect. We choose the most useful and typical questions and answers which contain the key points of the test and we try our best to use the least amount of questions and answers to showcase the most significant information.
