Now they have become certified Palo Alto Networks Network Security Professional Certification Exam experts and pursue a rewarding career in the top world brands. You can also trust top-notch and easy-to-use Palo Alto Networks NetSec-Pro practice test questions. The Palo Alto Networks Network Security Professional (NetSec-Pro) exam questions are checked and verified by experienced and qualified Palo Alto Networks Network Security Professional (NetSec-Pro) exam trainers. They have years of experience and knowledge to collect, design, and answer the real Palo Alto Networks Network Security Professional (NetSec-Pro) exam questions.

## Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.</li></ul>

## 2026 High-quality NetSec-Pro Premium Files | 100% Free Latest Palo Alto Networks Network Security Professional Exam Answers

NetSec-Pro practice exam takers can even access the results of previous attempts which helps them in knowing and overcoming their mistakes before appearing in the NetSec-Pro final test. There are thousands of students that bought iPassleader's NetSec-Pro Practice Exam and got success on their initial tries. We guarantee that if you take our provided Palo Alto Networks NetSec-Pro exam dumps you will crack the NetSec-Pro Exam in a single try.

### Palo Alto Networks Network Security Professional Sample Questions (Q17-Q22):

#### NEW QUESTION # 17

What is a necessary step for creation of a custom Prisma Access report on Strata Cloud Manager (SCM)?

- A. Open a support ticket.
- B. Generate a PDF summary report.
- C. Set up Cloud Identity Engine.
- **D. Configure a dashboard.**

**Answer: D**

Explanation:

To create custom Prisma Access reports within SCM, you first configure a dashboard that aggregates the relevant logs and analytics. This allows you to define the data points you want to include.

"Dashboards in SCM can be customized to include Prisma Access data sources, enabling you to create and generate reports that meet specific business and security requirements." (Source: SCM Dashboards and Reporting) Once configured, you can export the dashboard as a custom report.

"Use the dashboard's data visualization to create custom reports for Prisma Access, which can be exported as PDFs for distribution." (Source: SCM Report Customization)

#### NEW QUESTION # 18

How many places will a firewall administrator need to create and configure a custom data loss prevention (DLP) profile across Prisma Access and the NGFW?

- A. Four
- **B. One**
- C. Two
- D. Three

**Answer: B**

Explanation:

Palo Alto Networks' Enterprise DLP uses a centralized DLP profile that can be applied consistently across both Prisma Access and NGFWs using Strata Cloud Manager (SCM). This eliminates the need for duplicating efforts across multiple locations.

"Enterprise DLP profiles are created and managed centrally through the Cloud Management Interface and can be used seamlessly across NGFW and Prisma Access deployments." (Source: Enterprise DLP Overview)

#### NEW QUESTION # 19

Which functionality does an NGFW use to determine whether new session setups are legitimate or illegitimate?

- A. SYN flood protection
- B. Random Early Detection (RED)
- C. SYN bit
- **D. SYN cookies**

**Answer: D**

Explanation:

To prevent SYN flood attacks, the NGFW uses SYN cookies to validate legitimate session establishment.

"SYN cookies allow the firewall to verify the legitimacy of new session requests without allocating resources until the handshake is completed. This prevents SYN flood attacks from exhausting system resources." (Source: Flood Protection Best Practices) SYN cookies mitigate resource exhaustion by ensuring only legitimate connections are established.

#### NEW QUESTION # 20

An NGFW administrator is updating PAN-OS on company data center firewalls managed by Panorama. Prior to installing the update, what must the administrator verify to ensure the devices will continue to be supported by Panorama?

- A. Device telemetry is enabled.
- B. Panorama is configured as the primary device in the log collecting group for the data center firewalls.
- C. All devices are in the same template stack.
- **D. Panorama is running the same or newer PAN-OS release as the one being installed.**

**Answer: D**

Explanation:

The firewall must be running a PAN-OS version that is supported by Panorama. This means that Panorama must be running the same or a newer PAN-OS version as the one being installed on the firewalls to maintain compatibility.

"Before you upgrade the firewall, ensure that Panorama is running the same or a later PAN-OS version than the firewall. Panorama must always be at the same or a higher version to maintain compatibility." (Source: Panorama Admin Guide - Upgrade Process)

#### NEW QUESTION # 21

After a firewall is associated with Strata Cloud Manager (SCM), which two additional actions are required to enable management of the firewall from SCM? (Choose two.)

- **A. Configure NTP and DNS servers for the firewall.**
- B. Configure a Security policy allowing "stratacloudmanager.paloaltonetworks.com" for all users.
- C. Deploy a service connection for each branch site and connect with SCM.
- **D. Install a device certificate.**

**Answer: A,D**

Explanation:

To fully manage a firewall from Strata Cloud Manager (SCM), it's essential to establish trust and ensure reliable connectivity:

Configure NTP and DNS servers

The firewall must have accurate time (NTP) and name resolution (DNS) to securely communicate with SCM and related cloud services.

"To ensure successful management, configure the firewall's NTP and DNS settings to synchronize time and resolve domain names such as stratacloudmanager.paloaltonetworks.com." (Source: SCM Onboarding Requirements) Install a device certificate A device certificate authenticates the firewall's identity when connecting to SCM.

"The device certificate authenticates the firewall to Palo Alto Networks cloud services, including SCM. It's a fundamental requirement to establish secure connectivity." (Source: Device Certificates) These steps ensure trust, secure communication, and successful onboarding into SCM.

#### NEW QUESTION # 22

.....

With only one Palo Alto Networks NetSec-Pro exam you can do this job nicely and easily. To do this just enroll in the Palo Alto Networks NetSec-Pro certification exam and download the updated and real Palo Alto Networks NetSec-Pro Exam now and start this journey today. We are quite confident that with NetSec-Pro exam dumps you can pass the upcoming Palo Alto Networks Network Security Professional exam in the first attempt.
