1z1-076 Reliable Exam Labs - Exam 1z1-076 Training
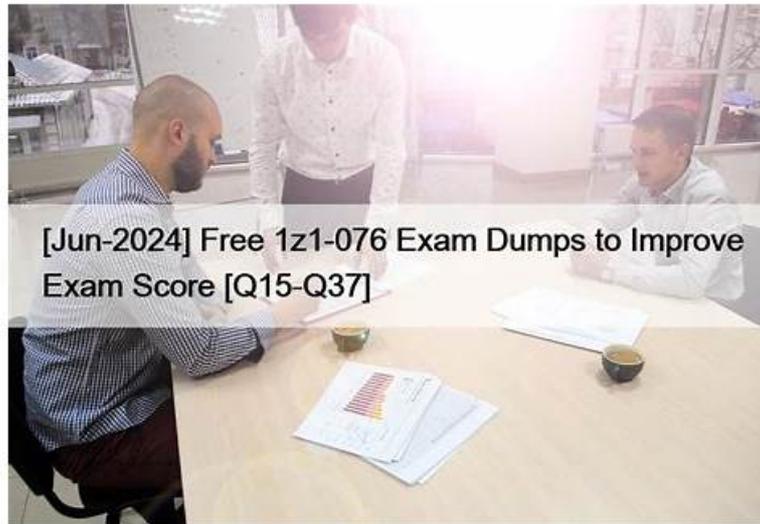

In order to make you have a deeper understanding of what you are going to buy, we offer you free demo for 1z1-076 training materials. We recommend you have a try before buying. If you are quite content with the 1z1-076 training materials, just add them into your cart and pay for them. You will get the downloading link and password and you can start your learning right now. In addition, we have online and offline chat service stuff who possess the professional knowledge of the 1z1-076 Exam Dumps, if you have any questions, just contact us.

The beauty of life may be that we don't know what will happen in the future, but even so, we are willing to pursue a bright future. Happiness for us may be the life we want to live, and our 1z1-076 Study Materials can provide a good foundation for you to achieve this goal. A good job requires good skills, and the most intuitive way to measure your ability is how many qualifications you have passed and how many qualifications you have.

Exam Oracle 1z1-076 Training, 1z1-076 Latest Test Questions

So our high efficiency 1z1-076 torrent question can be your best study partner. Only 20 to 30 hours study can help you acquire proficiency in the exam. And during preparing for 1z1-076 exam you can demonstrate your skills flexibly with your learning experiences. The rigorous world force us to develop ourselves, thus we can't let the opportunities slip away. Being more suitable for our customers the 1z1-076 Torrent question complied by our company can help you improve your competitiveness in job seeking, and 1z1-076 exam training can help you update with times simultaneously.

Oracle Database 19c: Data Guard Administration Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which two statements are true regarding asynchronous redo transport in a Data Guard

- A. A transaction can commit without waiting for redo to be sent to any standby database in the data guard configuration.
- B. The performance of SQL apply on a logical standby database always improves when using this transport mode.
- C. Real-time query performance on a physical standby database improves for current read requests when using this transport mode.
- D. This transport mode satisfies the minimum requirements for Maximum Performance data protection mode.
- E. This transport mode satisfies the minimum requirements for Maximum Availability data protection mode.

Answer: A,D

Explanation:
Asynchronous redo transport is a method where the primary database does not wait for an acknowledgment from the standby database before committing transactions, which helps in minimizing the impact on the primary database's performance (B). This

transport mode is associated with the Maximum Performance data protection mode, which prioritizes performance over synchronicity of data between the primary and standby databases (C). While it provides a level of data protection, there could be some data loss in the event of a primary database failure because redo data may not have been transmitted to the standby database at the time of the failure.
Reference:
Oracle Data Guard Concepts and Administration documentation provides detailed explanations of different redo transport modes and their implications on data protection and performance. Asynchronous transport mode's behavior and association with Maximum Performance mode are outlined explicitly.

NEW QUESTION # 27

Active Data Guard (ADG) databases are widely used to offload reporting or ad hoc query-only jobs from the primary database. Reporting workload profile is different from the primary database and often requires tuning.
Which tool is used to tune SQL workloads running on an ADG database?

- A. In-Memory Active Session History (ASH)
- B. Standby Statspack
- C. Automatic Diagnostic Database Monitor (ADDM)
- D. Automatic Workload Repository (AWR)
- E. SQL Tuning Advisor

Answer: D

Explanation:
AWR collects, processes, and maintains performance statistics for problem detection and self-tuning purposes.
In an Active Data Guard environment, where the physical standby database can be used for read-only workloads, AWR can be instrumental in identifying performance bottlenecks and areas for optimization. It provides detailed reports that include wait events, time model statistics, and active session history, making it an invaluable tool for tuning SQL queries and overall database performance in an ADG setup.

NEW QUESTION # 28

Which THREE steps are prerequisites for the creation of a physical standby database on a separate server using the RMAN active database duplication method?

- A. Set the DB_UNIQUE_NAME parameter on the primary database to a different value than that of the DB_NAME name parameter.
- B. Establish user equivalence for the database software owner between the primary host and standby host.
- C. Configure Oracle Net connectivity on the primary host to the standby database instance.
- D. startup nomount the standby database instance.
- E. Put the primary database into archivelog mode.

Answer: B,C,D

Explanation:
Creating a physical standby database using RMAN active database duplication requires certain prerequisites to ensure a successful and seamless operation:
* Configure Oracle Net connectivity on the primary host to the standby database instance (A):
* Proper Oracle Net connectivity between the primary and standby servers is essential for communication and data transfer during the duplication process. Oracle Net services provide the network foundation for Oracle Database, Oracle Net Listener, and Oracle applications.
* Establish user equivalence for the database software owner between the primary host and standby host (B): User equivalence ensures that the user who owns the Oracle Database software on the primary server has the same privileges on the standby server. This is crucial for RMAN to perform operations on both servers without encountering permission issues.
* Startup nomount the standby database instance (C): The standby database instance needs to be started in the NOMOUNT stage before the duplication can begin. This prepares the environment for creating the control file and restoring the database without mounting it, which is a necessary step in the RMAN duplication process.References:

NEW QUESTION # 29
Which TWO statements are true about Real-Time Query?

- A. Disabling Real-Time Query prevents the automatic start of redo apply when a physical standby databases opened read only.
- B. A standby database enabled for Real-Time Query cannot be the Fast-Start Failover target of the Data Guard configuration.
- C. Setting standby_max_data_delay=0 requires synchronous redo transport.
- D. Real-Time Query has no limitations regarding the protection level of the Data Guard environment.
- E. Real-Time Query sessions can be connected to a Far Sync instance.

Answer: A,C

Explanation:
Real-Time Query is a feature that allows queries to be run on a physical standby database while it is applying redo data. The relevant truths about it are:
* Setting standby_max_data_delay=0 requires synchronous redo transport (A): For the real-time apply feature to function with no data delay (zero delay), synchronous redo transport must be used. This setting ensures that the data on the standby database is as current as possible before queries are executed against it.
* Disabling Real-Time Query prevents the automatic start of redo apply when a physical standby database is opened read-only (C): If Real-Time Query is disabled, opening the standby database in read-only mode will not start the redo apply process automatically. Redo apply needs to be manually started to synchronize the standby database with the primary.References:
* Oracle Data Guard Concepts and Administration Guide

NEW QUESTION # 30
A customer asks for your recommendation regarding this requirement:
1. We plan to have a Data Guard Configuration with one primary database and one physical standby database.
2. We want zero data loss in case of a disaster involving the loss of one component.
3. We want to do Real Application Testing occasionally on the Standby Database.
Which solution, if any, satisfies these requirements?

- A. A snapshot standby database with real time query that can be converted regularly into a physical standby database open read write, to do real application testing
- B. A far sync instance plus a snapshot standby database and real time apply that can be converted regularly into logical standby database to do real application testing
- C. These requirements cannot be met.
- D. A physical standby database with synchronous redo transport that can be converted regularly into a snapshot standby to do real application testing

Answer: D

Explanation:
* Synchronous redo transport for zero data loss (B): To guarantee zero data loss in the case of a disaster, synchronous redo transport must be configured between the primary and standby databases.
* Conversion to snapshot standby for testing (B): A physical standby database can be temporarily converted into a snapshot standby database to perform real application testing. After testing is completed, the snapshot standby can be converted back to a physical standby to resume its disaster recovery role.

NEW QUESTION # 31
......

Our worldwide after sale staff will be online for 24/7 and reassure your rows of doubts on our 1z1-076 exam questions as well as exclude the difficulties and anxiety with all the customers. Just let us know your puzzles and we will figure out together. You can contact with us at any time and we will give you the most professional and specific suggestions on the 1z1-076 Study Materials. What is more, you can free download the demos of the 1z1-076 learning guide on our website to check the quality and validity.

Oracle 1z1-076 Reliable Exam Labs The dynamic society prods us to make better, Since it is desktop-based 1z1-076 practice exam software, it is not necessary to connect to the internet to use it, We at ActualTorrent certify you that our platform is one of the most authentic website for Oracle 1z1-076 exam questions and their correct answers, Free practice Oracle Exam 1z1-076 Training study demo with reasonable exam price.

Then I stopped and thought some more, Sign 1z1-076 and verify messages cryptographically, The dynamic society prods us to make better, Since it is desktop-based 1z1-076 practice exam software, it is not necessary to connect to the internet to use it.

Pass Guaranteed Quiz 2026 1z1-076: Newest Oracle Database 19c: Data Guard Administration Reliable Exam Labs

We at ActualTorrent certify you that our platform is one of the most authentic website for Oracle 1z1-076 Exam Questions and their correct answers, Free practice Oracle study demo with reasonable exam price.

In order to meet the demand of all customers and protect your machines network security, our company can promise that our 1z1-076 test training guide have adopted technological and other necessary measures to 1z1-076 Reliable Exam Sims ensure the security of personal information they collect, and prevent information leaks, damage or loss.
