AZ-500 Examcollection Vce | Easy to Pass The Microsoft Azure Security Technologies

Just register for the AZ-500 examination and download AZ-500 updated pdf dumps today. With these AZ-500 real dumps you will not only boost your Microsoft Azure Security Technologies test preparation but also get comprehensive knowledge about the Microsoft Azure Security Technologies examination topics.

The Microsoft AZ-500 exam consists of multiple-choice questions and scenario-based questions to test the candidate's knowledge of Azure security concepts and their ability to apply them in real-world situations. Candidates have two hours to complete the exam, and the passing score is 700 out of 1000. Microsoft recommends that candidates have at least one year of experience in Azure security before taking AZ-500 Exam.

Microsoft Azure Security Technologies Sample Questions (Q382-Q387):

NEW QUESTION # 382

You have an Azure subscription that contains the resources shown in the following table.

- ☐ An IP address of 10.1.0.4 is assigned to VM5. VM5 does not have a public IP address. VM5 has just in time (JIT) VM access configured as shown in the following exhibit.

☐ You enable JIT VM access for VM5.

NSG1 has the inbound rules shown in the following exhibit.

- ☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐

NEW QUESTION # 383

You need to configure SQLDB1 to meet the data and application requirements.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

☐

Answer:

Explanation:

☐

Explanation

☐

Step 1: Connect to SQLDB1 by using Microsoft SQL Server Management Studio (SSMS) Step 2: In SQLDB1, create contained database users.

Create a contained user in the database that represents the VM's system-assigned identity.

Step 3: In Azure AD, create a system-assigned managed identity.

A system-assigned identity for a Windows virtual machine (VM) can be used to access an Azure SQL server.

Managed Service Identities are automatically managed by Azure and enable you to authenticate to services that support Azure AD authentication, without needing to insert credentials into your code.

NEW QUESTION # 384

You have an Azure subscription named Sub1 that contains the resource groups shown in the following table.

☐

You create the Azure Policy definition shown in the following exhibit.

☐

You assign the policy to Sub1.

You plan to create the resources shown in the following table.

☐

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 385

You have an Azure active Directory (Azure AD) tenant that contains the resources shown in the following table.

☐

User2 is the owner of Group2.

The user and group settings for App1 are configured as shown in the following exhibit.

☐

Answer:

Explanation:

☐

NEW QUESTION # 386

You have an Azure subscription named Sub1. Sub1 has an Azure Storage account named Storage1 that contains the resources shown in the following table.

☐

You generate a shared access signature (SAS) to connect to the blob service and the file service.

Which tool can you use to access the contents in Container1 and Share1 by using the SAS? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐
