最新AAPC-CPC題庫，AAPC-CPC參考資料

VCESoft的專家團隊為了滿足以大部分IT人士的需求，他們利用自己的經驗和知識努力地研究過去的幾年的Medical Tests AAPC-CPC 認證考試題目，如此，VCESoft的最新的Medical Tests AAPC-CPC 的模擬測試題和答案就問世了。我們的Medical Tests AAPC-CPC 模擬測試題及答案和真實考試的題目及答案有95%的相似性，通過VCESoft提供的測試題你可以100%通過考試。如果你沒有通過考試，VCESoft會全額退款給你。你也可以先在網上免費下載

VCESoft提供的部分關於Medical Tests AAPC-CPC 認證考試的練習題和答案作為嘗試，在你瞭解了我們的可靠性後，快將我們VCESoft提供的產品加入您的購物車吧。VCESoft將成就你的夢想。

最新的 Medical Certification AAPC-CPC 免費考試真題 (Q132-Q137):

問題 #132

A female patient presents to her obstetrical office 32 -weeks pregnant for a bi-weekly ultrasound. Code the following technician's report:

Fetal views obtained via transabdominal ultrasound as follows:

BPD: 32 mm

Femur Length: 63 mm

Head Circumference: 288 mm

Abdominal Circumference: 270 mm

BPP 8/8

NST from 11:15 to 12:17, showing 160 BPM and positive movement activity Doppler shows adequate systolic and diastolic flow velocities of the fetal umbilical artery.

- A. 76816, 76818, 76820
- B. 76815, 78819, 76820
- C. 76815-TC, 76819-TC, 76820-TC
- D. 76816-TC, 76816-TC, 76820-TC

答案： A

解題說明：

CPT 76815 is a limited ultrasound, in which only the fetal heartbeat, position, placental location, and/or volume of amniotic fluid are evaluated. In this scenario, much more was done than a limited study. The ultrasound technician documented age-appropriate fetal measurements, which are supported by CPT 76816. A biophysical profile (BPP) was also done, which monitors the fetus's movements, tone, and breathing as well as evaluates the volume of amniotic fluid. Each of these elements counts as 2 units of grading to evaluate the general well-being of the fetus. The desired score of a BPP is 8/8. Because a fetal nonstress test (NST) was completed in conjunction with a BPP, report CPT 76818 instead of CPT 76819. Modifier TC is used to reflect that only a technical component of the procedure was completed. However, because the patient received these services in an obstetrical office that employs the physicians providing prenatal care and owns the ultrasound equipment the code should be submitted without modifiers TC or 26 to receive 100% reimbursement.

問題 #133

Which form is used to make a patient aware of the potential monetary liability they will have if their procedure is not likely to be covered by Medicare?

- A. Payment Plan Contract
- B. Advance Beneficiary Notice
- C. National Coverage Determination
- D. Health Insurance Portability and Accountability Act (HIPAA) Release

答案： B

解題說明：

National Coverage Determination is a reference guide for physicians to determine which services are covered by Medicare. The HIPAA Release is a form that must be signed by the patient prior to release of medical records and can be revoked at any time. The HIPAA Privacy Rule is in place to protect the patient's health information.

問題 #134

Assign the CPT codes for the following surgical note:

A patient who is confirmed to have lymphoma is placed under general anesthesia. A flexible bronchoscope is first inserted through the oral cavity to determine if the primary carcinoma has spread to the lung tissue. No lesions are observed in the bronchus, and the bronchoscope is removed. An incision is then made in the parasternal second left intercostal space, thus exposing the anterior mediastinal lymph nodes. Tissue samples from the lymph nodes are removed without complication. The incision is closed with sutures, and the patient is discharged to recovery.

- A. 39402, 31623-51
- B. 39010, 31623-51
- C. 39402, 31622-51
- **D. 39010, 31622-51**

答案： D

解題說明：

The first procedure documented is a bronchoscopy, reported with CPT codes 31622-31654.

Because the procedure was specifically aimed at confirming a diagnosis based off a previously confirmed malignancy, the bronchoscopy would be considered diagnostic (CPT 31622). The second procedure performed is a mediastinotomy with removal of cancerous tissue. An incision made into the parasternal intercostal space is considered transthoracic, making the correct procedure code

39010. Sequencing is based off the highest RVU value, and modifier 51 is appended to the bronchoscopy procedure code to indicate that multiple procedures were performed in the same session.

問題 #135

An orthopedic surgeon performs a meniscectomy for a right radial tear using an arthroscope. During the procedure, the surgeon removes a piece of the damaged meniscus from the lateral compartment of the knee and shaves the articular cartilage of the same compartment. A separate incision was made to remove a 6 mm loose body in the medial compartment. The surgery was completed without any complications. What procedure and diagnosis code(s) should be reported?

- A. 29881, 29874-51, S83.203A
- **B. 29881, 29874-59, S83.281A**
- C. 29887, 29874-59, S83.281A
- D. 29882, 29877-51, 29874-51, S83.203A

答案： B

解題說明：

The procedures performed on this encounter were the meniscectomy (removal of damaged meniscus from the lateral compartment) with a chondroplasty (shaving of articular cartilage, 29881) and loose body removal by means of an arthroscopy (29874). Because the removal of loose bodies is considered inclusive to the primary procedure, modifier 59 is appended as opposed to modifier 51 to indicate that it was a distinct procedural service due to the separate incision.

Answers A and D can be eliminated based on the diagnosis chosen. S83.203A indicates the location of meniscus is unspecified; however, the surgeon removed the damaged meniscus from the lateral compartment, leading the biller to S83.281A.

問題 #136

A physician documents a comprehensive electrophysiologic evaluation with an unsuccessful attempted induction of arrhythmia. Upon review, the bundle-of-His recording is missing. What code(s) should be reported?

- A. 0
- **B. 93610, 93602, 93612, 93603, 93618**
- C. 93619-52
- D. 93620-52

答案： B

解題說明：

To bill a comprehensive electrophysiologic evaluation (93619-93622), the following five components must be documented: right atrial pacing (93610), right atrial recording (93602), right ventricular pacing (93612), right ventricular recording (93603), and bundle-of-His recording (93600). If the documentation does not support all five components, each study must be reported separately, as opposed to billing the procedure with a "reduced services" modifier. The exception to this rule would be if an add-on procedure were performed and required to be reported in addition to the comprehensive electrophysiologic evaluation. In this case, however, the attempted induction arrhythmia (93618) is not an add-on code and can be reported in addition to the primary procedures.

問題 #137

.....

大家在準備考試的時候，可以結合本網站最新的 Medical Tests AAPC-CPC 擬真試題去認真地做練習，這樣的話，可以為你的考試節省很多的時間。Medical Tests 的 AAPC-CPC 考試整體來說還是不算複雜的，只要事先將擬真試題看好就沒有問題了。還有，做實驗題是要一定要多想想，這樣的話，才能將自身的一些素質提高上去。我們的考題網剛更新 AAPC-CPC 題庫能確保考生能順利通過 AAPC-CPC 考試，獲得 Medical Tests 認證證照。
