- D. Workspace settings

Answer: C

* Topic profiles are the core of social listening in Social Studio. They define the keywords, social accounts, and other criteria used to capture relevant social media mentions.

* Admin Settings as the Central Hub:

* Admin settings in Social Studio are the central location for managing overall account configurations, user permissions, and, importantly, topic profiles.

* Detailed Steps:

* Access Admin Settings: In Social Studio, you ' ll click on your profile avatar in the top right corner and then select " Admin " .

* Topic Profiles Section: Within the Admin panel, you ' ll find a dedicated section for " Topic Profiles. "

* Create/Edit Topic Profiles: This is where you can create new topic profiles or edit existing ones. You ' ll define keywords, include/exclude terms, specify languages, locations, media types, and link social accounts.

* Why Other Options Are Incorrect:

* A. Social Studio Automate: Social Studio Automate is used for automating actions based on rules (e.g., automatically routing posts to different teams, adding classifications). It ' s not where you create the foundation of social listening (topic profiles).
