Realistic HPE7-J02 Exam Questions Answers | Easy To Study and Pass Exam at first attempt & Authoritative HP Advanced HPE Storage Integrator Solutions Written Exam

This age changes quickly, so we can't be passively, we should be actively to follow the age. When you choose to participate in HPE7-J02 exam, you are proved to be an active person who wants better development opportunities for yourself. Our PracticeDump is willing to help those active people like you to achieve their goals. The most comprehensive and Latest HPE7-J02 Exam Materials provided by us can meet all your need to prepare for HPE7-J02 exam.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	• Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.

Topic 2	• HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 3	• Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.
Topic 4	• Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.
Topic 5	• Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.
Topic 6	• Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.
Topic 7	• Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.
Topic 8	• Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.

100% Pass Quiz Fantastic HP - HPE7-J02 - Advanced HPE Storage Integrator Solutions Written Exam Exam Questions Answers

Our HPE7-J02 guide torrent specially proposed different versions to allow you to learn not only on paper, but also to use mobile phones to learn. This greatly improves the students' availability of fragmented time. You can choose the version of HPE7-J02 learning materials according to your interests and habits. And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences. This means you can study HPE7-J02 Exam Engine anytime and anyplace for the convenience to help you pass the HPE7-J02 exam.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18
You are sizing an HPE Alletra Storage MP B10000 array (graphic provided).

What happens when the High Availability (HA) option is switched from Drive Level to Enclosure Level?

- A. The Enclosure Level option is not possible with the current number of disk enclosures
- B. The Enclosure Level option is only available with a switched configuration
- C. The Usable Capacity for the array decreases when selecting Enclosure Level HA
- D. The estimated performance decreases due to lower IOPS and GB/s values

Answer: C

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
Changing HA from Drive Level to Enclosure Level means the system must reserve additional capacity to tolerate the loss of an entire disk enclosure. This decreases usable capacity, as more parity/spare space is required. Performance remains similar, but capacity overhead increases.
Distractors:
A: Multiple enclosures exist in the config; option is valid.
B: Switched vs direct-connect is unrelated to HA settings.
C: Performance estimates are not directly reduced by HA level change; capacity is.
Key Concept: Enclosure HA = more reserve overhead # less usable capacity.
Reference: HPE Alletra MP Sizing Tool User Guide.

NEW QUESTION # 19
Refer to the exhibit.

A junior engineer is expanding a StoreOnce deployment for a law firm with a hybrid environment. The customer already has Veeam backing up to StoreOnce 3660 Gen 4 at both primary and secondary sites. They want to add Cloud Bank Storage (CBS) to archive into AWS Glacier tier for compliance. The junior engineer has added Cloud Bank licenses for the 80TB onsite capacity at the primary office.
Question: What does the junior engineer need to add to enable this scenario?

- A. Federated Management
- B. Catalyst License for StoreOnce-B
- C. Detach License on StoreOnce-A
- D. Cloud Bank Storage for AWS Glacier

Answer: C

NEW QUESTION # 20

You are sizing an HPE Alletra 5030. Unless otherwise indicated by the HPE sizer or the customer's requirements, HPE best practices state that you should default to which minimum FDR calculation?

- A. 23% of the smallest drive size
- B. 23% of the largest drive size
- C. Above 12% for low-read latency
- D. Below 12% for low-read latency

Answer: B

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
In Alletra 5000/6000 sizing, the Failure Domain Reserve (FDR) is used to account for rebuild overhead in case of drive failure. HPE best practices define that, unless otherwise directed by the sizing tool or customer requirements, the minimum FDR value should be set to 23% of the largest drive size. This ensures enough reserve capacity for fault tolerance and sustained performance during rebuilds.
Distractors:
B/C: Low-read latency is influenced by cache and workload profile, not by arbitrary FDR percentages.
D: Using the smallest drive is incorrect - rebuild impact must be sized against the largest drive.
Key Concept: FDR sizing based on 23% of largest drive = HPE best practice.
Reference: HPE Alletra 5000/6000 Sizing and Configuration Guide.

NEW QUESTION # 21

You are working with a customer to upgrade their current VMware infrastructure. The hardware is outdated, and the customer has no information about performance requirements for the new servers and storage array.
You are using HPE CloudPhysics to run an assessment.
Which Card Deck will give you insights on the under- and overprovisioning of the current environment?

- A. Reclaimable VMware vDisk Space
- B. Simulator for VM Rightsizing
- C. Infrastructure Planning
- D. Storage Space Management

Answer: B

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
The Simulator for VM Rightsizing Card Deck in HPE CloudPhysics evaluates actual VM utilization against provisioned resources. It identifies under- and overprovisioned VMs, providing insights into reclaimable resources and accurate sizing recommendations. This directly helps plan server and storage upgrades.
Distractors:
A: Storage Space Management focuses on datastore usage trends, not provisioning mismatches.
B: Reclaimable VMware vDisk Space identifies unused storage, not CPU/RAM sizing.
D: Infrastructure Planning helps plan new builds but doesn't directly analyze current over/under provisioning.
Key Concept: VM Rightsizing = CloudPhysics tool for over/under provisioning analysis.
Reference: HPE CloudPhysics Card Decks Guide.

NEW QUESTION # 22

Refer to the exhibit of Zerto Vault architecture.

Which statement about the Zerto Vault architecture is correct?

- A. Data is replicated via encrypted periodic replication between the Replication Target and the Vault.
- B. Immutable snapshots of all Zerto components are taken at the Replication Target and replicated to the Vault.
- C. The Resilience Automation Server manages port access between Production and the Replication Target.
- D. Data is replicated via encrypted periodic replication between Production and the Replication Target.

Answer: A

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
In the Zerto Vault architecture, production workloads replicate continuously to a Replication Target (secondary site). From there, data is further replicated periodically and encrypted into the Vault (air-gapped, isolated site). This two-step process ensures ransomware resilience and immutability, as the Vault acts as a hardened third copy.
Distractors:
A: Production-to-replication target traffic is continuous synchronous/asynchronous replication, not periodic.
Periodic replication applies to Replication Target # Vault.
C: The Resilience Automation Server (RAS) is responsible for orchestrating failover and immutability enforcement, but it does not control port access between production and replication target.
D: Snapshots of Zerto components are not what is replicated - it's application data VMs/volumes. The Vault ensures immutability of replicated data, not ZVM components.
Key Concept: Zerto Vault = encrypted, periodic replication from replication target to immutable vault.
Reference: HPE Zerto Vault Architecture White Paper, HPE Ransomware Recovery Solutions.

NEW QUESTION # 23

......

Passing HPE7-J02 exam is not very simple. HPE7-J02 exam requires a high degree of professional knowledge of IT, and if you lack this knowledge, PracticeDump can provide you with a source of IT knowledge. PracticeDump's expert team will use their wealth of expertise and experience to help you increase your knowledge, and can provide you practice questions and answers HPE7-J02 certification exam. PracticeDump will not only do our best to help you pass the HPE7-J02 Certification Exam for only one time, but also help you consolidate your IT expertise. If you select PracticeDump, we can not only guarantee you 100% pass HPE7-J02 certification exam, but also provide you with a free year of exam practice questions and answers update service. And if you fail to pass the examination carelessly, we can guarantee that we will immediately 100% refund your cost to you.
