

CITM Exam Vce & CITM Useful Dumps

What's more, part of that DumpsActual CITM dumps now are free: <https://drive.google.com/open?id=1orzfEds90TBLnpuKQ4ZvbQDiWmPLoTov>

DumpsActual has made the EXIN EPI Certified Information Technology Manager (CITM) exam dumps after consulting with professionals and getting positive feedback from customers. The team of DumpsActual has worked hard in making this product a successful EXIN CITM Study Material. So we guarantee that you will not face issues anymore in passing the EXIN CITM certification test with good grades.

EXIN CITM Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Information Security Management: This section targets an Information Security Manager and focuses on protecting information assets from threats. It covers policy development, security controls implementation, incident response, data protection, and compliance with legal and regulatory requirements to maintain confidentiality, integrity, and availability.
Topic 2	<ul style="list-style-type: none">Application Management: This section of the exam evaluates an Application Manager's skills in overseeing the lifecycle of IT applications. It covers application development support, maintenance, upgrades, user support, and ensuring that applications meet functional and performance standards aligned with business needs.
Topic 3	<ul style="list-style-type: none">Vendor SelectionManagement: This section measures the expertise of a Vendor Manager and covers the process of selecting and managing third-party providers. It addresses evaluating vendor capabilities, negotiating contracts, monitoring performance, and maintaining productive relationships to ensure service quality and value.
Topic 4	<ul style="list-style-type: none">Business Continuity Management: This section measures the skills of a Business Continuity Manager and covers planning and implementing strategies to ensure IT availability and resilience during disruptions. It includes risk assessment, disaster recovery planning, backup procedures, and testing to minimize business impact.
Topic 5	<ul style="list-style-type: none">IT Organization: This domain targets an IT Operations Manager and focuses on the design and management of IT organizational structures. It includes defining roles and responsibilities, establishing governance frameworks, managing resources effectively, and fostering collaboration to support IT service delivery and business needs.

Topic 6	<ul style="list-style-type: none"> IT Strategy: This section of the exam measures the skills of an IT Strategy Manager and covers the development and alignment of IT strategy with business objectives. It emphasizes creating strategic plans to support organizational goals, understanding emerging technologies, and ensuring that IT investments contribute to competitive advantage and operational efficiency.
Topic 7	<ul style="list-style-type: none"> Service Management: This domain targets a Service Delivery Manager and focuses on managing IT services to ensure consistent and efficient delivery. It includes establishing service level agreements (SLAs), incident and problem management, continuous service improvement, and aligning IT services with business demands.

100% Pass 2026 EXIN CITM Exam Vce

This is a desktop-based exam simulator software. The user can easily get used to its format and it is compatible with Windows. It has a bank of the actual EXIN EPI Certified Information Technology Manager (CITM) exam questions, going through them will prove to be vital for your EXIN CITM exam preparation since a candidate must know his lacking points. The CITM Practice Exam simulator is reliable because its EXIN CITM exam questions have been compiled by experts and you can be sure of their validity and accuracy. All features of the web-based practice exam are present in this software.

EXIN EPI Certified Information Technology Manager Sample Questions (Q40-Q45):

NEW QUESTION # 40

Lately, the support desk is receiving several requests for password resets from individuals who appear to be unknown to the organization. Possible criminal activities are suspected, and the organization wishes to address this issue in their information security awareness program. What is the area that requires awareness?

- A. Instant (mobile) messaging
- B. Internet usage
- C. Social engineering
- D. E-mail usage

Answer: C

Explanation:

Requests for password resets from unknown individuals suggests social engineering attacks, such as phishing or impersonation, where attackers manipulate users to gain unauthorized access. An information security awareness program should focus on educating staff about social engineering tactics to recognize and prevent such incidents.

E-mail usage (A), instant messaging (B), and internet usage (C) may be vectors for attacks, but the core issue is social engineering, which encompasses tactics used across these channels.

Reference: EPI CITM study guide, under Information Security Management, likely emphasizes social engineering in security awareness training. Refer to sections on security awareness or threat management.

NEW QUESTION # 41

The new system (application) is ready for adoption (implementation). The customer is concerned that an instant change-over from the current system to the new system will create a large impact on the user base.

You are requested to propose an approach for adoption. Which of the items listed below is recommended?

- A. Coordinated
- B. Big bang
- C. Parallel
- D. Phased

Answer: C

Explanation:

When implementing a new system, the customer's concern about a large impact on the user base suggests the need for a low-risk, controlled adoption strategy. In application management, the parallel adoption approach (B) involves running both the old and new systems simultaneously for a period, allowing users to transition gradually while ensuring the new system functions correctly. This minimizes disruption, as the old system remains operational as a fallback if issues arise with the new system.

* Big bang (A): This approach involves switching entirely to the new system at once, which is high-risk and likely to cause significant disruption, especially for a concerned user base. It's unsuitable here due to the potential for widespread impact.

* Coordinated (C): This is not a standard term in application deployment strategies. It may imply a managed transition but lacks the specificity of parallel or phased approaches.

* Phased (D): This involves rolling out the new system incrementally (e.g., by department or module), which reduces risk but doesn't provide the same level of safety as parallel, where both systems run concurrently to ensure continuity.

The parallel approach is ideal for mitigating risks during a critical system transition, as it allows validation of the new system's performance while maintaining business continuity. According to ITIL or SDLC frameworks, parallel adoption is often recommended for mission-critical systems to ensure stability and user acceptance.

Reference: EPI CITM study guide, under Application Management, likely discusses system implementation strategies within the Software Development Life Cycle (SDLC) or ITIL's service asset and configuration management. Refer to sections on application deployment, transition planning, or change management for details on parallel adoption.

NEW QUESTION # 42

A selection process for new IT staff has started. The Human Resource department has requested to follow the corporate staff hiring protocol. One mandatory item to be included is additional screening. What is verified by doing this?

- A. Salary demands
- B. Number of years working experience
- C. Criminal record
- D. Educational level

Answer: C

Explanation:

In corporate hiring protocols, additional screening typically refers to background checks beyond basic qualifications, such as verifying a candidate's criminal record. This is critical for IT roles, where employees may have access to sensitive systems and data, ensuring trustworthiness and compliance with security policies.

Salary demands (A) are negotiated during the hiring process, not screened. Number of years of experience (B) and educational level (D) are verified through resumes and standard checks, not typically classified as

"additional screening," which focuses on security-related checks like criminal records.

Reference: EPI CITM study guide, under IT Organization, likely covers hiring protocols and security considerations, emphasizing background checks for IT staff. Check sections on human resource management or information security management.

NEW QUESTION # 43

To further reduce fraud cases in the transfer of land titles, the government introduces a new system which, in the back-end, makes use of blockchain technology. Key functionality of the system is speed of transmission and privacy. Which type of blockchain is most preferred for this type of application?

- A. Consortium blockchain
- B. Public blockchain
- C. Community blockchain
- D. Private blockchain

Answer: D

Explanation:

For a government system handling land title transfers, the key requirements are speed of transmission and privacy. A private blockchain is most suitable because it restricts access to authorized participants, ensuring privacy and confidentiality of sensitive data such as land ownership records. Private blockchains are controlled by a single organization or a limited group, allowing faster transaction processing compared to public blockchains, which require consensus from a large, decentralized network. This aligns with the need for quick and secure transactions in a controlled environment.

Public blockchains (B) are open to anyone, which compromises privacy for sensitive government data.

Community blockchain (A) is not a standard term in blockchain technology, and consortium blockchains (D), while involving multiple

organizations, are less suitable for a single government entity needing full control.

Reference: EPI CITM study guide likely covers blockchain applications under IT Strategy, emphasizing private blockchains for secure, controlled environments like government systems. Refer to sections on emerging technologies or IT strategy frameworks for detailed blockchain categorizations.

NEW QUESTION # 44

Activities in a project are discussed in a Work Breakdown Structure (WBS) session during the planning phase. Team members inform the project manager that whilst estimating the duration for activities, a lot of data exist about the effort required for each of them. Which estimation technique is best considered?

- A. Bottom-up
- B. Top-down
- C. Comparative
- D. Three-point

Answer: A

Explanation:

When a lot of data exist about the effort required for project activities, the bottom-up estimation technique (D) is most appropriate. This method involves estimating the effort for each task in the Work Breakdown Structure (WBS) individually, then aggregating them to derive the total project duration or cost. It leverages detailed data for accuracy, as per PMBOK's estimation techniques.

* Top-down (A): Uses high-level estimates based on historical data or expert judgment, less accurate with detailed task data available.

* Three-point (B): Uses optimistic, pessimistic, and most likely estimates for uncertainty, but is less focused on leveraging detailed effort data.

* Comparative (C): Likely refers to analogous estimation, which relies on comparisons to past projects, not detailed task data.

Bottom-up estimation is ideal when detailed effort data is available, ensuring precision in project planning.

Reference: EPI CITM study guide, under Project Management, likely covers PMBOK's estimation techniques, emphasizing bottom-up for detailed data scenarios. Refer to sections on project planning or cost/duration estimation.

NEW QUESTION # 45

.....

There are many ways to help you pass EXIN certification CITM exam and selecting a good pathway is a good protection. DumpsActual can provide you a good training tool and high-quality reference information for you to participate in the EXIN certification CITM exam. DumpsActual's practice questions and answers are based on the research of EXIN certification CITM examination Outline. Therefore, the high quality and high authoritative information provided by DumpsActual can definitely do our best to help you pass EXIN certification CITM exam. DumpsActual will continue to update the information about EXIN certification CITM exam to meet your need.
